The Boston Harbor Association (TBHA) is the leading harbor advocacy group working to promote a clean, alive, and accessible Boston Harbor. Founded in 1973 by the League of Women Voters and the Boston Shipping Association, TBHA prides itself in its creative and innovative programs that help to educate the public and build a consensus for a clean and alive Harbor.

Boston's HarborWalk is an inviting public walkway along the waterfront, with parks, public art, seating areas, cafes, exhibit areas, interpretive signage, water transportation facilities, and a wide range of other amenities. TBHA works closely with the City of Boston's Environmental Department, the Boston Redevelopment Authority (BRA), the Massachusetts Department of Environmental Protection, and waterfront property owners to ensure completion of the 46.9-mile HarborWalk.

In 1984, the Boston Redevelopment Authority joined in partnership with the Harborpark Advisory Committee and The Boston Harbor Association to initiate focus on the revitalization of Boston's waterfront. The centerpiece of this innovative initiative is the HarborWalk, a continuous public walkway along the water's edge, with public amenities for all to enjoy.

Improved waterfront access for the public enjoyment is a collaborative effort among City and State agencies, private property owners, residents and harbor advocacy groups. City and State regulations require that new development be set back from the edge of the water, and that a portion of the setback area be improved as a public pedestrian path -- the HarborWalk. The HarborWalk is being constructed incrementally in segments by the City, State and private waterfront-property owners. Currently, the HarborWalk is about 84% complete and is accessible by the public.

Deer Island

The HarborWalk at Deer Island includes a 2.6-mile perimeter pathway lined with interpretive exhibits and is perfect for walking, jogging, fishing, picnicking or simply relaxing. From Deer Island's highest vantage point, there are sweeping views of the Harbor and downtown Boston. The public can also visit and learn about the Deer Island Wastewater Treatment Plant and the Boston Harbor Project at the award-winning Visitor Center, which was once the original pump house on the island. Deer Island has served a variety of social uses over the years, but perhaps none as dramatic as its current use -- treating wastewater from 43 communities to ensure Boston Harbor remains one of the cleanest harbors in the United States.

Deer Island was so-named in the 1600s because of the deer that had been chased there from the mainland by

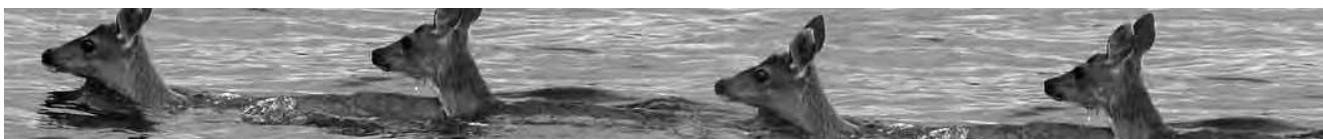

NEW ALMSHOUSE ON DEER ISLAND, IN BOSTON HARBOR.
F. CHAPLETT.

wolves. Since colonial days, Deer Island has served at one time or another as a detention center for Native Americans, a quarantine station and hospital for immigrants, an asylum for the city's social outcasts and the poor, a reformatory for juvenile delinquents, an orphanage, a prison for petty criminals, and a military post. The first in a succession of regional sewage treatment facilities was built on Deer Island in 1899, a hundred years before the present plant was completed. In the 1940s, the Army Corps of Engineers built a causeway connecting the island with the town of Winthrop on the mainland.

Deer Island today

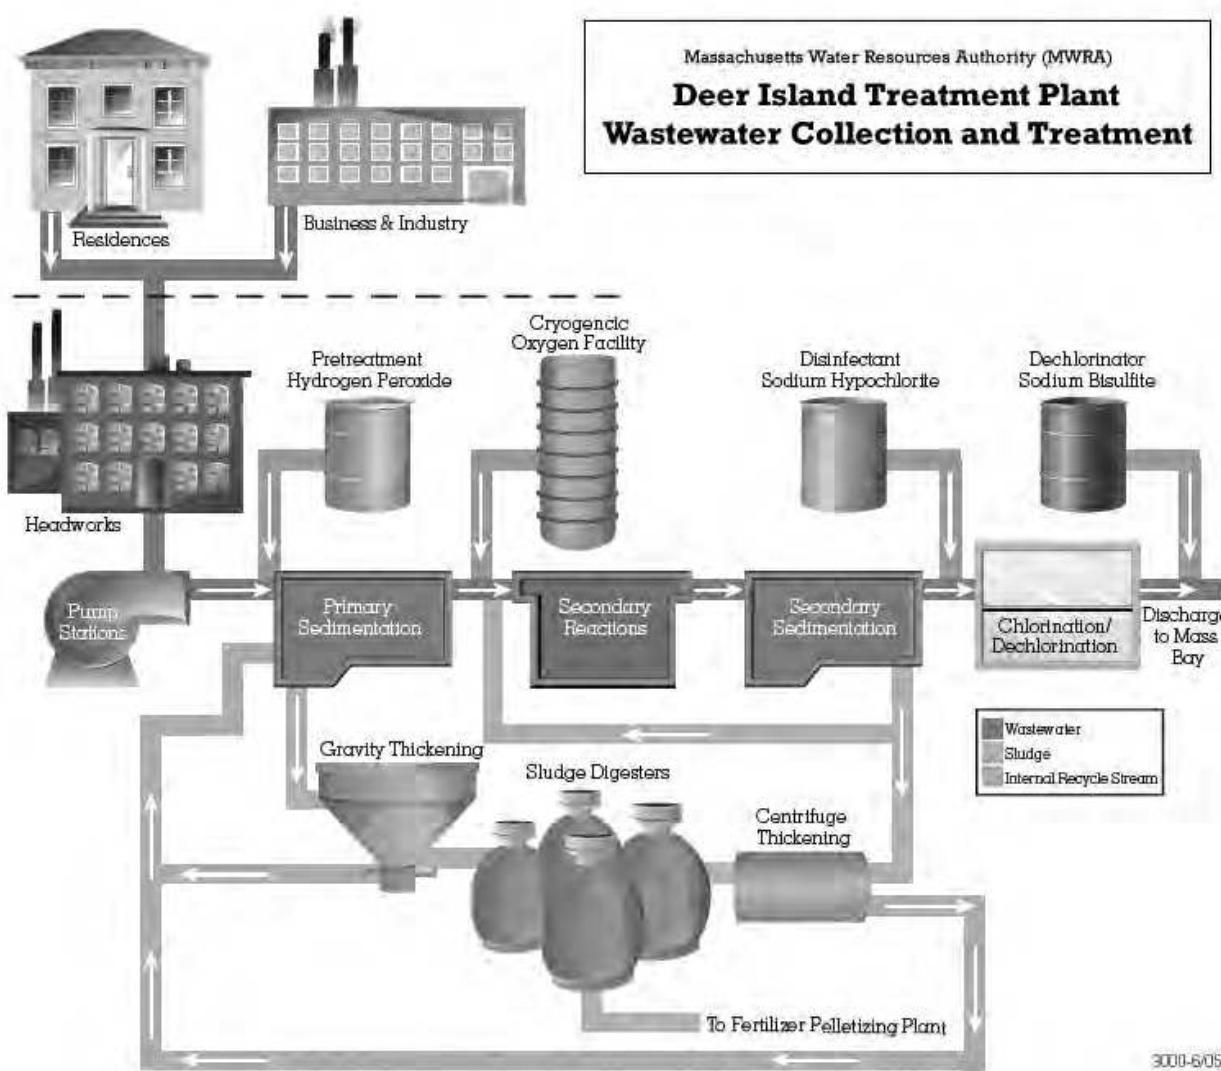

Today, Deer Island is home to a state of the art wastewater treatment facility. Begun as a court-ordered facility, the Deer Island plant is the centerpiece of the Boston Harbor Project. A gem in the eyes of environmentalists and water-quality activists, this secondary treatment facility serves as a model for engineers and public works professionals around the world. The 140-foot-high, 3-million-gallon egg-shaped digester tanks have even been hailed as an architectural marvel.

As one of the largest electricity users in the Northeast, Deer Island has embarked upon an ambitious goal of generating 30% renewable energy by 2020. Two 190-foot high wind turbines were installed on Deer Island in August, 2009 and generate over 2 million kW hours per year. Roof mounted photovoltaic system, lighting improvements, as well as methane from the sludge digestion process to create heat for the facility are just some of renewable fuels used on Deer Island.

The Water and Sewer Systems

When Boston area cities and towns first faced the problems of clean water sources and sewage disposal in the 1600s, their methods were primitive. But by 1795 wooden pipes delivered water from Jamaica Pond to Boston. By the late 1840s, however, Jamaica Pond was too small and too polluted to provide water to Boston's 50,000 residents. And so, the pattern of moving continually westward in search of larger water sources began - from the 2-billion gallon Lake Cochituate in 1848, to the 19-billion gallon Sudbury Reservoir in 1878, to the 65-billion gallon Wachusett Reservoir in 1908, to the 412-billion gallon Quabbin Reservoir in 1939. The construction of the Quabbin Reservoir was the last major investment in the water system and no plans were in place for upgrades to carry the system into the next century. Fortunately, the foundations laid by the early water engineers were able to provide the backbone of the system they run today.

January 3, 2012

**To the Citizens of the Commonwealth of Massachusetts,
Governor Deval L. Patrick, Lieutenant Governor Timothy P.
Murray, and Honorable Members of the General Court**

I am pleased to transmit the Commonwealth's fiscal year 2011 (FY11) Comprehensive Annual Financial Report (CAFR) prepared in accordance with Generally Accepted Accounting Principles (GAAP) in the United States of America. The objective of this report is to provide a clear picture of our government as a single, unified entity.

This document presents the Commonwealth's financial information on three bases of accounting, each serving a different purpose. The back of the report includes "required supplementary information" budgetary basis statements, which are prepared in accordance with the Commonwealth's budgetary basis of accounting or statutory basis. More detailed information on the statutory basis of accounting and the results of operating on that basis from FY11 are found in the Statutory Basis Financial Report (SBFR) separately issued this past November. The SBFR report documents compliance with the legislatively adopted budget at a fund level. Further documentation is found within the Commonwealth's accounting system, the Massachusetts Management Accounting and Reporting System (MMARS). Each state maintains different rules for budgetary reporting and therefore the SBFR should not be used for comparison across states.

The fund perspective statements present the governmental operations on a modified accrual basis of accounting. The fund perspective is designed to measure inter-period equity, the extent to which current resources (available within the next year) fully fund all current services provided by the government. Long-term liabilities are excluded with the implicit assumption that future tax revenues will fund these liabilities as they come due. This fund perspective provides results similar to the statutory basis financial statements published in November.

In addition to the fund perspective, this CAFR presents a government-wide perspective. This perspective combines all governmental and business activities in a statement of net assets and a statement of activities, presenting all functions on a full accrual basis of accounting. All capital assets are added to the government-wide statements as are all long-term liabilities. Funds that are shown as fiduciary under the fund perspective are not portrayed in the government-wide statements, as the assets do not belong to the Commonwealth.

In the government-wide statements, the balance sheet has been organized into a “net assets format.” This format classifies all assets and liabilities as short and long-term and then subtracts liabilities from assets to arrive at net assets.

The Commonwealth’s government-wide revenues, expenses and activities are included in the statement of activities. The expenses of the Commonwealth, organized by activity, are netted against fees, fines, grant revenues and assessments generated to fund each activity in an attempt to derive the net cost to the taxpayer of each activity. The format allows the reader of the financial statements to discern the net cost of a particular function of government funded by taxation and other general revenues by a review of this statement.

This CAFR is presented in three sections: **Introductory, Financial** and **Statistical**. The **Introductory Section** contains an overview of current initiatives and summary financial data. The **Financial Section** contains the Management’s Discussion and Analysis (MD&A) section and the Commonwealth’s Basic Financial Statements. GAAP requires that management provide a narrative overview and analysis to accompany the basic financial statements in the form of an MD&A. This letter of transmittal is designed to complement the MD&A, where the financial analysis is presented. The Commonwealth’s MD&A can be found immediately following the independent auditors’ report. The **Statistical Section** contains selected financial and demographic information. It also contains background information on the Commonwealth.

PROFILE OF THE COMMONWEALTH

The Commonwealth of Massachusetts was the sixth of the original 13 colonies to ratify the United States Constitution, joining the United States on February 6, 1788. Boston, the capital of the Commonwealth since its founding, dates from 1630. The Commonwealth has an area of 8,257 square miles. Geographically, the Commonwealth includes 351 cities and towns. The largest city is the capital, Boston. Employment is largely in the education, health services, wholesale and retail trade, financial and public sectors. Due to the Commonwealth’s high levels of basic education and the presence of world-class educational institutions, the Commonwealth’s economy is driven in large part by innovation in high technology, life sciences, health care and business services.

The Massachusetts Constitution was ratified in 1780 while the Revolutionary War was still in progress, nine years before the United States Constitution was adopted. It is the oldest written Constitution now in use. It specified three branches of Government: Legislative, Executive, and Judicial. “The Great and General Court,” elected every two years, is made up of a Senate of forty members and a House of Representatives of one hundred and sixty members. It is the second oldest democratic deliberative body in the world.

The table on page 3 reconciles the fund balances on three bases of accounting: the statutory basis presented in separately issued financial statements this past November; the fund basis; and entity-wide basis statements, the latter two included in this report.

Governmental Funds - Statutory to GAAP - Fund Perspective and to Governmental Net Assets
(Amounts in millions)

Governmental Funds - Statutory Basis, June 30, 2011:	
Budgeted fund balance.....	\$ 1,900.8
Non budgeted special revenue fund balance.....	1,983.9
Capital projects fund balance.....	<u>199.2</u>
 Governmental Fund Balance - Statutory Basis, June 30, 2011.....	4,083.97
Plus: Expendable Trust and similar fund statutory balances that are considered governmental funds for GAAP reporting purposes.....	428.0
Less: Massachusetts Department of Transportation Funds.....	<u>(1,164.3)</u>
 Adjusted Statutory Governmental Fund Balance.....	3,347.7
Short term accruals, net of allowances and deferrals for increases /(decreases):	
Taxes, net of refunds and abatements.....	1,743.75
Tobacco settlement agreement receivable.....	137.9
Medicaid.....	(284.1)
Assessments and other receivables.....	183.7
Amounts due to authorities and municipalities, net.....	(584.1)
Amounts due to health care providers and insurers.....	(91.8)
Workers' compensation and group insurance.....	(114.5)
Other accruals, net.....	<u>(164.6)</u>
 Net increase to governmental fund balances.....	<u>826.3</u>
 Massachusetts School Building Authority fund balance.....	<u>1,093.6</u>
 Total changes to governmental funds.....	<u>1,919.9</u>
 Governmental fund balance (fund perspective).....	5,267.59
Plus: Capital assets including infrastructure, net of accumulated depreciation.....	4,127.4
Deferred revenue, net of other eliminations.....	1,036.6
Long term accruals:	
Pension benefits cumulative over / (under) funding.....	(1,199.4)
Post employment benefits other than pensions cumulative over / (under) funding.....	(2,691.0)
Environmental remediation liability.....	(174.2)
Massachusetts School Building Authority debt and school construction payables.....	(6,844.3)
Long term debt, unamortized premiums and deferred losses on debt refundings.....	(21,164.0)
Compensated absences.....	(479.9)
Capital leases.....	(61.0)
Accrued interest on bonds.....	(346.2)
Other long term liabilities.....	<u>(304.6)</u>
 Total governmental net assets (government-wide perspective).....	<u>\$ (22,832.9)</u>

The deficit of \$22.8 billion in government-wide net assets can be largely attributed to the Commonwealth policy decision to finance the construction of assets owned by other government entities, particularly Commonwealth roads and bridges, which as a result of transportation reform completed during FY10 shifted these assets from the books of the Commonwealth to the newly formed Massachusetts Department

of Transportation (MassDOT), a component unit of the Commonwealth. At the end of FY11, MassDOT held over \$18.4 billion in road, bridge and other transportation-related assets (excluding assets of the Massachusetts Bay Transportation Authority) net of related depreciation, the vast majority of which were formerly held by the Commonwealth. Those assets were financed by the Commonwealth and the debt remains a long-term obligation of the Commonwealth. In addition, the Commonwealth holds \$6.8 billion in debt and grant obligations for the School Building Assistance Program that finances construction of schools for the Commonwealth's cities and towns.

Since MassDOT ended FY11 with positive net assets of \$23.8 billion, it is more informative to view the Commonwealth's financial statements in combination with MassDOT than to analyze the two separately.

The net deficit in governmental activities grew by \$460 million in FY11. While tax revenue growth was strong in FY11, this growth was offset by a number of adjustments that reduced the fund balance and ending net assets. The main factors underlying the change in the net deficit were as follows:

- Tax revenues grew by \$2.0 billion, or 10.7%, from FY10, mainly due to higher non-withheld income, particularly capital gains taxes, resulting from strong stock and bond markets as those markets recovered from the 2008 financial crisis, as well as growth in withholding tax on wages and salaries as the economy recovered from recession and employment grew; however, much of the revenue increase was absorbed by spending increases, particularly in the state's Medicaid program;
- The Commonwealth funds its other post-employment benefits (OPEB) liability on a pay-as-you-go basis. GAAP requires the accrual of a liability for the difference between this amount and the actuarially required contribution. The change in the accrual was \$738 million in FY11, reducing net assets;
- The Commonwealth continues to fund through its own debt transportation-related assets that are owned by the Massachusetts Department of Transportation (MassDOT). In FY11, almost \$600 million of MassDOT capital spending was funded through debt issued by the Commonwealth. While the assets created by this spending are recorded on the books of MassDOT, the liability for the debt remains with the Commonwealth; and
- While non-transportation-related debt grew by over \$600 million, fixed assets net of depreciation grew by only \$128 million.

The net deficit in government-wide activities, which includes the Commonwealth's business-type as well as governmental activities, declined by \$137 million in FY11, as FY11 surpluses in the Unemployment Insurance and Higher Education programs offset deficits in governmental activities.

REPORTING ENTITY

The financial statements incorporate activity from over 150 departments. These departments include the various agencies, boards, and commissions, the 25 institutions of higher education, the judicial and legislative branches of government, and constitutional offices. The departments record their daily financial operations in the state accounting system, MMARS, operated by the Office of the Comptroller.

In addition, financial statements include 14 independent public authorities. These entities are defined as component units and meet the criteria for inclusion in the Commonwealth's reporting entity in accordance with GAAP. They are further described in Note 1 to the basic financial statements. The Massachusetts School Building Authority is blended into the Commonwealth's operations.

INDEPENDENT AUDIT

The Commonwealth's independent auditors, KPMG LLP, with assistance from the Office of the State Auditor (OSA), have performed an independent audit of the Commonwealth for the fiscal year ended June 30, 2011. OSA also plays a significant role in the audit of the Schedule of Expenditures of Federal Awards of the Commonwealth, as prescribed in the Federal Office of Management and Budget's Circular A-133. The independent auditors' report is presented in the Financial Section.

The OSA is statutorily mandated to perform audits of the accounts, programs, activities and functions of all departments, offices, commissions, institutions and activities of the Commonwealth. OSA provides its knowledge, expertise, experience and resources as a participant in the single audit of the Commonwealth, which encompasses all of the Commonwealth's financial operations. A more complete discussion of this work can be found in the State Auditor's annual report available on their web site: <http://www.mass.gov/sao>.

The Office of the Comptroller prepares these financial statements and is responsible for the completeness and reliability of the information presented in this report. To provide a reasonable basis for making these representations, the Office of the Comptroller, working in conjunction with the State Auditor, has established a comprehensive internal control framework that is designed to protect the Commonwealth's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the Commonwealth's financial statements in conformity with GAAP. Because of the cost, internal controls should not outweigh their benefits. The Commonwealth's comprehensive framework of internal controls has been designed to provide reasonable, rather than absolute assurance that the financial statements will be free from material misstatement.

I would like to express my thanks to the many dedicated employees within the Office of the Comptroller. Continuing to carry out our mission and meet the goals that are set meant another successful year. I am proud to have them all on my team as another year of initiatives is now underway.

Respectfully submitted,

Martin J. Benison
Comptroller of the Commonwealth

Deer Island features five miles of public walkways and trails for walking, jogging, sightseeing, picnicking, fishing and bicycling. The public access area is open to the public year-round, from sunrise to sunset. At Deer Island you'll also find:

- 60 acres of open space, including 2.6 miles of paved handicapped accessible perimeter path;
- 10 landscaped overlooks, a 6-boat mooring basin, interpretive signage, and future Native American and Irish memorials;
- Dramatic views of the Boston skyline and Harbor Islands;
- Spectacular close-ups of airport landings and takeoffs;
- Elevated look-in locations to learn about the new treatment plant;
- A memorial to the late Judge A. David Mazzone.

Deer Island, which connects to the town of Winthrop, is accessible by car and public transportation. The Town of Winthrop runs bus services between Deer Island and the MBTA's Orient Heights Blue Line station.

City Square Park

The one-acre City Square Park is a quiet haven among busy bridges and roadways. The park is located at the site of Charlestown's historic Market Square, which was laid out in 1629 and remained a vital gathering place for the community through the 18th and 19th centuries until an elevated train was built through it in 1901. By the mid-20th century, the square had become congested with traffic from the Tobin Bridge, and two elevated highways were also built over it. During the mid-1990s, tunnels were constructed, the highways were put underground and an extensive community process ensued to design a public space that would restore the Square, now called City Square Park, to its use as a public space. Designated as a Boston Landmark in 1992, City Square Park has been used as a model for designing other open spaces throughout the Big Dig, due to the highly successful execution of its landscape design.

Today the park is a mini-oasis of green lawn areas formally landscaped with more than 70 varieties of trees, shrubs and flowers, and gracefully designed with gas lamps, artwork and a central fountain. It serves as a visual gateway between Charlestown and the rest of the city. City Square Park is ideal for taking short strolls along its winding walkways or just sitting outside among the sculptures, and maintains its beauty in large part through the efforts of the Friends of City Square Park and the local community.

Certificate of Achievement for Excellence in Financial Reporting

Presented to

Commonwealth of Massachusetts

For its Comprehensive Annual
Financial Report
for the Fiscal Year Ended
June 30, 2010

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

Paul Revere Park

Located where the Charles meets the Inner Harbor, the five-acre Paul Revere Park extends from the North Washington Street Bridge upstream to the new Leonard P. Zakim Bunker Hill Bridge. The park features a large, grassy oval, a great place for ball throwing, with a stage for performances and a large, fenced-in playground for toddlers and older children. Signage and interpretive features make this a user-friendly park. A pier overlooking Boston Harbor with fish cleaning stations makes this a perfect spot for some friendly fishing. Natural vegetation and mosaic art can also be found in the park.

Paul Revere Park is one of the new parks along the Charles River developed as mitigation for the river crossing of the Central Artery/Tunnel Project. When all the parks are completed, more than 40 acres of new

public space with over 7 miles of bicycle, pedestrian, and ADA-accessible pathways will provide a significant addition to the Charles River Reservation System, and "linking the river to the sea".

Independent Auditors' Report

Mr. Martin Benison, Comptroller
The Commonwealth of Massachusetts
Boston, Massachusetts

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the Commonwealth of Massachusetts (the Commonwealth), as of and for the year ended June 30, 2011, which collectively comprise the Commonwealth's basic financial statements as listed in the accompanying table of contents. These financial statements are the responsibility of the Commonwealth's management. Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the University of Massachusetts, the State Colleges and certain of the Community Colleges all of which are major enterprise funds and represent 87% of the total assets and deferred outflows of the business-type activities. We did not audit 36% of the total assets and deferred outflows of the Community Colleges major enterprise fund. We did not audit the financial statements of the Massachusetts Municipal Depository Trust which represent 5% of the total assets of the aggregate remaining fund information. Additionally, we did not audit the financial statements of certain nonmajor component units, which represent 6% of the total assets and deferred outflows of the aggregate discretely presented component units. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for those entities, is based on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The financial statements of certain entities identified in Note 13 were not audited in accordance with *Government Auditing Standards*. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Commonwealth's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the basic financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the Commonwealth of Massachusetts as of June 30, 2011, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in conformity with U.S. generally accepted accounting principles.

As described in Note 1, in fiscal 2011, the Commonwealth implemented Governmental Accounting Standards Board (GASB) Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*.

In accordance with *Government Auditing Standards*, we have also issued our report dated January 3, 2012, on our consideration of the Commonwealth of Massachusetts' internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The Management's Discussion and Analysis and Required Supplementary Information, listed in the accompanying table of contents, are not required parts of the basic financial statements but are supplementary information required by U.S. generally accepted accounting principles. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Commonwealth of Massachusetts' basic financial statements. The introductory section, other supplementary information and statistical section as listed in the accompanying table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements. The other supplementary information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

KPMG LLP

Navy Yard

When the Charlestown Navy Yard closed in 1974 after nearly 175 years of serving the fleet, 30 acres became part of the Boston National Historical Park. Home of the USS Constitution ("Old Ironsides"), the oldest commissioned warship in the world, the Boston National Historic Park provides sights and education for the young and old. Located on Boston's Historic Freedom Trail,

both the ship and the USS Constitution Museum bring to life the stories of the individuals who authorized, built, served on and preserved the USS Constitution. Visitors can also tour the USS Cassin Young, a World War II destroyer that provides a modern contrast to the USS Constitution. Both vessels are free to the public. The USS Constitution Museum requests a contribution for visiting the museum.

In addition, the Charlestown Navy Yard is home to the Boston Marine Society. Founded in 1742, it is the oldest association of sea captains in the world. It is located in Building 32 and houses an extensive collection of historical maritime art, artifacts, and books available for viewing free of charge.

Management's Discussion and Analysis

(Unaudited)

This analysis, prepared by the Office of the Comptroller, offers readers of the Commonwealth's financial statements a narrative overview of the activities of the Commonwealth for the fiscal year ended June 30, 2011 (FY11). We encourage readers to consider this information in conjunction with the additional information that is furnished in the letter of transmittal, and with the Commonwealth's financial statements, which follow. This analysis is required by the Governmental Accounting Standards Board (GASB), which provides preparers with guidelines on what must be included in and excluded from this analysis.

Financial Highlights – Primary Commonwealth Government

Government-Wide Highlights

Net Assets – The liabilities of the primary government exceeded its assets at the end of FY11 by almost \$18.5 billion, a reduction of \$137 million in the net deficit from FY10.

Of the \$18.5 billion deficit amount, “unrestricted net assets” is negative by \$22.7 billion, and there is a \$722 million deficit attributable to the investment in capital assets net of related debt for governmental activities. There are two primary reasons for negative unrestricted net assets: first, the Commonwealth has a liability of \$6.8 billion for its share of the construction costs of schools owned and operated by municipalities through the Massachusetts School Building Authority (MSBA); second, in FY10 the Commonwealth implemented transportation reform, which created the Massachusetts Department of Transportation (MassDOT) and transferred to that entity virtually all highway and bridge assets of the Commonwealth totaling approximately \$15.5 billion, net of depreciation. The Commonwealth, however, originally paid for the construction of these assets and retains a large amount of transportation-related debt, which will now be unrelated to any capital asset owned by the Commonwealth. In addition, a large portion of the Commonwealth's FY10 and FY11 capital spending is for transportation-related assets which are owned by MassDOT but the debt for which is retained by the Commonwealth.

These negative amounts are offset by nearly \$2.9 billion in “restricted net assets”.

During the fiscal year, approximately \$634 million in restricted net asset balances were set aside for unemployment benefits and an additional approximate \$630 million was restricted for debt retirement. The MSBA also holds \$597 million in assets restricted for debt retirement.

The Commonwealth's governmental activities net deficit increased by \$460 million and its governmental activities unrestricted net deficit increased by approximately \$1.077 billion in FY11. While tax revenue grew strongly in FY11, this growth was offset by higher Medicaid expenditures and increased accruals for underfunding related to retiree health care. In addition, as mentioned earlier, the Commonwealth continues to issue debt to fund transportation related capital spending where the assets are owned not by the Commonwealth but by one of its component units, which results in growth in the Commonwealth's net deficit.

Total revenues of the primary government increased by \$2.7 billion or 5.4% in FY11 compared to FY10. Tax revenues increased by \$2.03 billion, or 10.7%, primarily the result of growth in the individual income tax.

Among non-tax revenue sources, primary government operating grants and reimbursements increased by \$926 million, or 5.5%, in FY11, primarily due to a \$669 million increase in Medicaid. Charges for services increased by \$722 million, or 6.2%, primarily the result of increased charges to beneficiaries under the state's group health insurance plan for current and retired state employees, unemployment insurance charges and higher tuition payments received by state universities and the University of Massachusetts. Capital grants and contributions fell by \$610 million, or 78.3%, due to lower grants for transportation projects, and other revenues decreased by \$342 million, or 16.8%.

Total expenses of the primary government increased by \$1.2 billion, or approximately 2.3%, from FY10 to FY11, with the largest single increase being approximately \$1.45 billion, or 13.5% growth in Medicaid spending, and the largest single decrease a decline of \$1.05 billion in unemployment insurance compensation expenses.

Net assets of business-type activities showed an increase of \$597 million, due to net surpluses of \$187 million in the Unemployment Insurance Trust Fund and \$408 million for Higher Education activity.

Governmental Funds-Fund Balances. At June 30, 2011, the Commonwealth's governmental funds reported a combined ending fund balance of about \$5.268 billion, an increase of \$682 million from June 30, 2010. Under new requirements set by Governmental Accounting Standards Board Statement 54, starting in FY11 ending fund balances are classified as nonspendable, restricted, and unrestricted, and within the unrestricted category, as nonspendable, committed, assigned, and unassigned. (A full discussion of these new definitions is included in Note 1 to the basic financial statements.) Of the ending balances:

- \$914,000 is nonspendable, \$1.675 billion is restricted, \$2.020 billion is committed, \$750 million is assigned and \$821 million is unassigned fund balance.
- The MSBA's fund balance of approximately \$1.094 billion is blended into the Commonwealth. Within this fund balance is over \$1.037 billion in cash and restricted investments which were funded by bond proceeds in previous fiscal years, and other assets, less approximately \$123 million in liabilities. In FY11, over \$657 million was apportioned to the MSBA from the Commonwealth from sales taxes, adjusted for accruals.
- Lottery revenues for FY11 remained virtually unchanged from FY10 at approximately \$4.632 billion. Prizes were approximately \$3.656 billion, operating expenses and mandated transfers to the governmental funds were \$977 million.

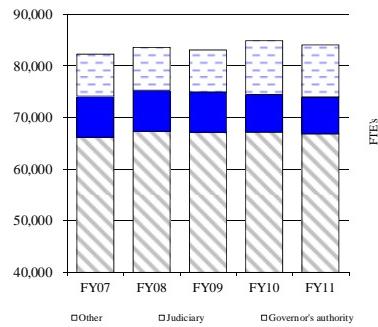

Other highlights of FY11 financial operations include:

- Tobacco settlement proceeds for the year were approximately \$248.7 million, all of which were used to support current operations. This was a decrease of \$14.9 million from the prior year, due to one-time additional non-participating manufacturers settling under the master settlement agreement (MSA) received in FY10. Approximately \$137.9 million has been reported as a receivable in the governmental funds related to half of the anticipated tobacco settlement proceeds to be received in FY12. The MSA with the tobacco manufacturers estimates Commonwealth revenues for the first 25 years of the settlement to be approximately \$8.96 billion. However, this estimate is subject to future adjustments, including adjustments for inflation and changes in the volume of domestic cigarette sales. Approximately 67.2% of the estimated amounts shown in the MSA were received in FY11. The Commonwealth continued to receive Strategic Contribution Fund payments in FY11 under the terms of the MSA. These additional payments are paid to lead states in a suit against tobacco manufacturers. The payments began in FY08 and will continue through FY17.
- During the fiscal year, the Commonwealth passed or agreed to terms of approximately \$75 million in bond authorizations. There were no de-authorizations of previously issued capital appropriations in FY11. The Commonwealth will determine the timing and extent of capital spending and bonding as part of its five year capital plan.

Full-Time Equivalent Employment

***Full Time Equivalent Workforce
Including Higher Education and the
Massachusetts Department of
Transportation***

June 2007 – June 2011

The chart to the left shows the Commonwealth's full-time equivalent employment levels over the past five fiscal years. A change in accounting for certain Higher Education employees in FY09 and government reorganizations in FY10 involving the Massachusetts Department of Transportation (MassDOT) and county sheriffs' departments resulted in additional FTEs being transferred to the Commonwealth's payroll system in FY09 and FY10. In FY09, the state switched approximately 2,500 Higher Education employees to the Commonwealth's payroll system. In FY10, approximately 1,330 employees of the former Massachusetts Turnpike Authority and the Tobin Bridge were transferred to MassDOT. Also in FY10, the sheriffs' departments of Barnstable, Bristol, Dukes, Nantucket, Norfolk, Plymouth and Suffolk were brought onto the state's accounting and payroll systems, with approximately 2,770 employees. These increases were offset by reductions in state employment due to a combination of employee attrition and layoffs, as the state responded to lower tax revenues caused by the recession. In FY11 alone, the total number of FTEs dropped by 777, from 84,847 to 84,070. Adjusting for the 6,600 employees brought onto the state payroll system as a result of these accounting changes and reorganizations, state employment levels dropped by a total of 6,166 FTEs between June 30, 2008 and June 30, 2011.

OVERVIEW OF THE FINANCIAL STATEMENTS

This MD&A is intended to serve as an introduction to the Commonwealth's basic financial statements. The Commonwealth's basic financial statements are made up of three components: 1) government-wide financial statements; 2) fund financial statements; and 3) notes to the financial statements. This report also contains additional required supplementary information in the form of budgetary schedules, which are prepared on the statutory basis of accounting, as well as other supplementary information.

Government-wide Financial Statements

The government-wide financial statements present the reader with a broad overview of the Commonwealth's finances in a manner similar to a private sector business. The statements include the *Statement of Net Assets*, which presents the assets, liabilities and net assets for the government as a whole. Also presented is the *Statement of Activities*, which presents the functional expenses, offsetting revenues and changes in net assets of the Commonwealth. The statements report the Commonwealth's net asset position and changes to those net assets. It can be inferred that an increase or decrease in the Commonwealth's net assets is one way to measure financial health as well as the trend of increases or decreases over time. But non-financial measures such as capital investments, changes in taxation, population, employment and economic conditions are also indicators of the overall health of any government.

Both the statement of net assets and the statement of activities have separate sections for three different categories of the Commonwealth's operations. These activities are Governmental Activities, Business-type Activities and Discretely Presented Component Units. Governmental activities are where the Commonwealth's basic services are reported. Business-type activities are where fees are charged for a particular service. These are mainly the institutions of higher education and the unemployment insurance compensation system. The component units are separate legal entities that are included with this report due to the nature of their governance and financial relationship with the Commonwealth.

The government-wide financial statements can be found immediately following this discussion and analysis.

Fund Financial Statements and Component Unit Financial Statements

Funds are groups of related accounts that are used to maintain control over resources that have been segregated for specific activities or objectives. The Commonwealth, like other governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. Within the funds, budgetary compliance is demonstrated at the appropriation level for budgeted expenditures. Only the most significant major funds are shown separately in the fund financial statements, with the remaining funds included in the aggregate.

Fund financial statements focus on individual parts of the Commonwealth government, reporting its operations in more detail than the government-wide statements. All of the funds of the Commonwealth can be divided into three categories: *Governmental Funds, Proprietary Funds and Fiduciary Funds*. It is important to realize that these fund categories use different bases of accounting and should be interpreted differently. Further discussion of the funds can be

found in the section “Financial Analysis of the Commonwealth’s Funds” and in Note 1 to the financial statements.

Component unit financial statements are presented for entities where the Commonwealth has financial accountability, but the entities are independent of the core Commonwealth operations. Most component units operate similar to private-sector businesses.

Even though the Massachusetts School Building Authority (MSBA) is a component unit, the MSBA’s operations have been judged by management in a similar fashion to a Commonwealth department due to the MSBA’s service to the Commonwealth. Therefore, its operations are reported as “blended component unit”, part of the governmental funds.

Notes to the Financial Statements, Required Supplementary Information and Other Supplementary Information

The notes to the financial statements provide additional information that is essential to a full understanding of the financial statements as of the date provided in the government-wide and the fund financial statements. The notes to the financial statements can be found immediately following the component units’ financial statements.

The required supplementary information section includes budgetary comparison schedules for the General and Commonwealth Transportation Funds, along with a reconciliation comparing the original General Appropriation Act and supplemental appropriations to actual budgetary spending. Variance columns are also provided. A further reconciliation schedule of the budgeted revenues and expenses to governmental fund perspective revenues and expenditures is also provided. A schedule of pension funding progress and the Commonwealth’s pension contributions is also included in this section.

Other supplementary information is not required, but is included to present combining schedules of minor governmental funds.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Net Assets

Major Long – Term Obligations for Assets of Political Subdivisions (amounts in thousands)

School construction grants payable.....	\$ 2,324,917
Massachusetts School Building Authority debt....	4,590,912
Outstanding bonds issued to fund the MBTA	155,380
Debt related to MassDOT assets	<u>8,889,252</u>
Effect on unrestricted net assets of items unique to the Commonwealth.....	<u>\$ 15,960,461</u>

Net assets may serve over time as a useful indicator of a government’s financial position. The primary government’s combined net assets (governmental and business-type activities) showed a net deficit of almost \$18.5 billion at the end of FY11. Governmental activities unrestricted net assets are negative by over \$22.7 billion. As explained previously, a substantial portion of this deficit is a result of programs where the Commonwealth decided to fund assets that are owned by political subdivisions of the Commonwealth, and in particular the result of the transfer of assets to MassDOT in FY10 as well as continued borrowing by the Commonwealth that funds construction of new assets owned by MassDOT. In FY11, MassDOT reports these capital assets on their financial statements, which are incorporated into the Commonwealth’s financial statements similarly to other component units.

As alluded to previously, another example of this type of arrangement is the MSBA. In FY05, legislation changed the funding of school construction from a direct appropriation of the Commonwealth to a dedicated portion of the sales tax allocated to the MSBA. Because of the nature of transactions between the Commonwealth and this authority, per GASB Statement 39 the authority’s operations are

reported within a governmental fund in this report and on the government-wide financial statements.

In addition, the Commonwealth holds debt that was issued to fund an 18-month lag in operating subsidy costs, otherwise known as “forward funding,” of the MBTA, a change enacted in FY2000. As of June 30, 2011, the outstanding debt remaining related to the “forward funding” costs of the MBTA was approximately \$45 million.

Exclusive of fiduciary assets, the Commonwealth’s government-wide current cash and investments increased by over \$1.0 billion between June 30, 2010 and June 30, 2011, and total current assets increased by \$921 million. To finance its cash flow and bridge the time gap between current year receipts and current year major expenses such as the payment of local aid, in FY11 the Commonwealth issued \$300 million in commercial paper along with \$1.2 billion in revenue anticipation notes (RANS), which retired the commercial paper. The RANS were retired in April, May and June 2011.

The primary government’s non-current assets increased by \$1.02 billion. The increase was due mainly to a \$453 million increase in the restricted cash and investments of the higher education entities and a \$484 million increase in capital assets, most of which occurred in business-type activity funds.

Nearly \$8.3 billion of the Commonwealth’s net assets reflect the Commonwealth’s investment in traditional capital assets such as land, buildings, infrastructure and equipment, net of accumulated depreciation. GASB requires the reporting of the value of investments in the Commonwealth’s infrastructure, including roads, bridges, beaches, dams and other immovable assets on the face of the Commonwealth’s financial statements. As these assets provide services to citizens, they are not available to finance future spending unless they are sold. Although the Commonwealth’s investment in its capital assets is also reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

As explained above, the bulk of the Commonwealth’s net deficit is due to long-term liabilities which financed non-Commonwealth capital assets. Current assets and liabilities are amounts that are available in the current period and obligations that will be paid within one year, respectively. As of June 30, 2011, the Commonwealth’s current assets were almost \$10.4 billion, while its current liabilities were over \$7.8 billion. Restricted net assets represent resources that are subject to external constraints.

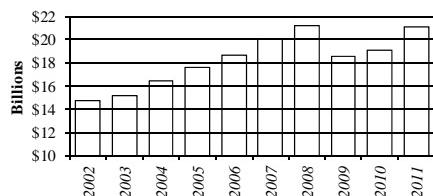

The tables below show the Commonwealth's net assets and the changes to those net assets for the fiscal year. In addition, net assets of higher education foundations have been included as part of the business-type activities.

Changes in Net Assets

Revenue from Taxation – FY02-FY11

As noted earlier, the Commonwealth's total primary government net deficit declined by approximately \$137 million between FY10 and FY11. In FY11, approximately 40% of the Commonwealth's total revenue came from taxes, while the remainder resulted from programmatic revenues, including charges for services and grants and contributions, the bulk of which is federal aid. Total revenues increased by \$2.73 billion or 5.4%, with tax revenue increasing by nearly \$2.03 billion, or 10.7%. The increase in tax revenue was attributable to growth of \$1.635 billion in the personal income tax, due to an increase in non-withheld income, primarily investment income from capital gains taxes, as well as growth in withholding taxes on wages as the Commonwealth's economy emerged from recession and generated new jobs. Sales tax revenues grew by \$205 million, partly due to a sales tax increase that was in effect for the full FY11 fiscal year, but only 9 months in FY10. Corporate and other business excise taxes grew by \$63 million in FY11.

The American Recovery and Reinvestment Act (ARRA) and other federal grants (primarily for unemployment insurance benefits), operating and capital grant contributions increased by \$316 million, or 1.8% in FY11, as growth in Medicaid revenues was offset by a decline in capital contributions and ARRA revenues. ARRA funds received by the Commonwealth during FY11 were almost \$2.4 billion, the most significant of which were Federal Medicaid Assistance Program (FMAP) receipts from ARRA of \$1.25 billion, more than \$530 million for education programs, \$192 million for transportation programs, approximately \$160 million for housing and community development

* Resulted in expenditure reduction in the General Fund

** Not included in this report

programs and almost \$145 million for labor and workforce development programs (including supplemental unemployment insurance benefits). ARRA revenues in FY11 declined by approximately \$400 million from FY10, as higher Medicaid reimbursement rates under ARRA began to phase out during FY11, and returned to their historical 50% rate by the end of the fiscal year. FY12 ARRA revenues are expected to decline to less than \$400 million as the ARRA program winds down.

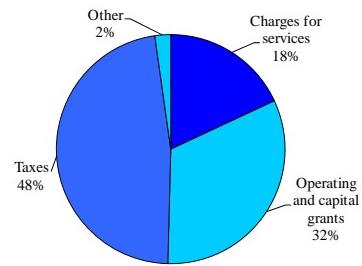

Total charges for services increased by more than \$722 million, or 6.2%, due to a \$218 million increase in Unemployment Insurance charges, a \$158 million increase in charges at the University of Massachusetts, an increase of over \$65 million at the state universities and community colleges and an increase in Health and Human Services charges of over \$98 million. Charges for services also increased by \$73 million in the Medicaid program and group health insurance charges for services rose by approximately \$81 million. Government-wide restricted net assets increased due to a \$428 million increase in MSBA assets restricted for debt, a \$187 million increase in assets restricted for unemployment compensation and an increase in restricted net assets for higher education institutions.

Total primary government spending increased by \$1.200 billion, or 2.3% from FY10, with Medicaid expenses growing by \$1.446 billion, or 13.5%, but unemployment insurance compensation declining by \$1.047 billion, or 19.3%. Other significant changes occurred in energy and environmental affairs, which grew by \$359 million, or 110.1%, education, which grew by \$254 million, or 7.5%, transportation, which grew by \$174 million, or 8.3% and direct local aid, which declined by \$184 million, or 3.7%.

Revenue—Governmental Activities
Fiscal Year Ending June 30, 2011

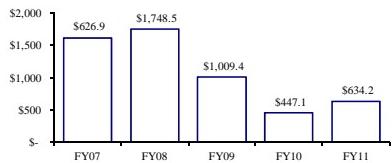

Major Expenses—Governmental Activities
Fiscal Year Ending June 30, 2011

Business-Type Activities

Unemployment Compensation Fund Net Assets
Fiscal Years 2007 - 2011
(Amounts in Millions)

The largest category of tax revenue is income taxes. Of the more than \$21 billion in tax revenue within governmental activities, \$11.9 billion was from income taxes, \$4.9 billion was from sales taxes, \$1.9 billion was from corporate taxes, \$661 million was from motor fuels taxes and \$1.7 billion was from other forms of taxation. The largest operating grants are federal Medicaid subsidies. Other operating grants were for ARRA. The largest capital grants were for transportation, namely grants for highway construction. Finally, Lottery revenues made up approximately 58% of the Commonwealth's governmental charges for services. In FY11 Lottery revenues were virtually unchanged from FY10.

Medicaid expenses of \$12.1 billion accounted for 28% of all the Commonwealth's governmental expenses, exclusive of business-type activities. However, half of Medicaid expenses have been historically reimbursed by the federal government, and under ARRA that percentage was increased to 61.59% in FY10 and an average rate of 59.7% in FY11 (the reimbursement rate returned to 50% in FY12). These subsidies are noted herein in the "operating grants and contributions" segment. The largest expense that is not subsidized by program revenues is direct local aid to the municipalities of the Commonwealth.

Other large expenditures for governmental activities included non-Medicaid health and human services costs of approximately \$7.1 billion, pre-Kindergarten through higher education costs funded not directly from the institutions of approximately \$3.6 billion and public safety and homeland security costs of approximately \$2.3 billion. State employees' pensions and other post-employment benefits, which are included in the department spending amounts above, were \$1.5 billion.

Business-type activities are functions that equate to activities of a private enterprise. In the Commonwealth, the institutions of higher education are deemed to be business-type activities because of their lack of separate taxation. Also, unemployment compensation is considered to be a business-type activity.

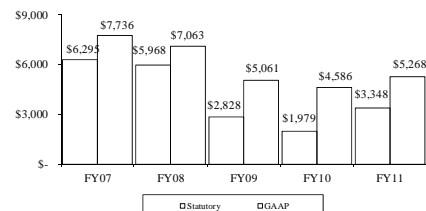

Business-type activities increased the Commonwealth's net assets by over \$596 million. While operating grants and contributions dropped by \$520 million, due almost entirely to reduced unemployment insurance reimbursements from the federal government as unemployment fell in the Commonwealth, charges for services grew by \$440 million, with about half of the increase coming from higher unemployment insurance tax collections and half from higher charges by higher education institutions. As a result, net revenues of business-type activities dropped by \$80 million, but this decline was more than offset by a drop in unemployment insurance benefit spending, which declined by \$1.047 billion as the economy recovered. As a result, net assets of the Unemployment Compensation Trust Fund increased by \$187 million. Net assets of the schools of higher education increased by \$408 million.

FINANCIAL ANALYSIS OF THE COMMONWEALTH'S FUNDS

As noted earlier, the Commonwealth uses fund accounting to demonstrate inter-period equity and the extent to which current resources are financing the full cost of services that citizens are receiving. The basic governmental funds financial statements can be found immediately following the government-wide financial statements.

Governmental Funds

Governmental Fund Balance Statutory vs. GAAP *(Statutory Excludes MassDOT in FY11) (Amounts in Millions)*

Governmental funds account for the near term inflows, outflows and balances of expendable resources of the Commonwealth's core functions and services. Each major fund is presented in a separate column in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures and changes in fund balances. Due to the significant nature of the relationship between the Commonwealth and the MSBA, the MSBA's operations and results are presented as a major fund in the governmental funds, even though it is a legally separate authority. MSBA's activity in FY11 added \$686 million in revenues, but reduced fund balance by approximately \$441 million due to expenditures of bond proceeds raised in prior years.

The Commonwealth develops its budgets on a statutory basis. A comprehensive process is conducted with all departments to convert the statutory basis reporting to generally accepted accounting principles. System-generated reports from the state accounting system and information warehouse are combined with reports from each of the Commonwealth departments to record governmental fund perspective departmental accruals. Similar reports are generated to show budgetary control, which is maintained at the appropriation level, not at the fund level.

The major items which account for almost all the difference between the statutory basis reporting and the governmental fund perspective are accruals for the Medicaid program, tax revenue, compensated absences and claims and judgments.

Governmental Fund Operations - GAAP Basis - Fund Perspective *(Amounts in millions)*

	FY11	FY10	FY09	FY08	FY07
Beginning fund balances	\$ 4,585.7	\$ 5,061.3	\$ 7,062.7	\$ 7,735.9	\$ 7,263.2
Reclassifications.....	-	-	-	-	5.0

Expenditures and other financing uses.....	<u>53,216.5</u>	<u>51,454.6</u>	<u>51,789.4</u>	<u>50,810.0</u>	<u>48,934.5</u>
Excess / (deficiency).....	<u>681.9</u>	<u>(475.6)</u>	<u>(2,001.4)</u>	<u>(673.2)</u>	<u>472.7</u>
Ending fund balances	<u><u>\$ 5,267.6</u></u>	<u><u>\$ 4,585.7</u></u>	<u><u>\$ 5,061.3</u></u>	<u><u>\$ 7,062.7</u></u>	<u><u>\$ 7,735.9</u></u>

The increase in revenues in FY11 from FY10 is attributable to a \$1.863 billion, or 9.8%, increase in governmental tax revenues due primarily to growth in income taxes and an increase in the sales tax rate effective August 1, 2009 (thus in effect for only part of FY10 but for all of FY11), and an increase of \$827 million, or 6.1%, in federal grants and reimbursements, mostly due to higher Medicaid spending and other draws for various health and human services programs, partly offset by a decline in ARRA grants. Assessments, fees and investment earnings combined declined by \$103 million, or 1.1%, due primarily to a decline in revenues received by expendable trusts. Coupled with other financing sources, largely from bonds and transfers, overall revenues increased by \$2.919 billion, or approximately 5.7%.

During FY11, governmental fund expenditures and other financing uses increased by \$1.762 billion, or 3.4%, with Medicaid expenditures increasing by \$1.446 billion, or 13.5%, \$755 million of which was for universal health care and aid to Massachusetts hospitals that care for lower income residents. Debt service expenditures fell by \$188 million, or 7.8%, primarily due to a drop in short-term borrowing, restructuring and refunding of a portion of the Commonwealth's debt, and a decline in interest rates. Lottery revenues were up \$3 million from FY10, while Lottery expenditures rose by \$16 million; Lottery revenues exceeded spending by about \$976 million. The other governmental funds as a whole decreased in fund balance, largely due to spending and transfers in the School Building Assistance Fund which had a deficit of \$441 million, the Federal Grant Anticipation Note Trust Fund, which had a deficit of \$156 million and the General Capital Projects Funds, which ran a deficit of \$129 million.

The Federal Grants Fund is used to manage categorical grants funded in their entirety by the federal government. This fund has seen a significant increase in activity as a result of ARRA, and collected over \$3 billion in revenue in FY11. (Also reported in this fund is almost \$1.3 billion in food stamp benefit payments, which do not actually flow through the Commonwealth but are included in this report under governmental accounting rules.) It is anticipated that expenditures and related federal revenues will begin to return to historic levels in FY12 as the ARRA program winds down. Most other minor funds had slight increases or decreases in fund balances for the fiscal year.

As of the end of FY11, the Commonwealth's governmental funds reported combined ending fund balances of \$5.268 billion, an increase of \$682 million from the previous year. Of the \$5.268 billion balance, the following amounts are classified as nonspendable, restricted, and unrestricted under the new GASB 54 definitions.

:

Governmental Funds - Fund Balance Classification
(Amounts in millions)

	<u>2011</u>	<u>2010</u>	<u>Change</u>	<u>Percentage Change</u>
<u>Nonspendable/Restricted:</u>				
Nonspendable.....	\$ 0.9	\$ 5.9	\$ (5.0)	-85%
Restricted.....	<u>1,675.1</u>	<u>1,905.7</u>	<u>(230.7)</u>	-12%
Total Nonspendable/Restricted.....	<u>1,676.0</u>	<u>1,911.7</u>	<u>(235.7)</u>	-12%
<u>Unrestricted</u>				
Committed.....	2,020.0	2,166.2	(146.2)	-7%
Assigned.....	750.5	156.5	594.0	380%
Unassigned.....	<u>821.2</u>	<u>351.4</u>	<u>469.8</u>	134%
Total Unrestricted.....	<u>3,591.7</u>	<u>2,674.1</u>	<u>917.6</u>	34%
Total fund balances	<u>\$ 5,267.6</u>	<u>4,585.7</u>	<u>681.9</u>	15%

Nonspendable amounts represent loans receivable. Restricted fund balances represent amounts restricted for Commonwealth and MSBA debt service or restricted by bond covenants, funds that are restricted in capital projects and special revenue funds, balances in the federal grants funds and most of the balances held in expendable trusts. Unrestricted amounts include fund balances classified as committed, including those generated by revenue sources directed to specific purposes but with a lower level of constraints on their use than restricted balances, and fund balances in the Stabilization Fund. Unrestricted amounts also included prior appropriations continued, which are classified as assigned, and residual balances in the General Fund, which are classified as unassigned. A full discussion of the Commonwealth's fund balance classification policy under GASB 54 can be found in Note 1 to the basic financial statements.

During FY11 the General and Commonwealth Transportation funds (the latter the successor to the Highway Fund, which was eliminated as part of the Commonwealth's reform of the state transportation system) were the primary operating funds of the Commonwealth. At the end of FY11, the fund balance of the General Fund was \$3.052 billion. Of this amount, \$1.379 billion represents the balance in the Commonwealth's Stabilization Fund. \$400 million was also committed for continuing appropriations from FY11 into FY12 or restricted for debt service, a significant increase from FY10's continuing appropriations and debt service restrictions of \$102 million.

Presented in the governmental funds are the balances and results of operations from the MSBA. In FY11, the MSBA received approximately \$657 million of dedicated sales tax revenues.

Proprietary Funds

Proprietary Funds report activities of the Commonwealth that are structured similar to for-profit businesses. Proprietary fund financial statements provide the same type of information as the government-wide financial statements, only in greater detail.

As discussed above, the business-type activities increased the Commonwealth's net assets by approximately \$597 million.

BUDGETARY HIGHLIGHTS

The FY11 General Appropriation Act (GAA) authorized approximately \$30.0 billion in spending, exclusive of approximately \$1.44 billion in required pension contributions and \$111 million in FY10 spending authorized to be continued into FY11 as part of final FY10 supplemental budgets.

The FY11 budget as enacted by the Legislature was based on an FY11 tax revenue estimate of \$19.098 billion, including \$2.853 billion in tax revenue allocated to the Massachusetts Bay Transportation Authority (\$767 million), the School Modernization And Reconstruction Trust Fund (\$646 million) and the Pension Reserves Investment Trust Fund (\$1.44 billion). Net of these allocations, tax revenue available for budget was \$16.245 billion. The \$19.098 billion estimate reflected the FY11 consensus tax estimate of \$19.051 billion adjusted for the impact of tax law changes enacted as part of the FY11 budget. The FY11 tax

revenue estimate was revised upward to \$19.784 billion on January 2011 as tax revenues had performed above benchmark in the first half of FY11.

At the time the Governor signed the FY11 budget in July 2010, it was unknown whether the federal government would enact legislation extending through FY11 higher Medicaid reimbursements under ARRA. Historically, those reimbursements were at a rate of 50% of state expenditures for Medicaid, but had been raised to 61.59% through June 30, 2010. Responding to this uncertainty, the Legislature included in the FY11 General Appropriation Act alternative funding levels for most line items, reflecting spending with and without the additional ARRA revenue. The Governor vetoed the additional funding authorizations, but once federal legislation authorizing the higher federal Medicaid reimbursements (totaling \$499 million) was enacted in August 2010, the Governor filed supplemental budgets to restore the vetoed funding. In response to the federal ARRA increases, supplemental appropriations totaling approximately \$419 million were enacted in October 2010, \$327 million of which was for MassHealth, the state's Medicaid program.

Approximately \$1.511 billion in supplemental appropriations were authorized during FY11 prior to June 30, 2011. Subsequent to year end, an additional supplemental budget was enacted totaling approximately \$135 million in new FY11 appropriations, all of which were continued to FY12 and reappropriated. Besides the appropriations that restored federal funding, the year's significant supplemental appropriation activity included approximately:

- \$494 million for payments to hospitals through the Medical Assistance Trust Fund (which were largely offset through corresponding federal Medicaid revenue);
- \$261 million for additional MassHealth payments;
- \$50 million for snow and ice removal, in response to the severe storms of winter 2010-2011;
- \$46 million for family shelters;
- \$41 million for additional private counsel compensation for indigent clients;
- \$30 million for labor agreement settlements with court employees;
- \$25 million for underground storage tank grants;
- \$20 million for health care costs for immigrants with legal status;
- \$18 million for prison facilities operations;
- \$15 million to pay for the cleanup costs of the June 2011 hurricane.

On a statutory (not GAAP) basis, revenues and other sources (before transfers between the budgeted funds, which are included in both spending and revenue, and thus have no effect on fund balances) grew by \$2.8 billion, or 9.1%, in FY11. Revenue growth was due to strong tax revenue collections, as taxes available for budget grew by \$1.9 billion, or 11.2%, and higher federal reimbursements, which were up \$751 million, or 8.8%, primarily the result of increased spending on the state's federally reimbursable Medicaid, or MassHealth, program.

Budgeted expenditures and other uses, including transfers to non-budgeted funds, increased by \$1.65 billion, or 5.4%, from FY10. Most

of the growth in budgeted expenditures and other uses resulted from an increase in transfers to non-budgeted funds, which grew from \$1.04 billion in FY10 to \$2.06 billion in FY11, with \$680 million of growth resulting from higher transfers to non-budgeted health care funds and most of the remainder due to a change in the way the Commonwealth's transfers to MassDOT were reported.

Programs and services grew by \$740 million, or 2.9%. Medicaid expenditures grew by \$951 million, or 10.2%, from \$9.286 billion in FY10 to \$10.237 billion in FY11. On net, other program and service spending fell due to program cuts.

Spending for direct local aid decreased by \$53 million, or 1.1%, due to reductions in unrestricted local aid. Debt service decreased by \$196 million, or 10.5%, due to debt restructuring as authorized by the Legislature in FY11, lower than projected interest rates and the timing of certain debt issues. Post-employment benefit costs increased by \$90 million, or 5.2%.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

Capital assets of the Commonwealth include land, buildings, improvements, equipment, vehicles and infrastructure. The Commonwealth's investment in capital assets for its governmental and business-type activities as of June 30, 2011 amounts to approximately \$14.9 billion, with accumulated depreciation of approximately \$6.6 billion, leaving a net book value of almost \$8.3 billion. Infrastructure includes assets that are normally immovable and of value only to the Commonwealth, such as roads, bridges, beaches, piers and dams. The investments in capital assets noted above are net of capital assets transferred to MassDOT as part of the Commonwealth's Transportation Reform, which occurred in FY10. The total increase in the Commonwealth's investment in capital assets from 2010 to 2011 was approximately \$612 million, with almost \$129 million in governmental activities and almost \$484 million in business-type activities. Virtually all of the increase was in construction in process.

The following table details the capital asset activity for the Commonwealth. Similar to previous charts, FY11 amounts for business-type activities include amounts for the foundations established on behalf of the institutions of higher education.

Capital Assets at Year - End (net of depreciation) (amounts in thousands)							
	Governmental Activities		Business - type Activities		Total		
	2011	2010	2011	2010	2011	2010

Additional detail on the Commonwealth's FY11 capital asset activity can be found in Note 5 to the basic financial statements ("Capital Assets").

Debt Administration

The Commonwealth issues short-term and long-term debt. Debt that is general obligation in nature is backed by the full faith and credit of the Commonwealth and paid from governmental funds. Additionally, short-term notes are issued and redeemed annually.

To fund the fiscal 2011 capital budget, the Commonwealth borrowed by issuing \$2.06 billion in long-term general obligation bonds, \$1.56 billion of which was for new-money needs, with the remainder for refunding already existing debt. Of the new money issues, \$708 million was issued as Build America Bonds (BABs). The BABs program is a temporary bond program authorized by the federal government as part of the 2009 America Recovery and Reinvestment Act (ARRA). Under the BABs program, issuers borrow by selling bonds into the taxable bond market and receive in return a subsidy from the federal government equal to 35% of the interest costs on the bonds. Given market conditions at the time of the Commonwealth's two BABs sales, this program resulted in borrowings whose net interest costs will be significantly lower than the interest on traditional tax-exempt bonds. The BABs program expired on December 31, 2010, and unless the program is reauthorized by the federal government, no additional BABs will be issued.

During FY11, the Commonwealth also issued \$576 million in special obligation bonds for highway construction purposes under the Commonwealth's Accelerated Bridge Program, secured by Commonwealth motor fuels taxes and Registry of Motor Vehicle fees and issued grant anticipation notes totaling \$480.5 million – \$100 million for new-money needs under the Commonwealth's Accelerated Bridge Program, and \$380.5 million to refund previously issued debt.

Approximately 19% percent of the Commonwealth's \$18.5 billion in general obligation debt outstanding as of June 30, 2011 has been issued as variable rate bonds. Included in this variable rate debt was approximately \$402 million in auction rate securities (about 2% of all general obligation debt) as of June 30, 2011.

Approximately \$1.5 billion in bond sales were either for general government purposes or unallocated as of year-end and assumed to be for general purposes, including for construction and equipment purchases. The remaining \$676 million in new issues were for highway and other infrastructure construction.

On the following page is a table which details the Commonwealth's debt by type for the fiscal year compared to the prior fiscal year, excluding premiums and discounts.

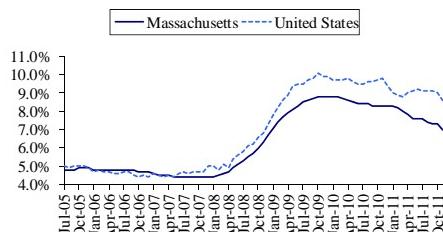

Additional detail on the Commonwealth's short-term debt can be found in Note 6 ("Short-Term Financing and Credit Arrangements") and Note 7 ("Long-Term Obligations") to the basic financial statements.

ECONOMIC FACTORS AFFECTING NEXT YEAR'S BUDGET

Monthly Unemployment Rate July 2005 – November 2011

Massachusetts and National Home Values – 2008Q3 – 2011Q3 Case – Schiller Index January 2000 = 100

In December 2007, the nation entered into a recession caused by the downturn in the housing markets that worsened due to the global capital markets crisis that occurred starting in September 2008. Rates of economic decline have been sharp as the nation's gross domestic product has fallen and unemployment has hit the highest levels in decades. While the national recession ended in June 2009, recovery has been slow. While the Dow Jones Industrial Average has risen from a low of 6,547 in March of 2009 to over 12,000 by December 2011, though this is still well below the 14,200 historical high of two years ago. Housing values also appear to have started to rise again after hitting lows in March 2009, though they weakened towards the end of the calendar year 2011, as some of those rises may have been attributable to tax credits available in ARRA as well as other stimulus measures. Most economists believe unemployment will remain relatively high in the near future.

Massachusetts' economy has outperformed the nation's economy as a whole during and following the most recent recession, and home prices have fallen by less than in the U.S. as a whole (see chart at left). The unemployment rate for the Commonwealth rose from 5.2% in July of 2008 to a high of 9.5% in February 2011, but since then has declined, and in November 2011 stood at 7.0%. This decline is greater than in the nation as a whole, where unemployment rose from 5.8% in July 2008 to a high of 10.1% in October 2009 (a rate that had not been seen since 1983), and has declined by only 1.5%, to 8.6% as of November 2011. Population growth in the Commonwealth, which during the 1990s and most of the 2000s was lower than in the nation as a whole, was only slightly slower than in the U.S. in calendar years 2009, 2010 and 2011, probably due to the fact the state economy has performed better than the national economy during the most recent recession.

The Commonwealth, with an international reputation for medical, cultural, historical and educational institutions remains the economic and educational hub of New England.

The Commonwealth's economy remains diversified, but its strongest component is its knowledge-based technology and service industries. The Commonwealth is home to sixteen S&P 500 companies, among them eight Fortune 500 headquarters.

According to the United States Patent Office, in calendar 2010 the Commonwealth ranked fourth in the nation in patents per capita, only slightly behind California, Washington state and Vermont. Massachusetts' infrastructure provides strong support for this knowledge-based economy. There are over 120 colleges and universities located in Massachusetts, and the US Census Bureau's most recent American Community Survey estimated that 38.5% of the residents over age 25 have earned bachelor's degrees, compared to an estimate of 27.9% for the United States as a whole. In the same survey, 88.7% of residents over age 25 at least had a high school diploma or general education equivalent, compared to 85.0% for the nation as a whole. In primary education, the most recent National Assessment of Educational Progress continues to rank Massachusetts first in 4th and 8th grade mathematics and reading, second and third in writing and fifth and sixth in science in grades 4 and 8, respectively. This shows that Massachusetts schoolchildren are consistently among the best educated in the nation.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the Commonwealth's finances and accountability for all of the Commonwealth's citizens, taxpayers, customers, investors and creditors. Questions concerning any of the information provided in this report or requests for additional information should be addressed via email to comptroller.info@state.ma.us or mail to: Commonwealth of Massachusetts, Office of the State Comptroller, 1 Ashburton Place, 9th Floor, Boston, Massachusetts, 02108. You may also download this report at: <http://www.mass.gov/osc/reports/reports.htm>.

University of Massachusetts Boston

The University of Massachusetts Boston campus, located on Columbia Point, provides one of the city's longest uninterrupted portions of HarborWalk, perfect for walkers and joggers, as well as photographers. Besides offering spectacular views of the Harbor and Islands, UMass Boston is home to the region's first collection of large-scale outdoor sculpture by some of the world's leading artists: Arts on the Point. Founded in 1997, the contemporary art changes periodically. Past and current artists include Tony Smith, Dennis Oppenheim, Mark di Suvero, William Tucker, Luis Jimenez, Sol LeWitt, Roy Lichtenstein, Seth Kane Kwei, and Willem de Kooning. Interpretive signage describing the sculpture and artist is located next to each piece. These extraordinary works are set against the ocean backdrop.

*Lagartos, Painted fiberglass
Luis Jiménez*

As a boy in El Paso, TX, Jiménez frequented a city park with a pond where docile alligators ("lagartos") lived. Over time, the park deteriorated and the alligators moved to the zoo. When the park was revitalized in the 1980s, Jiménez brought the alligators back with this vivid and fanciful sculpture.

*Brushstroke Group, Painted Aluminum
Roy Lichtenstein*

The sculpture leaps from the land like five energetic strokes of a loaded paintbrush, affirming the value of creative experimentation. A founding father of the American Pop Art movement of the 1960s, Lichtenstein was fascinated by the brush stroke as a painter's defining mark and as a symbol of tradition that is constantly reinventing itself.

Government-wide Financial Statements

Statement of Net Assets

Statement of Activities

John F. Kennedy Library and Museum

The John F. Kennedy Library and Museum is dedicated to the memory of the nation's thirty-fifth president. Researchers from around the world come to the library to examine the original documents generated by John F. Kennedy throughout his career and to research mid-twentieth century American history, politics, government, and society. A permanent exhibit about JFK's life and career and temporary exhibits about the times in which he lived draw visitors from around the globe.

The dramatic building, designed by world-renowned architect I.M. Pei, is poised on Columbia Point and features a glass pavilion that serves as the main lobby,

soaring 115 ft., with a huge 26' X 45' American flag. It is set on a 9.5 acre park landscaped with pine trees, shrubs and wild roses reminiscent of the familiar landscape of Cape Cod. The Museum's 25 multimedia exhibits and period settings from the White House offer an exciting experience and create a stirring account of President Kennedy's thousand days in office. Under construction next door is the Edward M. Kennedy Institute for the United States Senate.

The HarborWalk offers a spectacular view of the downtown skyline and connects to the long stretch of HarborWalk along the UMass Boston campus. During the summer, President Kennedy's sailboat, Victura, is on display on the grounds of the Library.

(concluded)

The Neponset Estuary and Marshes are designated as an Area of Critical Environmental Concern. While providing ample opportunities to observe wildlife, the marshes are important nursery habitat for smelt and productive shellfish beds. Wide varieties of birds visit these marshes during their seasonal migrations and some species nest here.

Neponset II Park

Designed through a community process, the Neponset II Park provides access to the Neponset River Salt Marsh, one of the few remaining extensive salt marshes within the Boston area. Three cleaned up former industrial/commercial properties acquired by the Massachusetts Department of Conservation and Recreation are the site for the new Neponset II Park along the existing Neponset River Greenway multi-use trail. It provides direct access to the Neponset River for non-motorized boats. The Neponset River Greenway multi-use trail, opened since 2003, goes along the edge of the marsh and is part of the 3 mile trail from Tenean Beach to Central Avenue in Milton.

Governmental Fund Financial Statements

Pope John Paul II Park

Pope John Paul II Park, on the banks of the Neponset River, is a 72-acre park with walkways, scenic open areas, playing fields and native plantings. Formerly a landfill, the site has been restored to a place of natural splendor. The park now re-connects area residents to the resources of their unique and delicate river estuary by offering picnic facilities, soccer fields, play areas, paths for walking, restored salt marsh, and extensive plantings of native trees and shrubs. It has also benefited area wildlife; black ducks, mergansers, teal, snowy egrets, and great blue herons have been spotted at the park. The restoration of the salt marsh has also greatly enhanced fisheries habitat. The park also offers a wide range of recreational opportunities, including active sports and activities such as walking, jogging, bird-watching, and picnicking. The three-mile Neponset River Greenway walking and biking trail runs through the park.

**Reconciliation of Statement of Revenues, Expenditures and
Changes in Fund Balances of Governmental Funds
to the Statement of Activities**

For the fiscal year ended June 30, 2011
(Amounts in thousands)

Net change in fund balances - total governmental funds \$ **681,913**

Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This amount represents capital outlays including increases to construction in process, but excluding reductions and dispositions.....	316,044
Current year depreciation expense.....	(187,289)
Amounts presented in the statement of activities, but not in the change in fund fund balances due to difference in revenue and expense recognition under different bases of accounting.....	214,729
Elimination of due from / due to activity between state departments within government and business-type activities.....	(2,695)
The issuance of long - term debt provides current financial resources to governmental funds, while the repayment of principal of long - term debt consumes the current financial resources of governmental funds. Neither transaction has any effect on net assets. Also, governmental funds report the effect of issuance costs, premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized as part of the statement of activities. This amount is the net effect of these differences in the treatment of long - term debt and related items.....	(1,261,021)
Decrease in capital leases.....	15,633
Massachusetts School Building Authority.....	535,223
Net underfunding of post employment benefit obligations.....	(719,228)
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore, are not reported as expenditures in governmental funds. These expenses include accrued interest, lottery prizes, claims and benefits that are reported in the statement of activities, but not in funds.....	(52,830)
Change in net assets of governmental activities	\$ (459,521)

New England Aquarium

The New England Aquarium, located on Central Wharf, first opened its doors to the public in 1969 and is still a favorite destination for children and adults. Be sure to visit the New England Aquarium's newest addition, the Marine Mammal Center on the HarborWalk.. The new \$10 million facility is home to five fur seals. There are only 15 fur seals, including those at the New England Aquarium , in captivity in the world today. Visitors can see and hear the seals and seating is available during four seal shows daily. In the evening, the LED strips make for an interesting walk along the Aquarium's newest HarborWalk segment.

Proprietary Fund Financial Statements

Christopher Columbus Park

Christopher Columbus Park, one of the City of Boston's first waterfront parks, was opened for Boston's Bicentennial in 1976. Its original design provided a framework for future waterfront park projects throughout the city.

In 1987 a rose garden enclosed by a wrought iron fence and a granite fountain were added to the city-owned park to honor Rose Fitzgerald Kennedy, who was born nearby at 4 Garden Court in Boston's North End. In 1992, the Beirut Memorial was built, commemorating nine marines from Massachusetts who were killed in a 1983 bombing. The memorial includes a circular granite-seating wall and brick detailing; if you stand in its center you can hear your echo.

Christopher Columbus Park was updated in 2003 and today includes broad lawns, a play lot, a spray fountain and performance area, a statue of Christopher Columbus, and a wisteria covered trellis that provides shade during the day and is lit during the holiday season by the Friends of Christopher Columbus Park.

Financial Statements

Burroughs Wharf

Burroughs Wharf is home to Boston's Fire Marine unit. The larger of the two vessels is the 76-foot fire pump boat built in 1972. The other vessel, built in 1992, is a 30-ft high-speed pump boat. Visitors are welcome to view the vessels and the equipment to repair boats, view the equipment in the fire station, or ask questions of the marine firefighters. Behind the fire station are restrooms open to the public. Other amenities at Burroughs Wharf include an outdoor fountain surrounded by landscaped gardens, a promenade, benches, lighting, shelter, signage, public landing area, marina slips, and a water taxi stop. This condominium complex has one of the most pedestrian-friendly walkways on the Boston waterfront. The HarborWalk that wraps around the two luxury condominium buildings boasts incredible views of the USS Constitution and Bunker Hill Monument in Charlestown and the Harbor and is a wonderful location to watch boats plying the waters in the Harbor.

East Boston Greenway

This linear park, developed thanks to the advocacy efforts of Boston Natural Areas Network and local residents, connects East Boston's waterfront to the rest of East Boston and is ideal for both walking and biking. The park is completed from the East Boston pier to Neptune Road, and plans for the extension of the Greenway through East Boston to Belle Isle Marsh, Constitution Beach, and Wood Island Bay Marsh are underway. Throughout the Greenway, historic murals painted by students from the Youth Conservation Corps, and Zumix bring life to the Porter, Sumner and Maverick underpasses. Volunteers planted 10,000 anonymously donated lilies with tulips and daffodils along the Greenway between Maverick and Sumner Streets, breathing color into to a unique urban green space.

At the Marginal and South Bremen Streets entrance, a 40-ton, blue caboose, donated to the Boston Parks and Recreation Department by Conrail, stands as a reminder of the Greenway's history as a railway corridor. With the completion of the Bremen Street Park in 2007, the East Boston Greenway extends 1.25 miles with a connection to the East Boston Memorial Park's playing fields. Another greenway segment was approved in November 2011 connecting Bremen Street Park across Massport property adjacent to the Wood Island Bay Marsh.

Created as part of the environmental mitigation for the Central Artery/Tunnel Project, the newly-constructed Bremen Street Park in the East Boston Greenway features playgrounds, a fountain and wading pool, large open lawns, and a community garden. A performance amphitheatre is included in the park's green space. There are benches and picnic tables along the paths, and a bocce court in the park.

Discretely Presented Component Unit Financial Statements

Constitution Beach

Constitution Beach is one of Boston's most family-friendly waterfront destinations. Thanks to the Department of Conservation and Recreation and TBHA's advocacy for the Back to the Beaches program, visitors can enjoy a new bathhouse, large playground, picnic area, tennis and handball courts, shade shelters, and foot showers. An award winning pedestrian overpass across the MBTA tracks connects the local community to the redesigned beach and park, and creates a welcoming gateway. Constitution Beach is also one of the City's best locations for swimming, with lifeguards on duty during the summer season.

Boston Children's Museum

The Boston Children's Museum is located on the Fort Point Channel on a wide section of HarborWalk that becomes a bustle of activity in the summertime. Visitors can bring their own lunch to enjoy at picnic tables next to the HarborWalk. The Museum sponsors free events on the HarborWalk, including mural painting, summertime music and dance series, and movies at the Milk Bottle. A new boat dock will open in 2012 for water taxi service.

Federal Reserve Bank

Within a year of the enactment of the Federal Reserve Act on December 23, 1913, the twelve Federal Reserve Banks were open nationwide, including Boston, and they comprise our nation's central bank. In 1977, the Federal Reserve Bank of Boston moved to its current location overlooking the Fort Point Channel, and today helps to maintain the Harbor Walk across from its building on Dorchester Avenue.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the Commonwealth of Massachusetts (Commonwealth) have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The Governmental Accounting Standards Board (GASB) is the recognized standard-setting body for establishing governmental accounting and financial reporting principles. The significant Commonwealth accounting policies are described below.

A. Financial Reporting Entity – Basis of Presentation

The Commonwealth is comprised of three branches: the Executive Branch, with the Governor as the chief executive officer; the Legislative Branch, consisting of a Senate of 40 members and a House of Representatives of 160 members; and the Judicial Branch, made up of the Supreme Judicial Court, the Appeals Court and the Trial Court. In addition, the Legislature has established 57 independent authorities and agencies. Below the level of state government are 351 cities and towns exercising the functions of local governments. The cities and towns of the Commonwealth are also organized into 14 counties, but 7 of those county governments have been abolished in recent years.

For financial reporting purposes, the Commonwealth has included all funds, organizations, agencies, boards, commissions and institutions. The Commonwealth has also considered all potential component units for which it is financially accountable, as well as other organizations for which the nature and significance of their relationship with the Commonwealth is such that exclusion would cause the Commonwealth's financial statements to be misleading or incomplete. As required by GAAP, these financial statements present the Commonwealth of Massachusetts (the primary government) and its component units. The Commonwealth has included 16 entities as component units in the reporting entity because of the significance of their operational and/or financial relationships with the Commonwealth. Further descriptions of component units are found in note 13 to the basic financial statements.

Blended Component Units – Blended component units are entities that are legally separate from the Commonwealth, but are so related to the Commonwealth, that they are, in substance, the same as the Commonwealth or entities providing services entirely or almost entirely to the Commonwealth. The net assets and results of operations of the Massachusetts School Building Authority (MSBA), the Pension Reserves Investment Trust Fund (PRIT) and the Massachusetts Municipal Depository Trust (MMDT) are presented as a major governmental fund in the case of MSBA and as external investment trusts within the fiduciary type in the case of PRIT and MMDT.

Entities Audited Separately from the Commonwealth but are not legally separate from the Commonwealth – these entities include the Massachusetts State Lottery Commission, which is a division of the Office of the State Treasurer and Receiver-General, the Investment Accounts Managed by the Health Care Security Trust Board (the Board) – which includes a non-major governmental fund (the Health Care Security Trust Fund) and a fiduciary fund (the State Retiree Benefits Trust Fund). Hereafter, HST refers to investments managed by the Board.

The institutions of higher education of the Commonwealth are also not legally separate from the Commonwealth and have operations and net assets that are presented as part of the Commonwealth's business-type activities. These

include the University of Massachusetts System (including component units) and the State University and Community College System of 9 state and 15 community colleges as well as the Massachusetts State College Building Authority, which is a blended component unit of the state university system. The various community and state universities also have foundations and ancillary entities that are discretely presented component units of those entities.

Other Discretely Presented Component Units that are Separately Audited - Three major component units, the Massachusetts Department of Transportation (MassDOT), the Commonwealth Health Insurance Connector, and the Massachusetts Water Pollution Abatement Trust (MWPAT) are presented in the basic financial statements. There are eleven non-major component units.

The Massachusetts Department of Transportation

The Commonwealth made a significant structural change to the government operations in FY10. Understanding the financial impact of this change is integral to understanding the Commonwealth financial statements.

On June 25, 2009, the Commonwealth enacted legislation effective on November 1, 2009, implementing sweeping transportation reform and creating a new entity, the Massachusetts Department of Transportation (MassDOT). A new budgeted fund, the Commonwealth Transportation Fund, assumed most of the operations of the Highway Fund in FY10. The reform was implemented merging four state agencies: the Highway Department, Registry of Motor Vehicles, Massachusetts Aeronautics Commission and the Executive Office of Transportation and Public Works into the MassDOT.

MassDOT also absorbed the former Massachusetts Turnpike Authority, the bridges and certain roads and parkways of the Department of Conservation and Recreation, as well as the Tobin Memorial Bridge operations of the Massachusetts Port Authority. The Massachusetts Bay Transportation Authority, as well as the Regional Transit Authorities, are now component units of MassDOT. The make up of the MassDOT Board and the Massachusetts Bay Transportation Authority are now identical, with the Secretary of Transportation chairing both Boards.

MassDOT has attributes of a state department as well as an authority. It operates like a state department for purposes of state finance laws and is reported as part of the Commonwealth for compliance with federal and state tax law as well as the Single State Audit. In this unique relationship all road and bridge assets of the Commonwealth and the Turnpike Authority have been transferred to MassDOT, while the Commonwealth will continue to hold current and future debt for the construction repair, improvement and replacement of these assets. The Commonwealth also retains the liabilities for pension and other post-employment benefits (OPEB) costs for the former Commonwealth employees transferred to this entity and has assumed these liabilities for the 1,200 employees and 700 retirees of the former Turnpike Authority. MassDOT is assessed a fringe benefit rate on their current employee base to share in these pension and OPEB costs as well as to reimburse the Commonwealth for their employee health care costs, which are paid from the Commonwealth's General Fund. MassDOT's capital authorizations are authorized by the legislature and controlled by the Executive Office of Administration and Finance like other state departments. Toll revenues are retained and expended by MassDOT. All non-toll revenues (primarily Registry fees and federal reimbursements) are

State Agencies and Authorities merged into Mass DOT

Commonwealth Departments and Agencies	Former Major Discrete Component Units	Former Non-major Discrete Component Units
• Massachusetts Highway Department	• Massachusetts Turnpike Authority (MTA)	• Regional Transit Authorities (15 entities)
• Massachusetts Aeronautics Commission	• Massachusetts Bay Transportation Authority (MBTA)	• Route 3 North Transportation Improvement Association (R3N)
• Registry of Motor Vehicles		
• Executive Office of Transportation and Public Works		

deposited with the Commonwealth and used to finance MassDOT operating appropriations and infrastructure improvements. The result of this unique structure is that the Commonwealth retains significant liabilities for resources dedicated to the construction of assets controlled and managed by MassDOT.

Details on these component units are presented in Note 13 to the Basic Financial Statements.

Related Organizations

The following are “related organizations” under GASB Statement No. 14, *The Financial Reporting Entity*, as amended by Statement 39: Massachusetts Port Authority, Massachusetts Housing Finance Agency, Massachusetts Health and Educational Facilities Authority and Massachusetts Technology Development Corporation. The Commonwealth is responsible for appointing a voting majority of the members of each entity’s board, but the Commonwealth’s accountability does not extend beyond the appointments. These entities do not meet the criteria for inclusion as component units of the Commonwealth and therefore are not part of these financial statements.

Availability of Financial Statements

The separately audited financial statements of the Commonwealth’s component units and funds may be obtained by directly contacting the various entities. Contact the Office of the Comptroller, Financial Reporting and Analysis Bureau, at (617) 973-2660 for the contact information.

B. Government – wide and Fund Financial Statements

The Statement of Net Assets and the Statement of Activities report information on all non-fiduciary activities of the primary government and its component units. Primary government activities are defined as either governmental or business-type activities. Governmental activities generally are financed through taxes, intergovernmental revenues and other non-exchange revenues. Business-type activities are financed in whole or in part by fees charged to external parties for goods and services.

C. Measurement Focus and Basis of Accounting

Government-Wide Financial Statements

The **Statement of Net Assets** presents all of the reporting entity’s non-fiduciary assets and liabilities, with the difference reported as net assets. Net assets are reported in three categories:

- **Invested in capital assets, net of related debt** consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds, notes and other debt that are attributed to the acquisition, construction or improvement of those assets.
- **Restricted net assets** result when constraints placed on net asset use are either externally imposed by creditors, grantors, contributors, and the like, or imposed by law through enabling legislation.
- **Unrestricted net assets** consist of net assets which do not meet the definition of the two preceding categories.

Restricted net assets are used prior to unrestricted net assets.

The **Statement of Activities** demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable within a specific function. Program revenues include charges to customers or applicants who purchase, use,

or directly benefit from goods, services, or privileges that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not meeting the definition of program revenues are instead reported as general revenue and offset or supplant the net operating deficit or surplus from governmental or business-type operations.

Fund Financial Statements

The fund financial statements present a balance sheet and a statement of revenues, expenditures and changes in fund balances for its major and aggregated non-major funds.

Separate financial statements are provided for governmental funds, proprietary funds and fiduciary funds. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements pursuant to GASB reporting standards, with non-major funds being combined into a single column.

The Commonwealth reports its financial position and results of operations in funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues and expenditures/expenses. Transactions between funds within a fund type, if any, have not been eliminated.

Governmental Activities – Government-wide financial statements are reported using the economic resources management focus and the full accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of cash flows. Grants and similar items are recognized as revenues as soon as all eligibility requirements have been met.

Governmental Funds – Fund financial statements account for the general governmental activities of the Commonwealth. Governmental fund statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as they become susceptible to accrual and are both measurable and available. Revenues are considered to be available when they are collected within the current period or soon enough thereafter to pay liabilities of the current period. Significant revenues susceptible to accrual include income, sales and use, corporation and other taxes, federal grants, federal reimbursements and other reimbursements for use of materials and services are recognized in the year the materials are received, the grants are expended or services are provided. The measurement period for accrual for taxes earned is generally one year for income, corporate and other taxes and within thirty days for sales and use taxes. For federal and other reimbursements, the measurement period for accrual is generally sixty days if the related expenditures being reimbursed occurred prior to year end. Expenditures are recorded in the period in which the related fund liability is incurred. Principal and interest on general long-term obligations are recorded as fund liabilities when due. Compensated absences, claims and judgments, termination benefits and similar activities are recognized to the extent that they are normally expected to be liquidated with expendable available financial resources. Amounts incurred but not reported for Medicaid are reported to the extent that services are rendered before June 30th.

Business – Type Activities – Government-Wide financial statements account for activities for which a fee is charged to external users for goods or services. In these services, debt may be issued backed solely by these fees and charges.

There may be also a legal requirement or a policy decision to recover costs. As such, these funds account for operations similarly to a for-profit business. The Commonwealth's institutions of higher education's operations are reported as systems within the proprietary funds. Proprietary fund types are described in more detail below.

Proprietary and Fiduciary Funds – Fund financial statements are presented on the same basis of accounting as the business-type activities in the government-wide financial statements. Post-employment benefits and refunds are recognized when due and payable.

The Commonwealth reports the following fund types:

Governmental Fund Types:

General Fund, a governmental fund, is the primary operating fund of the Commonwealth. It is used to account for all governmental transactions, except those required to be accounted for in another fund.

Special Revenue Funds account for specific revenue sources that have been aggregated according to Commonwealth general laws to support specific governmental activities.

Debt Service Fund accounts for the accumulation of resources for and the payment of debt.

Capital Projects Funds account for the acquisition or construction of major Commonwealth capital facilities financed primarily from bonds and federal reimbursements.

Permanent Funds account for resources that are legally restricted to the extent that earnings, but not principal may be used for the Commonwealth's programs. These are different than the private-purpose funds below as those benefit individuals, private organizations and other governments directly. At the beginning of FY11, the only permanent fund the Commonwealth has is the Massachusetts School Fund, established in 1834 as a fund "for the aid and encouragement of common schools." The fund was originally capitalized from the proceeds of the 1820's sale of the public lands upon which the State of Maine was created. As authorized by legislation that was part of the FY11 budget, the Massachusetts School fund was eliminated during FY11 and the balance in the fund was transferred to the General Fund. Therefore, as of June 30, 2011, the Commonwealth had no permanent funds.

Fund Balances:

In FY11, the Commonwealth implemented Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. Within the governmental funds only, fund balance has been reorganized to include identifications of amounts that are considered nonspendable, restricted, committed, assigned, and unassigned, as follows:

Nonspendable fund balances are those that cannot be spent because they are either: (a) not in spendable form; or (b) legally or contractually required to be maintained intact, such as balances in the form of inventories, permanent funds,

and notes receivable. For the Commonwealth, the only nonspendable balances are notes receivable in the minor governmental funds.

Restricted fund balances are those where constraints on their use are: a) externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments; or b) imposed by law through constitutional provisions or enabling legislation that can only be spent on specific purposes stipulated by the state constitution, external resource providers or through enabling statute, and include a legally enforceable requirement that those resources be used only for the specific purposes stipulated. Legal enforceability means that a government can be compelled by an external party—such as citizens, public interest groups, or the judiciary—to use resources created by enabling legislation only for the stipulated purposes.

Committed balances are those that can be used only for specific purposes pursuant to constraints imposed by formal action of the government's highest level of decision-making authority, which in the case of the Commonwealth is the Legislature and Governor. Committed amounts cannot be used for other than the specified purposes unless the Governor and Legislature remove or change the specified use through legislation. The authorization specifying the purposes for which amounts can be used must have the consent of both the legislative and executive branches of the government prior to the end of the reporting period.

Assigned balances are amounts that are constrained by the government's intent to be used for specific purposes, but are neither restricted nor committed. Intent should be expressed by: (a) the governing body itself; or (b) a body (a budget or finance committee, for example) or official to which the governing body has delegated the authority to assign amounts to be used for specific purposes. In distinction to restricted and committed balances, the authority for making an assignment is not required to be the government's highest level of decision-making authority, i.e., the Legislature and Governor, and, the action to assign fund balance can occur after the end of the year. Furthermore, the nature of the actions necessary to remove or modify an assignment is not as prescriptive as it is with committed fund balances—constraints imposed on the use of assigned amounts are more easily removed or modified than those imposed on amounts that are classified as committed. Per GASB 54, assigned balances include those funds remaining at the end of the fiscal year that are reappropriated for the following fiscal year.

Unassigned fund balance is the residual classification for the General Fund. This classification represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes in the General Fund. The General Fund is the only fund that reports a positive unassigned fund balance amount. In addition, negative balances in other governmental funds are classified as unassigned.

While the Commonwealth has not announced a formal policy governing the priority of spending fund balances, in conformance with GASB 54 requirements, when an expenditure/expense is incurred for purposes for which both restricted and unrestricted resources are available, restricted resources are spent first, followed by committed resources, assigned resources and unassigned resources.

Stabilization Fund Arrangements:

In accordance with Section 2H of Chapter 29 of the Massachusetts General Laws, the Commonwealth maintains a Stabilization (“Rainy Day”) Fund. Per Chapter 29, balances in the Stabilization Fund can be expended only when non-routine budget shortfalls occur and upon appropriation by the Legislature and approval by the Governor. Chapter 29 requires that after calculating the Commonwealth’s “consolidated net surplus” (the sum of the “undesignated” balances in the state’s budgeted funds, equal to balances that are not restricted nor reappropriated for the following fiscal year) $\frac{1}{2}$ of 1% of the amount of tax revenues in that fiscal year be carried forward and be available for appropriations in the following fiscal year, $\frac{1}{2}$ of 1% of tax revenues be transferred to the Stabilization Fund, and any remaining surplus be transferred to the Stabilization Fund. In addition, withholding taxes on certain Lottery winnings are required to be transferred to the Stabilization Fund. Starting in FY10, statute requires the Comptroller, after certification by the Commissioner of Revenue, to transfer any capital gains tax revenues in excess of \$1 billion during a fiscal year to the Stabilization Fund. Beginning in FY12, statute requires the Comptroller, after certification by the Commissioner of Revenue and the Attorney General, to transfer to the Stabilization Fund all revenue from individual settlements and judgments that exceed \$10 million.

Historically, balances in the Stabilization Fund have been used almost exclusively during recessionary periods to offset budget shortfalls after other budgetary measures have been taken. Per Chapter 29, the Commonwealth is required to maintain a balanced budget, and if a revenue shortfall is projected, the Secretary of Administration and Finance is required to reduce state agencies’ spending authorizations in an amount equal to any projected shortfall.

The Stabilization Fund ended FY11 with a balance of \$1.379 billion. For the fiscal year ending June 30, 2011, the Stabilization Fund’s balance increased by \$709 million as a result of almost \$699 million in surplus transfers, \$9 million of investment earnings and almost \$2 million in statutorily mandated transfers of withholding taxes on certain Lottery proceeds. In accordance with GASB 54 requirements, balances in the Stabilization Fund are classified as committed.

Detail of FY11 ending fund balances is shown in the table below.

Proprietary Fund Types:

Business-Type Activities account for programs financed in whole or in part by fees charged to external parties for goods and services. Major Proprietary Funds are the Unemployment Compensation Fund, the University of Massachusetts, State Universities and Community Colleges.

Fiduciary Fund Types:

Post-Employment Benefit Trust Funds report resources that are required to be held in trust for the members and beneficiaries of the Commonwealth's post-employment benefit plans. These funds recognize employer and participant contributions in the period when contributions are due, and the Commonwealth has made a formal commitment to provide the contributions via an appropriation. Further information on the significant accounting policies for

post-employment benefit trust funds may be found in note 9 to the basic financial statements.

External Investment Trust Funds account for the portion of pooled cash and pension assets held under the custodianship of the Commonwealth for the benefit of cities, towns and other political subdivisions of the Commonwealth.

Private Purpose Funds account for various gifts and bequests held by the Commonwealth of which only the income is expendable for purposes specified by the donor. The majority of the individual accounts are for perpetual cemetery care endowments on behalf of deceased individuals.

Agency Funds account for assets the Commonwealth holds on behalf of others. Agency Funds are custodial in nature and do not involve measurement of operations.

Within the governmental fund types, the Commonwealth has established the following major funds, in addition to the General Fund:

Commonwealth Transportation Fund (CTF), accounts for certain revenues including motor fuels taxes as well as fees, assessments and charges collected for the MassDOT and payments for debt service and program expenses of the department.

Lottery Funds, governmental funds, account for the operations of the State and Arts Lotteries, which primarily finance payments for local aid.

The Massachusetts School Building Authority is presented as a governmental fund. This is comprised of the activity of the blended component unit, the Massachusetts School Building Authority, accounting for grants to cities, towns and regional school districts for school construction and renovation projects.

Federal Grants Fund, accounts for grants and federal reimbursement programs.

Highway Capital Projects Fund is presented to account for proceeds of bonds sold to finance the construction of state highways and to fund the Commonwealth's share of federally sponsored highway construction.

The proprietary funds include the following:

Unemployment Compensation Fund reports the taxes collected from employers and held by the United States Treasury in the Federal Unemployment Trust Fund, from which funds are drawn for the payment of benefits to the unemployed.

College and University Information, is presented here, aggregated by the University's activity, the State Universities' activity and the Community Colleges' activity.

Fund Balances

The Commonwealth does not have a formally adopted minimum fund balance policy. However, most governmental funds cannot end a fiscal year in deficit. Those that are authorized are discussed in note 8 to the basic financial statements, "Individual Fund Deficits."

Reporting Standards

As allowed by GASB statement No. 20, *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that Use Proprietary Fund Accounting*, the Commonwealth's proprietary funds follow all GASB pronouncements and those Financial Accounting Standards Board Statements and Interpretations, Accounting Principles Board Opinions, and Accounting Research Bulletins that were issued on or before November 30, 1989, except those that conflict with a GASB pronouncement.

Fiscal Year-End

All funds and discretely presented component units are reported using fiscal years, which end on June 30.

Program Revenue

Program revenue is defined by the Commonwealth to be the revenue from fees and assessments collected by departments that are directly applicable to that department's operations.

Operating and non-operating revenues and expenses

Revenues and expenses of business-type activities and proprietary funds are classified as operating or non-operating and are subclassified by object. Operating revenues and expenses generally result from providing services and producing and delivering goods. All other revenues and expenses are reported as non-operating.

D. Cash and Short-Term Investments

The Commonwealth follows the practice of pooling cash and cash equivalents. Cash equivalents consist of short-term investments with an original maturity of three months or less and are stated at cost. Interest earned on pooled cash is allocated to the General Fund and, when so directed by law, to certain other Governmental Funds.

The Office of the Treasurer and Receiver-General (Treasury) manages the Commonwealth's short-term external mixed investment pool, the Massachusetts Municipal Depository Trust (MMDT). MMDT is comprised of two portfolios, a Cash portfolio and a Short Term Bond Fund. Investors in MMDT are not allowed to overdraw their shares. For a complete copy of MMDT's separately issued financial statements, please feel free to contact the Trust's investment adviser at 800-392-6095, or the Office of the State Treasurer's Cash Management Department, at 617-367-9333.

Statutes authorize investment in 2A-7 eligible obligations of the U.S. Treasury, authorized bonds of all states, bankers' acceptances, certificates of deposit, commercial paper rated within the three highest classifications established by Standard & Poor's Corporation and Moody's Commercial Paper Record and repurchase agreements that any of these obligations secure. Cash portfolio investments are carried at amortized cost, which approximates fair value.

Portions of the post-employment benefit trust funds invest in the Pension Reserves Investment Trust (PRIT) Fund, an external investment pool managed by the Pension Reserves Investment Management (PRIM) Board. The State Employees' and Teachers' Public Employee Retirement Systems (PERS) are required to invest in the PRIT Fund and comprise approximately 39.9% and

43.50%, respectively, of the net assets of the PRIT Fund. For a complete copy of PRIT's separately issued financial statements, contact the PRIM Board at 84 State Street, Boston, MA 02109.

The Commonwealth's investments, including those of the PRIT Fund, are comprised of investments in marketable securities - primarily domestic and international equities and fixed income securities - as well as non-marketable securities - primarily real estate, venture capital and private equity limited partnerships, hedge fund of funds and other alternative investments. Marketable securities, including the Short-Term Bond Fund component of MMDT, are reported at fair value based upon quoted market prices. Non-marketable securities are reported at estimated fair values as determined by management with input from the PRIM Board and its investment managers. Non-marketable securities comprise approximately 28.4%, 28.4% and 23.4% of the total assets of the State Employees' PERS, Teachers' PERS and the HST, respectively.

The investments of the PRIT are held separately from those of other Commonwealth funds, with the exception of their investments in the MMDT. Security transactions are recorded on the trade date the securities are purchased or sold. The cost of a security is the purchase price or, in the case of assets transferred to PRIT by a Participating or Purchasing System, the fair value of the securities on the transfer date.

MMDT's cash portfolio investments are carried at amortized cost, which approximates fair value. The primary government's and component unit's shares are reported as short-term investments within their respective reporting categories.

Investments of the University of Massachusetts (UMass) are stated at fair value. Annuity contracts represent guaranteed investment contracts and are carried at present value.

In general, tax revenue is recognized on the government-wide statements when assessed or levied and on the governmental financial statements to the extent that it is both measurable and available, based upon collection experience. If revenue is not received by year-end, receivables are declared. Receivables are stated net of estimated allowances for uncollectible accounts.

Reimbursements due to the Commonwealth for its expenditures on federally funded reimbursement and grant programs are reported as "Federal grants and reimbursements" or "Due from federal government" in the statement of net assets.

"Other Receivables" represent amounts due to Commonwealth including Lottery revenues and Higher Education receivables from students, amounts due to the University of Massachusetts from related organizations and other items.

Included in receivables for FY11 are amounts due to the Commonwealth under provisions of the Master Settlement Agreement between five tobacco companies and 46 states, including the Commonwealth. Pursuant to provisions of GASB Technical Bulletin No. 2004-1 "Tobacco Settlement Recognition and Financial Reporting Entity Issues", a receivable has been declared for \$138 million, representing 50% of the amounts estimated to be received in FY11, adjusted for historical trends and included as part of other non-major governmental fund activity.

E. Receivables

F. Due From Cities and Towns

“Due from Cities and Towns” represents reimbursements due to the Commonwealth for its expenditures on certain programs for the benefit of cities and towns.

The MSBA has entered into various loan agreements with municipalities at a 2% interest rate to be received in equal installments through 2033. This program is designed to assist school districts with unanticipated inflationary construction costs over the district’s original amount budgeted for a project. The loans outstanding as of June 30, 2011 were \$121.2 million, of which \$5.9 million is due in FY12. During FY11, the MSBA executed \$36.0 million of new loans and collected \$6.0 million of scheduled principal payments.

G. Capital Assets

Capital assets, which include property, plant, equipment and infrastructure (e.g. roads, bridges, ramps and other similar items), are reported in the applicable governmental or business-type activity columns of the government-wide financial statements.

Methods used to value capital assets

Capital assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at fair market value at the date of donation.

Capitalization policies

All land, non-depreciable land improvements and donated historical treasures or works of art are capitalized. Single pieces of equipment, vehicles, computer equipment and software that equal or exceed \$50,000 (\$1,000 for the University of Massachusetts) are capitalized. Buildings and infrastructure projects with a cost that equals or exceeds \$100,000 are capitalized. The costs of normal maintenance and repairs that do not add to the value of assets or materially extend asset lives are not capitalized.

Depreciation and useful lives

Applicable capital assets are depreciated using the straight-line method. Unless unallocable, depreciation expense is charged to the function of the capital asset being depreciated. Estimated useful lives are as follows:

<i>Type of Asset</i>	<i>Estimated Useful Life (in years)</i>
Buildings	40
Infrastructure - roads, bridges and tunnels	40
Infrastructure - beaches, boardwalks, bikeways, etc.	25
Infrastructure - dams, water and sewer systems	50
Furniture	10
Library collections that are not historical treasures	15
Equipment, office equipment and life safety equipment	10
Computer hardware and software	3 to 7
Vehicles	5

Road and Bridge Assets

Effective November 1, 2009 all road and bridge assets formerly owned by the Commonwealth are owned by MassDOT. The debt incurred for the construction of these assets remains a liability of the Commonwealth.

Construction in process

Construction in process includes all associated cumulative costs of a constructed capital asset. Construction in process is relieved at the point at which an asset is placed in service for its intended use.

Capital assets of the Component Units are capitalized upon purchase and depreciated on a straight-line basis over the estimated useful lives of the assets.

H. Interfund / Intrafund Transactions

As a general rule, the effect of interfund activity has been eliminated in the government-wide statements. Exceptions to this rule are: 1) activities between funds reported as governmental activities and funds reported as business-type activities and 2) activities between funds that are reported in different functional categories in either the governmental or business-type activities column. Elimination of these activities would distort the direct costs and program revenues for the functions concerned. Interfund receivables and payables have been eliminated from the Statement of Net Assets, except for the residual amounts due between governmental and business-type activities.

I. Statewide Cost Allocation Plan – Fringe Benefit Cost Recovery

The Commonwealth has elected not to present its cost allocation and recovery separately on the statement of activities. Certain costs of nine “central service” agencies of the Commonwealth are recovered from the remaining agencies in a federally approved statewide cost allocation plan. These costs that are allocated are based upon benefits received by the user agency that benefit from these services. The Commonwealth also appropriates and pays the fringe benefit costs of its employees and retirees, as well as MassDOT employees and retirees, through the General Fund. These fringe benefits include the costs of employees’ group health insurance, pensions, unemployment compensation and other costs necessary to support the workforce. As directed by Massachusetts General Laws, these costs are assessed to other funds based on payroll costs, net of credits for direct payments. Since fringe benefit costs are not separately appropriated or otherwise provided for in these funds, the required assessment creates an unfavorable budget variance in the budgeted funds. The employees’ group health insurance and workers’ compensation activity is accounted for in the governmental funds.

J. School Construction Grants, Contract Assistance and other Payables

The Commonwealth, through the MSBA, reimbursed cities, towns and regional school districts for 50% to 90% of approved eligible construction and borrowing costs for school construction and renovation. Under the former building assistance program (prior to the creation of the MSBA) the Commonwealth also continues to reimburse municipalities and regional school districts for 728 previously approved projects noted by MSBA as prior grant projects. The MSBA has assumed responsibility for these projects under its enabling statute. The liability for these projects will be reduced over time through annual payments, savings from project audits made by the MSBA and savings from refundings. In addition, the MSBA funds projects on a waiting list either via a lump sum or through progress payments. Each funding method has different eligibility requirements. Lump sum payment projects have a liability that is recognized once construction has started. For progress payment projects, a

liability is generally recognized once a grantee requests reimbursement from the MSBA. Projects not recognized are noted as commitments by the MSBA. The MSBA is committed to paying for its share of projects on the waiting list once communities meet all eligibility requirements for receiving grants. The amount of commitments outstanding for the waiting list projects is \$305.4 million and is anticipated to be funded under the progress payment method. New programs have been established by the MSBA under which communities submit monthly requests for reimbursement. As of June 30, 2011, MSBA had \$86.7 million commitments outstanding for the new program projects. The Commonwealth appropriates funds to support these commitments on an annual basis.

The Commonwealth recognizes contract assistance on an annual basis due to the Massachusetts Water Pollution Abatement Trust (MWPAT). This assistance is applied as a subsidy to repayments from MWPAT loan borrowers. The expectation is that the assistance will be available for the life of the MWPAT financing agreement. The assistance is drawn from the Commonwealth on a 20-year repayment stream, even if the loan is for a longer period. If there is a differential between the assistance received and the amounts needed for loan subsidies, that amount is invested by MWPAT in an annuitized fashion to be used beyond year 20. If assistance is not provided by the Commonwealth, the MWPAT borrower is obligated for any shortfall.

Accounts payable includes amounts due to vendors of the Commonwealth for goods and services delivered before June 30th but paid for after year-end.

K. Compensated Absences

Compensated absences are recorded as a long-term liability in the statement of net assets. For the governmental fund statements, accumulated vacation and sick leave are reported as expenditures and fund liabilities when incurred upon retirement, termination or death. Sick and vacation payments to terminated employees as of June 30, 2011 but paid after the fiscal year end are also reported in the funds.

Employees are granted vacation and sick leave in varying amounts based on collective bargaining agreements and state laws. Upon retirement, termination or death, certain employees are compensated for unused vacation and sick leave (subject to certain limitations) at their current rate of pay.

Compensated absences in the governmental funds are liquidated from the same sources that fund the personnel expenses of the employees who are compensated for unused vacation and sick leave pay. In most cases, this is the General Fund, but also includes non-General Fund sources to the extent that personnel expenses are charged to those funding sources.

In the business-type activity and the discretely presented component units, employees' accumulated vacation and sick leave are recorded as an expense and liability as the benefits accrue.

L. Dedicated Revenues and Pledges

The Commonwealth has a number of pledges of revenue streams for its own bonds and various other bond issues of other authorities. Commonwealth debt supported by dedicated revenue streams include special obligation bonds for road and bridge construction secured by motor fuels taxes and federal grant anticipation notes (GANS) secured by federal grants for highway construction. Detailed information on pledges for the Commonwealth's own debt is included in sections B and C of note 7.

Portions of Commonwealth sales taxes are pledged as security for bonds issued by the Massachusetts Bay Transportation Authority (MBTA) and the Massachusetts School Building Authority (MSBA). The MBTA receives sales tax revenues equal to 1% of applicable sales, subject to an annual floor set in statute. In FY11, total dedicated sales tax revenue that was directed to the MBTA was approximately \$767 million, \$112 million more than would have been the case were the dedicated revenue equal to 1% of applicable sales. As a result, in FY11 the MBTA received from the Commonwealth sales tax revenues equal to 1.17% of applicable sales, and is expected to receive approximately this percentage of applicable sales for the foreseeable future. Dedicated revenues to the MBTA increase by the greater of the annual rise in the Boston consumer price index or annual sales taxes, with a floor of 0% and a ceiling of 3%.

The MSBA also receives a pledge of sales tax that, starting in FY11, increased to 1% of applicable sales in the Commonwealth but with no annual floor or ceiling. In FY11, approximately \$657 million of the dedicated sales tax revenue stream was directed to the MSBA.

The Commonwealth has also pledged sales tax revenue and rooms tax surcharges from areas contiguous to convention centers and the Worcester DCU Arena and Convention Center to support such centers' operations. As of June 30, 2011, taxes within the Convention Center districts support approximately \$639 million of outstanding principal and approximately \$526 million of interest on debts related to these Convention Centers. Taxes collected in FY11 were approximately \$86.0 million, while debt service on the bonds was approximately \$35.4 million.

Finally, as part of the Transportation Modernization Act of 2009, as amended, a further pledge of sales taxes was made. Beginning in FY11, 0.385% of applicable sales and uses on a total tangible property tax rate of 6.25% is dedicated to funding the operations of MassDOT through the Commonwealth Transportation Fund. The Act has a floor amount of \$275 million, with a final transfer occurring on or before September 1st of the following fiscal year. In FY11, approximately \$302 million in sales tax revenue was transferred to MassDOT, \$27 million more than the \$275 million minimum. From the Commonwealth Transportation Fund, \$160 million was dedicated to funding the operations of the MBTA while an additional \$15 million was dedicated to funding the operations of the regional transit authorities.

M. Lottery Revenue and Prizes

Ticket revenues and prizes awarded by the Massachusetts Lottery Commission are recognized as drawings are held. For certain prizes payable in installments, the Commonwealth purchases annuities and principal-only and interest-only treasury strips in the Commonwealth's name, which are recorded as annuity contracts and prizes payable in the agency fund and on the statement of net assets. Though the annuities are in the Commonwealth's name in the case of a default, they are solely for the benefit of the prizewinner. The Commonwealth retains the risk related to such annuities.

N. Risk Financing

The Commonwealth self-insures for employees' workers' compensation, casualty, theft, tort claims and other losses. Such losses, including estimates of amounts incurred but not reported, are included as accrued liabilities in the accompanying financial statements when the loss is incurred. For employees' workers' compensation, the Commonwealth assumes the full risk of claims filed under a program managed by the Human Resources Division. For personal injury or property damages, Massachusetts General Laws limit the risk assumed by the Commonwealth to \$100,000 per occurrence, in most circumstances. The Group Insurance Commission administers health care and other insurance for the Commonwealth's employees and retirees.

O. Net Assets

The Commonwealth reports net assets as restricted where legally segregated for a specific future use by enabling legislation in accordance with GASB Statement No. 46, "*Net Assets Restricted by Enabling Legislation*." Otherwise, these balances are considered unrestricted.

Net assets have been restricted as follows:

"Restricted for Capital Projects" – identifies funds that can only be used for capital projects under federal tax laws.

"Restricted for unemployment benefits" – identifies amounts solely for the payment of unemployment compensation under federal labor laws.

"Restricted for retirement of indebtedness" – identifies amounts held by fiscal agents to fund future debt service obligations pertaining to Special Obligation Revenue Bonds authorized under Section 2O of Chapter 29 of the Massachusetts General Laws and Chapter 33, Acts of 1991. It also includes amounts held for Grant Anticipation Notes authorized by Chapter 11 of the Acts of 1997 and Chapter 121 of the Acts of 1998. Escrows related to crossover refundings are also restricted. Because removal of monies from these restrictions will constitute a technical default to bondholders, the amounts are restricted

"Restricted for other purposes" – identifies amounts held for various externally imposed restrictions either by creditors, grantors or laws and regulations of other governments.

"Restricted for Nonexpendable purposes" – identifies amounts held as permanent investments for a specific purpose.

As of June 30, 2011, the government-wide statement of net assets reports the following as restricted net assets (amounts in thousands):

Restricted for:	Governmental Activities	Business Type Activities	Government Wide Total
Unemployment benefits.....	\$ -	\$ 634,228	\$ 634,228
Retirement of indebtedness.....	1,226,495	-	1,226,495
Expendable Trusts.....	294,207	-	294,207
Restricted for other purposes including:			
Higher education endowment funds.....	-	327,133	327,133
Higher education academic support and programs.....	-	6,034	6,034
Higher education scholarships and fellowships:			
Nonexpendable.....	-	6,903	6,903
Expendable.....	-	23,652	23,652
Other nonexpendable purposes.....	-	29,107	29,107
Capital projects - expendable	-	10,958	10,958
Other	-	326,631	326,631
Total restricted net assets.....	<u>\$ 1,520,702</u>	<u>\$ 1,364,646</u>	<u>\$ 2,885,348</u>

In the Pension Trust Fund and the External Investment Trust Fund net assets have been restricted for employees' pension benefits. This restriction identifies resources held in trust for the members and beneficiaries of the Commonwealth's pension plans. This category also includes the portion of pooled cash and pension assets held under custodianship of the Commonwealth for the benefit of cities, towns and other political subdivisions of the Commonwealth.

P. Reclassifications

Certain amounts in the separately issued component units' financial statements have been reclassified to conform to the accounting classifications used by the Commonwealth. Due to the provisions of GASB Statement No. 34 (GASB 34) *Basic Financial Statements – and Management's Discussion and Analysis – For State and Local Governments*, major governmental and proprietary funds presented in a previous year may not be presented as a major fund in the current year. These changes were made because of internal changes in accounting policies.

Q. Estimates

The preparation of the Comprehensive Annual Financial Report requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures at the date of the financial report.

Estimates also affect the reported amounts of revenues and expenditures during the reporting period. Actual results could differ from those estimates.

R. Restatements

Restatements include changes in the beginning balances of various state and community colleges for miscellaneous operations and purposes.

In addition, the beginning balances of certain pension and external investment trust funds have been restated to properly reflect the amount of funds not held by the primary government or its component units.

2. DEPOSITS, SHORT-TERM INVESTMENTS AND INVESTMENTS

Primary Government

The Commonwealth maintains cash in the MMDT Cash portfolio that is available for use by all funds. Each fund type's net equity in the Cash portfolio is displayed in the basic financial statements as "Cash and cash equivalents", and "short-term investments."

Pooled cash and short-term investments include the following (amounts in thousands):

	Governmental Activities	Business Type Activities	Government Wide Total
Cash and cash equivalents.....	\$ 5,283	\$ 530,907	\$ 536,190
Short-term investments.....	3,577,431	353,114	3,930,545
Cash with fiscal agent.....	445,459	-	445,459
Total.....	<u>\$ 4,028,173</u>	<u>\$ 884,021</u>	<u>\$ 4,912,194</u>

Lottery Annuity Contracts

The Massachusetts State Lottery Commission, a division of the Office of the State Treasurer and Receiver – General, purchases annuity contracts from insurance companies and United States treasury strips to fund the Commonwealth's liability for future installment prize obligations. These annuities and treasury strips represent an obligation of the insurance company and the custodial bank, respectively, to provide a fixed series of payments over a specified period. Only the annuity investments are subject to credit risk. For the annuity contracts, risk is controlled by purchasing these investments only from insurance companies with the top two ratings issued by a national recognized ratings organization. However, due to the nature of these annuity contracts, the credit quality of the insurance company issuer is subject to change. At June 30, 2011, the Commonwealth held these investments with a face value of approximately \$1.9 billion and with a carrying value of approximately \$1.4 billion. Over 86% of these amounts are held in United States treasury strips at a custodial bank. No insurance company has an amount of annuities over 3% of the overall portfolio.

MSBA Deposits and Investments

The MSBA is authorized to invest in obligations of the US Treasury, its agencies and instrumentalities, bonds or notes of public agencies or municipalities, bank time deposits, guaranteed investment contracts, money market accounts and repurchase agreements. These investments are recorded at fair value. The MSBA has an investment policy that establishes the minimum credit quality for certain instruments, outlines investment procedures and updates for periodic reporting. The MSBA investment policy does not specifically limit the amount the MSBA may invest in any one issuer.

As of June 30, 2010, the MSBA held the following deposits and investments which are a component of Governmental Activities above (amounts in thousands):

Cash and cash equivalents.....	\$ 383,914
Cash and cash equivalents held in pooled cash.....	56,214
Restricted investments.....	<u>596,606</u>
Total.....	<u>\$ 1,036,734</u>

Custodial Credit Risk – Pooled Cash

Custodial credit risk is the risk that in the event of a bank failure, deposits and investments may not be returned to the Commonwealth. Cash balances represent

amounts held in bank depository accounts that may be subject to custodial credit risk.

The Commonwealth requires all bank deposits in excess of insurance coverage by the Federal Deposit Insurance Corporation (FDIC) to be collateralized with a perfected pledge of eligible collateral. Eligible collateral must be pledged in an amount equal to 102% of the amount of the deposits that exceed FDIC insurance. Sufficient collateral to cover total Commonwealth deposits in excess of the FDIC insured amount must be pledged and held in safekeeping by a custodian that is approved by and under the control of the Treasurer and Receiver – General.

Membership by a financial institution in the Depositors Insurance Fund (DIF) or the Share Insurance Fund (SIF) will be accepted by the Treasurer and Receiver – General's Office as alternative security, provided that the financial institution submits proof of membership in the DIF or the SIF.

Custodial Credit Risk – HST

HST manages exposure to custodial credit risk by requiring all of its investment managers to hold investments in separate accounts with HST's custodian. As of June 30, 2011, HST held less than \$100,000 in cash that was exposed to this risk.

Custodial Credit Risk – Business-Type Activities

The Institutions of Higher Education and their blended component units have investment policies that may vary by institution and blended component unit for custodial credit risk. Each institution carries deposits that are fully insured by the FDIC, as well as uninsured deposits. As of June 30, 2011, the bank balances of uninsured deposits totaled approximately \$149.0 million.

Custodial Credit Risk – MSBA

The MSBA does not have a formal investment policy for custodial credit risk. The MSBA carries deposits that are fully insured by the Federal Deposit Insurance Corporation (FDIC) insurance, as well as uninsured deposits. As of June 30, 2011, all MSBA bank balances were fully protected against loss.

Interest Rate Risk – Non-Post Employment Benefit Trust Funds

Interest rate risk is the extent that changes in interest rates of debt investments will adversely affect the fair value of an investment. These investments include certain short-term cash equivalents, various long-term items and restricted assets by maturity in years. The Treasury Cash Portfolio minimizes the risk of the market value of securities falling due to changes in interest rates by maintaining a dollar-weighted average portfolio maturity of 60 days or less. The Cash Portfolio's assets are managed to maintain a dollar-weighted average life to maturity of 120 days or less.

As of June 30, 2011, the MMDT Cash Portfolio is considered a cash equivalent by the Commonwealth. During the fiscal year, the fund's dollar-weighted average maturity fluctuated from 31 to 58 days, with an average maturity of 48 days.

Massachusetts General Laws authorize investments in the MMDT Cash Portfolio to include money market funds operated in accordance with Section 270.2a-7 of Title 17 of the Code of Federal Regulations or in any other security that qualifies for inclusion in a fund operated in accordance with the same Section.

Investments in the MMDT are classified as cash and short-term investments above and include the Short Term Bond Fund (the Fund) authorized under General Laws Chapter 29, Section 38. Investments in the Fund are made in investment-grade securities as defined by national statistical rating agencies. The Commonwealth assesses risk for the Fund by using duration. Duration is the weighted maturity of the security's cash flows, where the present values of the cash flows serve as weights. General Law Chapter 29, Section 49 enumerates the Commonwealth's policy of investments included in the MMDT cash portfolio and other escrows.

The HST manages exposure to fair value loss arising from movements in interest rates with its fixed income investment securities by having the PRIM Board establish duration guidelines. The guidelines with each individual manager require that the effective duration of the HST's domestic fixed investment portfolio be within a specified percentage or number of years of the effective duration band of the appropriate benchmark index. As of June 30, 2011, HST had approximately \$64.1 million of debt investments at fair value, which had weighted durations of more than five years and the remaining investments had an effective weight duration from .47 to 9.37 years.

For the Short Term Bond Fund, the weighted average maturity during the fiscal year fluctuated from 3.1 to 3.6 years. As of June 30, 2011, investments in the MMDT Short Term Bond Fund had a fair value of \$288.2 million and investment maturities ranging from less than one year to more than ten years and with approximately 6% of the investment's fair values maturing in less than 1 year, approximately 81% from one to five years, approximately 4% from six to ten years and approximately 9% more than ten years.

Interest Rate Risk – Business - Type Activities

As of June 30, 2011, the Institutions of Higher Education and their blended component units had debt investments stated at fair value of approximately \$726 million and had investment maturities ranging from less than one year to more than ten years, with approximately 51% of the investment's fair values maturing in less than 1 year, approximately 20% from one to five years, approximately 15% from six to ten years, and approximately 14% more than ten years.

Interest Rate Risk - MSBA

The MSBA's investment policy does not specifically limit investment maturities as a means of managing its exposure to fair value losses arising from interest rates. As of June 30, 2011, the MSBA had approximately \$226.5 million invested in a guaranteed investment contract and approximately \$200.7 million invested in U.S. Treasury Bonds. These investments are recorded at fair value. The guaranteed investment contract matures on August 15, 2030 and the Treasury Bonds mature from 2019 to 2039.

Credit Risk –Primary Government

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The Commonwealth, exclusive of Pension Trust Funds, minimizes concentration of credit risk, the risk attributed to the magnitude of the investment in a single issuer. The Commonwealth's investment policy prohibits the Treasury from investing more than 5% of the total investment portfolio in any single financial institution or issuer, excluding various public entity securities and repurchase agreements. There are no restrictions on the amount that can be invested in public entity securities and the portfolio may be invested in U.S. Treasury and other Government Sponsored Enterprises (GSE's) obligations and repurchase agreements.

The Cash Portfolio's assets will be invested only in First Tier and Second Tier Securities as defined by rule 2A-7. The Treasury does not have any additional policies regarding credit ratings of investments. Credit ratings associated with the Commonwealth's investment in MMDT for the cash portfolio ranged from P1 to P2, with approximately 99% rated P1 and approximately 1% rated P2 at fair value.

For the Short Term Bond Fund, investments were approximately 10% at AAA, approximately 14% from A to AA, approximately 15% BBB or below or unrated and approximately 61% held in US Government or Government Agency Obligations. Debt obligations issued or guaranteed by the U. S. Government, U. S. Government Agencies, and U. S. Government – sponsored enterprises are deemed to carry a AAA rating.

For the Institutions of Higher Education and their blended component units presented in the Business-Type Activities, fair values of debt investments were approximately \$395 million at AAA, approximately \$100 million from A to AA and approximately \$231 million either unrated or BBB or less.

Credit Risk - MSBA

The MSBA's investments as of June 30, 2011 were not rated; however, the issuers were rated AA or equivalent.

Credit Risk – HST

For the HST, the weighted quality average rating of the debt securities portfolio, excluding pooled investments, investments explicitly backed by the United States Government and other nonrated investments was AA- at June 30, 2011. For the fixed income securities of \$64.1 million as of June 30, 2011 for the HST, approximately \$8.2 million was rated AAA, \$9.6 million rated AA+ to A-, \$14.2 million rated BBB+ to B- and \$23.5 million either unrated or CCC+ or less. An additional \$8.6 million was explicitly backed by the federal government and related AAA.

Foreign Currency Risk – HST

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of investments. HST manages exposure to foreign currencies by establishing investment guidelines with each of its international managers. These guidelines set maximum investment balances for any currency and/or country holdings that must be within a certain percentage of predefined benchmarks. HST's investments in foreign currencies and foreign investments

as of June 30, 2011 were approximately \$0.3 million in cash and investments, \$50.2 million in equities and \$3.4 million in fixed income investments. An additional \$10.3 million was invested in international investment denominated in U. S. dollars.

Interest Rate Risk – PRIT Funds

As pension trust funds have a longer investment horizon than many of the Commonwealth's other investments, the PRIM Board manages PRIT's exposure to fair value loss arising from movements in interest rates by establishing duration guidelines with its debt securities investment managers. The guidelines with each individual manager require that the duration of the domestic debt investment portfolio be within a specified percentage or number of years of the duration band of the appropriate benchmark index. For emerging markets fixed income investments, the portfolio must have a duration with a band ranging from three to eight years.

Effective duration is a measure of a fixed income investment's exposure to fair value changes arising from changes in interest rates. Effective duration makes assumptions regarding the most likely timing and amounts of variable cash flows. These assumptions take into consideration factors indicative of investments highly sensitive to interest rate changes, including callable options, prepayments and other factors.

The PRIM Board compares the effective duration of a manager's portfolio to the Barclays Capital Aggregate Index for domestic core "fixed income" securities and the Merrill Lynch® High Yield Master II Index for domestic high yield fixed income securities. The PRIT Fund had fixed income and short-term investments totaling approximately \$11.8 billion at fair value with an effective weighted average duration range from 0.08 to 9.69 years at June 30, 2011.

Credit Risk – PRIT Funds

The PRIM Board establishes credit investment guidelines with each of its fixed income securities investment managers in establishing a diversified portfolio. These guidelines vary depending on the manager's strategy and the role of its portfolio to the overall diversification of the PRIT fund. The guidelines for the PRIT Fund's core fixed income portfolio establish the minimum credit rating for any security in the portfolio and the overall weighted average credit rating of the portfolio. The guidelines for the PRIT Fund's high yield, fixed income portfolio establish a market value range of securities to be held with a specific minimum credit rating and the overall weighted average credit rating of the portfolio.

Credit risk for derivative instruments held by PRIT results from counterparty risk. PRIT is exposed to credit risk resulting from counterparties being unable to meet their obligations under the terms of the derivative agreements. The weighted average quality rating of the debt securities portfolio, excluding pooled investments, investments explicitly backed by the United States Government and other nonrated investments was AA- at June 30, 2011.

Credit ratings associated with the Commonwealth's investment in the PRIT Fund ranged from AAA to A- investments with a fair value of approximately \$4.0 billion, BBB+ to B- investments with a fair value of approximately \$1.5 billion, \$0.02 billion rated CCC+ to C-, \$3.5 billion are unrated and the remaining \$2.6 billion are investments that are explicitly backed by the U. S. Government.

Foreign Currency Risk – PRIT Funds

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of investments. The Treasury does not have a policy regarding foreign currency risk for the Pension Trust. The PRIM Board manages PRIT's exposure to foreign currencies by hedging a percentage of PRIT's non-U.S. dollar denominated investments through forward foreign currency contracts. The PRIT Fund's investments in foreign currency denominated investments as of June 30, 2011 were approximately \$213 million in cash and investments, \$12.6 billion in equities, \$711 million in fixed income investments and \$1.2 billion in private equity investments. An additional \$3.1 billion is invested in international investments denominated in U. S. dollars.

Concentration of Credit Risk – HST and PRIT

The PRIM Board manages HST's and PRIT's exposure to concentration of credit risk by establishing guidelines with each investment manager that limit the percent of investment in any single issue or issuer.

MMDT, HST and PRIT have no investments at fair value that exceed 5% of HST or PRIT's net assets held in trust for pool participants as of June 30, 2011.

A. Derivative Instruments

HST and PRIT may invest in derivative transactions. In accordance with GASB 53, HST and PRIT's derivatives are accounted for as investment derivatives and are reported at fair value.

Forward Currency Contracts

The HST and PRIT enter into forward currency contracts to hedge the exposure to changes in foreign currency exchange rates on foreign portfolio holdings. The market value of the contracts will fluctuate with changes in currency exchange rates. Risks may arise from the potential inability of counterparties to meet the terms of their contracts and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

The contracts are marked-to-market daily and the change in market value is recorded as an unrealized gain or loss by HST and PRIT.

When a contract is closed, PRIT records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

As of June 30, 2011, HST had open foreign exchange contracts with combined net unrealized losses of approximately \$7.5 million with various delivery dates from July to September. As of June 30, 2011, PRIT had open foreign exchange contracts with combined net unrealized losses of \$6.1 million with various delivery dates.

Futures Contracts

The HST and PRIT may purchase and sell financial futures contracts to hedge against changes in the values of securities the fund owns or expects to purchase.

Upon entering such contracts, they must pledge to the broker an amount of cash or securities equal to a percentage of the contract amount.

The potential risk is that the change in the value of futures contracts primarily corresponds with the value of underlying instruments, which may not correspond to the change in value of the hedged instruments. In addition, there is a risk that HST and PRIT may not be able to close out its future positions due to a non-liquid secondary market. Risks may also arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

The HST and PRIT may also invest in financial futures contracts for non-hedging purposes.

The HST held 87 financial futures contracts at June 30, 2011, with various expirations during FY12 to FY14. These contracts were mainly for Eurodollars, US Treasury securities and in the S&P 500 E-Mini Index. The total notional amount of these contracts as of June 30, 2011 was approximately \$18.8 million, with an aggregated fair value as of that date of approximately \$18.9 million, yielding an unrealized net gain of \$68,288.

PRIT held 15,791 contracts outstanding at June 30, 2011 with various expirations from FY12 to FY14. These contracts are for cash and cash equivalents, fixed income, equities and commodities. A portion of the contracts were short contracts. The aggregated notional exposure amount as of June 30, 2011 was approximately \$2.568 billion with a fair value of \$2.620 billion, yielding an unrealized net gain of approximately \$52.4 million.

Payments are made or received by PRIT each day, depending on the daily fluctuations in the value of the underlying security and are recorded as unrealized gains or losses. When the contracts are closed, the HST and Pension Trust Funds recognize a realized gain or loss.

Swaps – PRIT

PRIT has entered into swap agreements to gain exposure to certain markets and actively hedge other exposures to market and credit risk. The swap contracts are reported at fair value, which represents their estimated liquidation values (costs). PRIT either receives cash from the swap counterparties or pays the swap counterparties monthly depending on whether the fixed-rate interest is lower or higher than the variable-rate interest. Variable-rate interest is paid or received based on various interest rate indicies with fixed rates paid ranging from 0.08% to 8.95%. Changes in fair value are included as part of investment income.

As of June 30, 2011, PRIT had contracts in effect with an aggregated notional amount of approximately \$829.7 million to various investment banks that had maturity dates from FY12 to FY46. The contracts have an aggregate fair value loss of \$22.0 million. PRIT values these contracts using standard methods and techniques including the discounted cash flow analysis and option pricing models.

PRITs counterparty exposure was with various major investment companies with ratings ranging from A to A+ and various other banks with other ratings. Open swap contracts as of June 30, 2011 were as follows (amounts expressed in thousands):

Counterparty	Credit Ratings	2011					
		Interest Rate Swaps		Credit Default Swaps		Total Return Swaps	
		Gross Notional	Fair Value	Gross Notional	Fair Value	Gross Notional	Fair Value
Goldman Sachs International	A+	\$ 40,992	\$ (788)	\$ 36,580	\$ (320)	\$ -	\$ -

B. Discretely Presented Component Unit Investments

Component units invest in derivative transactions. Detailed information on those transactions is found in the notes to the basic financial statements for those component units.

C. Component Unit Swapped Debt

At June 30, 2011, the interest rate swap held by MassDOT, with aggregate fair value liability of approximately \$375.0 million. For complete details, see separately issued MassDOT financial statements.

3. RECEIVABLES

Taxes, federal reimbursements, loans and other receivables are presented in the statement of net assets, exclusive of amounts due from cities and towns and component units as follows (amounts in thousands):

Primary Government	Federal				Total
	Taxes Receivable	Grants and Reimbursements	Loans	Other Receivables	
Governmental receivables	\$ 5,518,259	\$ 1,836,902	\$ 122,094	\$ 1,665,681	\$ 9,142,936
Business-type activity receivables.....	-	85,079	55,662	663,651	804,392
Less: allowance for uncollectibles.....	<u>(2,015,166)</u>	<u>(35,851)</u>	<u>-</u>	<u>(1,292,296)</u>	<u>(3,343,313)</u>

Business-type activities	-	(85,079)	(42,950)	(610,308)	(738,337)
Noncurrent receivables	<u>\$ 900,097</u>	<u>\$ 64,417</u>	<u>\$ 128,022</u>	<u>\$ 125,389</u>	<u>\$ 1,217,925</u>

4. RECEIVABLES, PAYABLES AND TRANSFERS BETWEEN FUNDS

The purposes of receivables, payables and transfers between funds vary by legislative authority. Transfers include the following: intergovernmental services, fringe benefit cost assessments, the year-end stabilization transfer, certain license fees collected by the registry of motor vehicles that fund various highway project initiatives, fund closure transfers, transfers from stabilization to fund current operations and various other transfers for operations, largely for institutions of higher education. Activity between funds reflected as due to/from primary government in the various statements is summarized as follows (amounts in thousands):

	General	Commonwealth Transportation	Lotteries	Federal Grants	Other Governmental Funds	Total
Governmental funds:						
<u>Transfers In:</u>						
Debt service.....	\$ -		\$ -	\$ -	\$ 1,897,801	\$ 1,897,801

Transfers out.....	<u>(1,697,981)</u>	<u>(137,917)</u>	<u>(976,534)</u>	<u>(126,928)</u>	<u>(1,082,832)</u>	<u>(4,022,192)</u>
Subtotal.....	<u>(3,438,758)</u>	<u>(941,679)</u>	<u>(976,534)</u>	<u>(126,928)</u>	<u>(1,463,124)</u>	<u>(6,947,023)</u>
Total governmental funds.....	<u>(1,547,107)</u>	<u>(936,274)</u>	<u>(976,534)</u>	<u>(126,928)</u>	<u>2,725,939</u>	<u>(860,904)</u>
Proprietary Funds:						
	University of Massachusetts	State Universities	Community Colleges			Total
<u>Transfers In:</u>						
Transfers in from the General Fund and Other governmental funds.....	\$ 478,204	\$ 246,500	\$ 302,326			\$ 1,027,030
<u>Transfers Out:</u>						
Transfers out to the General Fund.....	<u>(106,521)</u>	<u>(30,276)</u>	<u>(29,329)</u>			<u>(166,126)</u>
Total proprietary funds.....	<u>371,683</u>	<u>216,224</u>	<u>272,997</u>			<u>860,904</u>
Net transfers in / (out) between funds....	<u>\$ (1,175,424)</u>	<u>\$ (720,050)</u>	<u>\$ (703,537)</u>	<u>\$ (126,928)</u>	<u>\$ 2,725,939</u>	<u>\$ -</u>

Remaining receivables and payables between funds as of June 30, 2011 largely occur due to the timing of accruals and the funding of escrows. The University also reported unremitted benefits costs as of June 30, 2011. The amount due to the General Fund largely represents deficits funded by the General Fund. The following is a summary of receivables and payables between funds remaining as of June 30, 2011:

<u>Receivable Fund</u>	<u>Payable Fund</u>	<u>Amount</u>
Governmental Funds:		
General	Federal Grants.....	\$ 35,518
	Nonmajor Governmental Funds.....	73,863
Non-major Governmental Funds	Nonmajor Governmental Funds.....	<u>72,910</u>
Total Governmental Funds.....		\$ 182,291
Governmental Funds: Proprietary Funds:		
General	University of Massachusetts.....	<u>12,046</u>
Total amounts due.....		<u>\$ 194,337</u>

Central Artery/Tunnel Project

Under the Transportation Reform Act implemented during FY11, the assets of the Central Artery/Tunnel project and responsibility for operations and maintenance were transferred to MassDOT (refer to discussion in Note 1a).

5. CAPITAL ASSETS

Capital asset activities for the fiscal year ended June 30, 2011 were as follows (amounts in thousands):

<i>Primary Government Governmental Activities</i>	July 1, 2010 Beginning Balance	Increases	Decreases and Reclassifications	June 30, 2011 Ending Balance
Capital assets not being depreciated:				
Land	\$ 892,380	\$ 26,520	\$ (152,066)	\$ 766,834
Construction in process	452,988	329,466	(45,222)	737,232
Total capital assets not being depreciated	1,345,368	355,986	(197,288)	1,504,066
Capital assets being depreciated:				
Buildings	5,046,708	158,643	(227,256)	4,978,095
Machinery and equipment	881,485	88,207	(21,684)	948,008
Infrastructure non - Central Artery / Tunnel Project.....	272,159	11,847	(4,215)	279,791
Total capital assets being depreciated	6,200,352	258,697	(253,155)	6,205,894
Less, accumulated depreciation:

6. SHORT-TERM FINANCING AND CREDIT AGREEMENTS

Massachusetts General Laws authorize the Treasurer to issue temporary notes in anticipation of revenue or bond financing. When this short-term borrowing does not meet long-term financing criteria, it is classified as a fund liability. Short-term borrowing may be issued as fixed rate notes or through a commercial paper program supported by bank liquidity facilities maintained by the Commonwealth.

A. Credit Facilities

The balance of revenue anticipation notes (RANs) and commercial paper outstanding may fluctuate during a fiscal year, but all short-term borrowing for cash flow purposes must be reduced to zero by June 30. During FY11, the Commonwealth borrowed by selling \$346 million in commercial paper in anticipation of long-term financing that remained outstanding for approximately three months. In terms of short-term borrowing for cash flow purposes, the Commonwealth borrowed \$1.2 billion by selling RANs. All of the \$1.2 billion in RANs were retired in April, May and June of 2011.

B. Credit Facilities

During FY11, the Commonwealth maintained credit facilities to provide liquidity support for commercial paper notes totaling \$200 million to \$600 million. The Commonwealth started fiscal 2011 with a total of three credit facilities to provide such liquidity support, each in the amount of \$200 million. These facilities expire in periods at various times. In addition, the Commonwealth maintained standby bond purchase agreements for various bond issuances sold from FY97 through FY06 in the form of Variable Rate Demand Bonds. As of June 30, 2011, these agreements totaled \$1.8 billion.

The following schedule details short-term financing for all funds for the fiscal year (amounts in thousands):

	Beginning Balance July 1, 2010	Issued / Drawn	Redeemed / Repaid	Ending Balance June 30, 2011	Credit Limit June 30, 2011

Total primary government.....	<u>\$ -</u>	<u>\$ 1,546,000</u>	<u>\$ (1,546,000)</u>	<u>\$ -</u>	<u>\$ 1,815,450</u>

7. LONG-TERM OBLIGATIONS

Under the Massachusetts Constitution, the Commonwealth may borrow money (a) for defense, (b) in anticipation of receipts from taxes or other sources, any such loan to be paid out of the revenue of the year in which the loan is made, or (c) by a two-thirds vote of the members of each house of the Legislature present and voting thereon. The Constitution further provides that borrowed money shall not be expended for any other purpose than that for which it was borrowed or for the reduction or discharge of the principal of the loan. In addition, the Commonwealth may give, loan or pledge its credit to another entity by a two-thirds vote of the members of each house of the Legislature. The Legislature may not in any manner allow the Commonwealth credit to be given or loaned to or in aid of any individual, or of any private association, or of any corporation, which is privately owned or managed.

The Commonwealth has waived its sovereign immunity and consented to be sued on contractual obligations, including bonds and notes issued by it and all claims with respect hereto. However, the property of the Commonwealth is not subject to attachment or levy to pay a judgment, and the satisfaction of any judgment generally requires legislative appropriation. Enforcement of a claim for the payment of principal or interest on bonds and notes of the Commonwealth may also be subject to the provisions of federal or Commonwealth statutes, if any, enacted to extend the time for payment or impose other constraints upon enforcement. The Commonwealth can not file for bankruptcy under the United States Bankruptcy code.

As of June 30, 2011, the Commonwealth had issued two types of long-term debt obligations: general obligation bonds and special obligation bonds. General obligation bonds, which account for the large majority of the Commonwealth's indebtedness, are backed by the full faith and credit of the Commonwealth.

Special obligation bonds are bonds secured by all or a portion of a specific revenue source and are not general obligations of the Commonwealth. The following is a summary of the Commonwealth's outstanding debt (excluding unamortized discounts and premiums), exclusive of capital leases, (amounts in thousands):

<u>Type of Bond</u>	<u>Amount Outstanding</u>
General Obligation Bonds.....	\$ 18,820,409
Special Obligation Bonds, including GANs.....	<u>2,389,724</u>
Outstanding Commonwealth Bonds.....	21,210,133
MSBA debt.....	<u>4,590,912</u>
Total Governmental Activity debt.....	25,801,045
Less:	
Unamortized premiums and bond issuance costs on Commonwealth debt.....	(335,078)
Unamortized premiums on MSBA debt.....	<u>(195,522)</u>
Total Governmental Activity net of unamortized premiums debt.....	\$ 25,270,445

General obligation (GO) bonds include not only such bonds, but also includes obligations for Build America Bonds (BABs) for \$2.1 billion, and college opportunity bonds as well as debt assumed from former counties. Special obligation bonds include all notes and bonds secured by federal transportation reimbursements, a portion of the Commonwealth's motor fuel excise tax and bonds secured by certain taxes and fees levied.

The following is a table of the structure of general obligation bonds, (net of unamortized premiums and bond issuance cost of \$303.6 million) that are outstanding as of June 30, 2011:

<u>General Obligation Bonds</u>	<u>Amount</u>	<u>Percent of</u>

A. General Obligation Bonds

General Obligation Bonds are authorized and issued primarily to provide funds for Commonwealth capital projects and Commonwealth supported local government improvements. The Commonwealth borrows by selling general obligation bonds and notes pursuant to Chapter 29 of the General Laws. The responsibility to borrow is statutorily delegated to the Office of the State Treasurer and Receiver-General, pursuant to Chapter 29. General obligation bonds are backed by the full faith and credit of the Commonwealth and are paid from the Governmental Funds, from which debt service principal and interest payments are appropriated. Massachusetts General Laws provide for the allocation of bond proceeds to bond authorizations and capital spending in arrears, as expenditures are made, unless the proceeds are allocated at the time of issuance.

In addition, certain bonds are issued for specific programs approved by the Legislature. These bonds are known as College Opportunity Bonds. As of June 30, 2011, the Commonwealth had outstanding approximately \$142 million in variable "U. Plan" bonds (at accreted value), sold in conjunction with a college savings program administered by the Massachusetts Educational Facility Authority (MEFA). These bonds bear deferred interest at a rate equal to the percentage change in the consumer price index plus 2% together with current interest at the rate of 0.5%.

In terms of bond structure, the large majority of general obligation bonds have been sold as fixed rate obligations. As of June 30, 2011, approximately 81% of the Commonwealth's outstanding GO debt is fixed-rate bonds. The remaining 19% of outstanding GO debt is variable rate bonds – bonds whose rate of interest fluctuate based on market or market index changes. The outstanding GO variable rate debt consists of several variable rate structures. Most of the outstanding variable rate debt are variable rate demand bonds or VRDBs, or long-term bonds whose interest rates re-set daily or weekly through a remarketing process. Because these bonds offer bondholders a "put" or tender feature, they are supported by standby liquidity facilities provided by commercial banks which require the applicable bank to purchase any bonds that are tendered and not successfully remarketed. As of June 30, 2011, the Commonwealth had \$1.6 billion in outstanding VRDBs. This accounts for

approximately 9% of total general obligation debt and approximately 45% of total general obligation variable-rate debt. All of these bonds are uninsured. As of June 30, 2011, none of the Commonwealth's outstanding VRDBs have been subject to failed remarketing and "put" back to the banks' liquidity providers; consequently, there have not been any draws on a liquidity facility.

The Commonwealth has also issued general obligation variable-rate debt in the form of auction-rate securities. Like VRDBs, these are long-term bonds whose interest rates are re-set at pre-determined, short-term intervals. Unlike VRDBs, these bonds do not provide bondholders with a put feature and therefore do not require a supporting credit facility. The Commonwealth's auction-rate securities have long-term nominal maturities of over 20 years with interest rates re-set every seven days. A periodic "Dutch auction" process is designed to provide a mechanism of liquidity to bondholders, with bonds re-priced and traded in auctions managed by broker-dealers.

Beginning in February 2008, and continuing through fiscal 2011, several auctions of the Commonwealth's outstanding auction rate securities experienced auction failure, meaning there were insufficient bids from investors to purchase the securities being offered for sale by existing bondholders. Upon auction failure, the interest rate paid to bondholders is the failure rate as specified in the bond documents. For the four series of Commonwealth bonds whose auctions have experienced failed auctions (approximately \$401 million in total outstanding debt obligations, including Commonwealth of Massachusetts General Obligation Bonds, Series 2000 D, 2000 E, 2000 F, and 2000 G), the failure rate is based on a multiple of the non-financial commercial paper rate, with a maximum failure rate of 12%. The failed auctions have resulted in interest costs that were consistently below budgeted debt service levels of 5%.

The remaining outstanding GO variable-rate debt pays interest to bondholders based on certain indices. For example, as of June 30, 2011, the Commonwealth had approximately \$197 million of bonds that pay interest based on the consumer price index (CPI), \$846 million of bonds that pay interest based on the three-month London interbank offered rate (LIBOR) and \$534 million of bonds that pay interest based on the Securities Industry and Financial Markets Association (SIFMA) Index. These bonds make up approximately 1%, 4% and 3% of total outstanding general obligation indebtedness, respectively.

To fund the fiscal 2011 capital budget, the Commonwealth borrowed by issuing \$2.06 billion in long-term general obligation bonds, \$1.55 billion of which was for new-money needs, with the remainder for refunding already existing debt in two separate refunding and restructuring transactions. The first refunding transaction, which also included debt restructuring mandated by the Legislature, resulted in FY11 budgetary savings, but increased debt service by \$19.5 million over the life of the debt at a present value cost of \$1.7 million. The second refunding resulted in reduced debt service of \$14.1 million and a present value savings of \$11.2 million over the life of the debt. Of the new money issues, \$708 million was issued as Build America Bonds (BABs). The BABs program is a temporary bond program authorized by the federal government as part of the 2009 America Recovery and Reinvestment Act (ARRA). Under the BABs program, issuers borrow by selling bonds into the taxable bond market and receive in return a subsidy from the federal government equal to 35% to 45% (depending on whether the proceeds are used for projects in economically distressed areas) of the interest costs on the bonds. Given market conditions at the time of the Commonwealth's two BABs sales, this program resulted in borrowings whose net interest costs will be significantly lower than the interest

on traditional tax-exempt bonds. The BABs program expired on December 31, 2010, and unless the program is reauthorized by the federal government, no additional BABs will be issued.

MSBA Debt

As of June 30, 2011, the MSBA had outstanding approximately \$4.4 billion of Dedicated Sales Tax bonds, plus approximately \$195 million of unamortized premiums for the purpose of funding school construction and renovation projects. Interest on the bonds ranges from 4.0% to 6.0% and is payable semiannually each August 15 and February 15, until maturity in FY40.

B. Special Obligation Bonds

Commonwealth Transportation Fund (CTF)

During FY11, the Commonwealth issued \$576 million in special obligation bonds for highway construction purposes under the Commonwealth's Accelerated Bridge Program, secured by Commonwealth motor fuels taxes and Registry of Motor Vehicle fees. The new bonds are secured by a senior lien on 14.1085 cents of the total 21 cent per gallon gasoline tax, the full 21 cents per gallon of special fuels taxes (comprised primarily of taxes on diesel fuel), the full 19.1% of the average price per gallon tax on liquefied natural gas, and all Registry of Motor vehicle fees deposited in the Commonwealth Transportation Fund. The bonds also have a subordinate lien on 6.86 cents of the 21 cent per gallon gasoline tax not included in the senior lien. These new bonds were issued under the federal Build America Bonds program, whereby states are reimbursed by the federal government for 35% of the bonds' interest costs. A portion of the bonds, \$156.4 million, was also designated as Recovery Zone Economic Development Bonds, which entitles the Commonwealth to receive a 45% subsidy from the federal government.

As of June 30, 2011, approximately \$576 million in principal was outstanding on these bonds and approximately \$450 million of interest (net of the federal subsidy) was expected to be paid through maturity. The bonds mature from FY24 to FY40.

Other special obligation bonds for highway construction purposes issued prior to FY11 are secured by a pledge of 6.86 cents of the 21 cents per gallon gasoline tax. As of June 30, 2011, bonds secured by these pledged funds totaled approximately \$377 million of principal and approximately \$111 million in interest. These bonds mature from FY12 to FY23 and were sold in various series issued prior to FY11. Principal and interest paid during FY11 amounted to approximately \$37 million and \$22 million, respectively.

Convention Center Fund

Chapter 152 of the Acts of 1997, as amended, authorizes \$694.4 million of special obligation bonds to be issued for the purposes of building a new convention center in Boston (\$609.4 million), the Springfield Civic Center (\$66 million) and the Worcester Convention Center (\$19 million). The bonds are payable from monies credited to the Convention Center Fund created by such legislation, which include certain hotel tax receipts from hotels in Boston, Cambridge, Springfield and Worcester, a surcharge on car rentals in Boston, a parking surcharge at all three facilities, a surcharge on sightseeing tours and cruises in Boston and sales tax receipts from certain hotels and other retail establishments in Boston, Cambridge and Springfield. The legislation requires a capital reserve fund to be maintained at a level equal to maximum annual debt

service and provides that if the fund falls below its required balance, the 2.75% convention center financing fee in Boston is to be increased (though the overall hotel tax in Boston, including the fee, cannot exceed 14%). As of June 30, 2011, taxes within the Convention Center districts support approximately \$639 million of outstanding principal and approximately \$526 million of interest on debts related to these Convention Centers. Taxes collected in FY11 were approximately \$86.0 million, while debt service on the bonds was approximately \$34.5 million.

**C. *Federal Grant
Anticipation Notes***

Approximately \$3.0 billion in revenues from federal grants passed through the Federal Grants Fund in FY11 and represents the greatest source of dedicated revenues. (In addition, in conformance with GASB accounting standards, approximately \$1.3 billion in food stamp benefit payments made directly to beneficiaries are shown in the Federal Grants Fund, but these payments do not pass through the Commonwealth's accounting system.) A portion of these grants is dedicated to funding the principal portion only of federal grant anticipation notes issued in fiscal 1998, 1999, 2001, 2011 and refunding notes in fiscal 2003 and fiscal 2011. In FY11, the Commonwealth issued federal grant anticipation notes (GANS) totaling \$480.5 million – \$100 million for new-money needs under the Commonwealth's Accelerated Bridge Program, and \$380.5 million to refund previously issued debt. The \$100 million in GANS for the Accelerated Bridge Program are subordinate to the outstanding GANS, but also have pledged to their payment Commonwealth Transportation Fund revenues in excess of those needed for the payment of debt service for the \$576 million in Special Obligation Bonds described in section C of this note. The refunding transaction resulted in an aggregate debt service savings of \$11.8 million over the life of the refunded debt and an economic savings of \$11.4 million over the life of the refunded debt. The Commonwealth intends to begin repayments of the principal of the new-money notes beginning in fiscal 2016, after the original and refunded GANS have been paid in full. As of June 30, 2011, total principal remaining to be paid on (GANs) is approximately \$767 million. Maturities are from FY12 through FY23. Debt service paid during FY11 was approximately \$189 million.

The legislation authorizing such notes contains a statutory covenant that as long as any such grant anticipation notes remain outstanding, the Commonwealth will deposit all federal highway reimbursements into the Grant Anticipation Note Trust Fund, to be released to the Commonwealth once all the debt service and reserve funding obligations of the trust agreement securing the grant anticipation notes have been met. If the United States Congress reduces the aggregate amount appropriated nationwide to less than \$17.1 billion and debt service coverage with respect to the notes falls below 120%, then the legislation further pledges an additional 10¢ per gallon of existing motor fuel tax collections will be deposited into the trust fund, to be used for debt service on the notes, subject to legislative appropriation. Principal amortization of the notes began in fiscal 2006 and will continue through fiscal 2015. Under the trust agreement securing the notes, aggregate annual debt service on grant anticipation notes may not exceed \$216 million unless the rating agencies rating the notes confirm that exceeding \$216 million in annual debt service will not cause them to withdraw or reduce their credit ratings. Such notes and the interest thereon are secured solely by the pledge of federal highway construction reimbursement payments and by a contingent pledge of certain motor fuels excises. In practice, the interest on such notes has been paid from Commonwealth appropriations.

D. Interest Rate Swap Agreements – Objectives and Risks

The Commonwealth has entered into interest rate swap agreements for the sole purpose of hedging changes in the interest rates on a portion of its outstanding variable rate bonds, taking advantage of the fact that these bonds, combined with interest rate swaps, generally result in lower interest costs than fixed-rate bonds. Of the Commonwealth's variable-rate debt outstanding of approximately \$3.6 billion (or approximately 20% of total general obligation debt), approximately \$3.4 billion were synthetically fixed via floating-to-fixed interest rate swap hedge agreements. The remaining variable-rate debt of approximately \$352 million, or approximately 2% of the total outstanding general obligation debt, is un-hedged and, accordingly, floats with interest rates reset on a daily or weekly basis.

Under the terms of these floating-to-fixed rate hedge agreements, the counterparties to the swaps are obligated to pay the Commonwealth an amount equal or approximately equal to the variable-rate payment on the related bonds or a payment based on a market index and the Commonwealth is obligated to pay the counterparties a stipulated fixed rate. The floating rate received by the Commonwealth from swap counterparties is used to offset the variable rate paid to bondholders. Only the net difference in interest payments is actually exchanged with the counterparty. The net payments made or received on these agreements are reported as part of interest expense in the basic financial statements. In all cases, the Commonwealth remains responsible for making interest payments to the variable-rate bondholders.

Objective of the Interest Rate Swap Agreements

In connection with the issuance of variable rate GO refunding bonds in 1997, 1998, 2001, 2003, 2005, and 2007, the Commonwealth entered into interest rate swap agreements with certain counterparties to hedge against the volatility of the market interest rates. Additional swap agreements were entered into to hedge this volatility on certain special obligation bonds, including the Series 2005 Special Obligation Tax Revenue (Gas Tax) Bonds and the Series 2004 Special Obligation Dedicated Tax Revenue (Convention Center) Bonds. In addition, a floating-to-fixed rate swap agreement was transferred to the Commonwealth from the Route 3 North Transportation Improvements Association (secured by Commonwealth Contract Assistance) in November 2008 after the lease revenue bonds associated with that swap experienced remarketing failure. The swap was assigned to a portion of the Commonwealth's previously unhedged variable rate bonds that were outstanding.

The intended effect of these agreements is essentially to fix the Commonwealth's interest rate obligations with respect to its variable-rate bonds in order to hedge or mitigate the Commonwealth's exposure to changes in interest rates on these bonds. For example, during a period when interest rates rise, the Commonwealth would receive higher payments from swap counterparties that would be used to offset higher payments to bondholders of the outstanding variable rate bonds. During a period when interest rates decline, the reduction in interest payments to bondholders would offset the higher payments made to swap counterparties. But in both scenarios, the net obligation of the Commonwealth is essentially fixed through the life of the swap and bonds. This allows the Commonwealth to finance its capital budget using floating rate bonds, which, combined with interest rate swaps are less costly than fixed-rate bonds while hedging the risk of rising interest rates on those bonds to provide long-term budget certainty. As of June 30, 2011, all of the Commonwealth's interest rate swaps were floating-to-fixed rate agreements and

were deemed effective hedges, as provided for in GASB Statement No. 53.

Terms of the Interest Rate Swap Agreements

The bonds and related swap agreements have final maturities ranging from 2013 to 2037. The swaps' total notional value of approximately \$3.4 billion effectively matches the par amount of the related variable-rate bonds.

Under the swap agreements, the Commonwealth pays the relevant counterparties fixed rates ranging from 3.333% to 5.25% and receives variable-rate payments equal to or approximately equal to the amount of variable rate payments the Commonwealth pays on the related variable-rate refunding bonds or a payment based on a market index.

Credit Risk of the Interest Rate Swap Agreements

As of June 30, 2011, the Commonwealth is not exposed to credit risk because the swaps had a negative fair value. Should interest rates change and the fair value of the swaps become positive, the Commonwealth would be exposed to credit risk in the amount of the swap's fair value. All of the Commonwealth's counterparties are required to post collateral in certain circumstances. The Commonwealth is not required to post collateral in any of its existing swap agreements.

The chart below details the Commonwealth's outstanding swaps and related bond issuances (amounts in thousands except for percentages).

Associated Bond Issue	Notional Amounts Outstanding (thousands)	Effective Date	Fixed Rate Paid (Range)	Terms Variable Rate Received	Fair value at June 30 2011	Fair value at June 30 2010	Change in Fair Value	Final Termination Date	Counterparty	Counterparty Credit Rating

Fair value of the Interest Rate Swap Agreements

The aggregate fair value balance of interest rate swaps at June 30, 2011 is negative \$376 million and is reflected on the statement of net assets as a liability for derivative instruments which is offset by deferred outflows from derivative instruments. The fair values of the interest rate swaps are estimated using the zero-coupon method. This method calculates the future net settlement payments required by the swap assuming that the current forward rates implied by the yield curve correctly anticipate future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for hypothetical zero-coupon bonds due on the date of each future net settlement on the swaps. Because all of the interest rate swaps were deemed effective hedges, changes in fair value of the interest rate swaps during the fiscal year ended June 30, 2011 were recognized as deferred outflows resulting in no impact on the Statement of Activities.

If all the Commonwealth's swap agreements had been terminated as of the end of fiscal year 2011 the Commonwealth would have been required to make a payment of this magnitude. Although the Commonwealth has the option of terminating its swap agreements at any time (and either make or receive any termination payment due), the Commonwealth's counterparties do not have such an option. Therefore, the Commonwealth would only have to make a payment of the amount estimated if certain termination events occurred, as described herein. Based on the terms and provisions of the swap agreements and the Commonwealth's current bond ratings, an involuntary termination of the swaps due to an event of the Commonwealth is remote. In the case of a voluntary termination due to an event of a counterparty, the Commonwealth would likely seek to maintain the existing hedge by replacing that counterparty with another.

Basis and Market-Access Risk of the Interest Rate Swap Agreements

Because the terms on most of the interest rate swap agreements require the Commonwealth's counterparties to make variable rate payments equal or approximately equal to those the Commonwealth makes on the related variable rate bonds, the Commonwealth is not subject to significant basis risk as a result of these agreements. Under certain circumstances, such as a downgrade of the credit rating of the bonds being hedged or the enactment of tax-related legislation which causes the related bonds to trade differently, certain of the swap agreements provide that the Commonwealth's counterparties, may, at their option, pay a variable rate that is based on one or more market indices such as LIBOR or the SIFMA swap index. Under these circumstances, the Commonwealth would be subject to basis risk if these indices varied from the basis for the variable rates that were determined for the Commonwealth's variable-rate demand bonds through the associated remarketing process. For certain other interest rate swap agreements, the variable rate on the swap is based on a market index that differs from the variable rate on the hedged bonds, which is generally remarketed or auction rate. The Commonwealth is subject to basis risk on these agreements.

A majority of the swap contracts have the same maturity dates and amortizations as the related bonds. For two of the swap agreements, the underlying bonds have maturity dates that come due before the termination date of the associated swaps. This applies to the 2006B and 2000D bond being hedged by the \$294 million swap with Barclays and the 2010A bonds being hedged by the \$533 million swap with Citigroup. The Commonwealth's stated debt plan is to extend the underlying variable rate bonds to match the terms and amounts of the associated swaps. If the Commonwealth is unable to extend the underlying variable rate bonds or identify other variable rate bonds the swaps may hedge, the Commonwealth would be required to make net settlement payments on the swaps without the offsetting effects of changes in variable rate bond settlement payments.

Termination Risk of the Interest Rate Swap Agreements

The swap contracts use the International Swap Dealers Association (ISDA) Master Agreement, which includes standard termination events, such as failure to pay and bankruptcy. The swaps include termination events additional to those in the standard ISDA master agreement based on credit ratings. The swap agreements are not otherwise subject to termination except at the Commonwealth's option. The swap contracts require that the Commonwealth's counterparties maintain certain ratings levels. If they fail to maintain such ratings, the Commonwealth would have the option to terminate the related swap agreement and receive or pay a termination payment depending on the interest rates at the time. Similarly, the Commonwealth is required to maintain certain credit ratings under the agreements, generally 'BBB-' or above. If the Commonwealth's rating fell below those levels, the Commonwealth's counterparties would have the option to terminate the related swap agreements or for certain agreements choose to make variable rate payments based on a market index (instead of the actual bond rate) which would subject the Commonwealth to basis risk, as previously described. If one or more of the swap agreements were terminated, then the related variable rate bonds would no longer be hedged and the Commonwealth would no longer be paying a synthetic fixed rate with respect to the bonds. In addition, if at the time of termination, the swap had a negative fair value, the Commonwealth would incur a loss and would be required to settle with the related counterparty or counterparties at the swaps' fair market values. However, to avoid a termination payment and to maintain the interest rate hedge, when the terminating event is an event of the counterparty, the Commonwealth would likely seek to replace counterparties to the swap agreement. Based on the terms and provisions of the swap agreements and the Commonwealth's current bond ratings, an involuntary termination of the swaps due to an event of the Commonwealth is remote.

E. Outstanding Swapped Debt

Security for Interest Rate Swap Agreements

Under legislation approved by the Governor on August 11, 2008, scheduled, periodic payments to be made by the Commonwealth pursuant to swap agreements in existence on August 1, 2008 or entered into after such date shall constitute general obligations of the Commonwealth for which its full faith and credit is pledged.

Debt service requirements to maturity for variable-rate bonds hedged by interest rate swap agreements and projected future net settlement payments on interest rate swap agreements at June 30, 2011 are provided in the table below.

Future bond interest payments are calculated using rates applicable to the scheduled payment nearest to June 30, 2011 for variable rate bonds. The net swap payments are calculated by subtracting the projected future variable rate interest payment per the swap agreement from the projected future fixed rate payment per the swap agreement. Projected future variable rate payments on the swap agreements are based on variable rates applicable to the scheduled payment nearest to June 30, 2011. The actual amount of variable rate interest paid to bondholders and net swap payments made to counterparties are affected by changes in variable interest rates, changes in inflation (CPI), as well as changes in the London Interbank Offered Rate (LIBOR) and the Securities Industry and Financial Markets Association (SIFMA) floating rate indicies. Changes in the amounts paid to bondholders versus amounts paid to counterparties are largely offsetting:

Fiscal Year Ending June 30	Variable-Rate Bonds		Interest Rate Swaps, Net		Total
	Principal	Interest			
2012	\$ 119,445,000	\$ 31,584,320	\$ 109,978,131	\$ 261,007,451	
2013	195,640,000	30,385,605	103,716,686	329,742,291

Total	<u>\$ 3,425,310,000</u>	<u>\$ 241,674,451</u>	<u>\$ 1,070,489,310</u>	<u>\$ 4,737,473,761</u>	

Business - Type Activities – Swapped Debt

The University System has various swaps. At June 30, 2011, the fair value of liability of the universities outstanding interest rate swaps was \$51.3 million.

For financial reporting purposes, long-term debt is carried at its face value. Unamortized discounts and premiums are shown separately. For capital appreciation bonds, the outstanding amount represents total principal and accreted interest to be repaid.

Component Unit-Swapped Debt

At June 30, 2011, the majority of interest rate SWAPs outstanding are held by MassDOT, which in aggregate have a negative fair value of approximately \$375.0 million. For complete details, see separate MassDOT financial statements.

F. Outstanding Long Term Debt and Changes in Long Term Debt

The amount of long-term debt authorized but unissued is measured in accordance with the statutory basis of accounting. Only the net proceeds (exclusive of discount and costs of issuance) are deducted from the total authorized by the Legislature.

Long-term debt outstanding (excluding unamortized premiums, discounts and issuance cost) and debt authorized and unissued at June 30, 2011 is as follows (amounts in thousands):

	Purpose	Bonds Outstanding	Fiscal Year Maturities	Authorized and Unissued
GANs.....	\$ 666,790	2012 -2015	\$ -	-
Capital Projects:				
General.....	8,134,051	2012 - 2041	9,622,368	
Highway.....	9,868,946	2012 - 2041	6,226,838	
Local Aid.....	1,566,568	2012 - 2038	11,286	
Other.....	638,700	2015 - 2034	9,939	
	20,208,265			15,870,432
Subtotal - Governmental activities debt (exclusive of MSBA).....	\$ 20,875,055			\$ 15,870,432
MSBA Debt.....	4,395,390			
Governmental activities debt.....	\$ 25,270,445			

The amounts in the table above include \$2.8 billion in taxable Build America Bonds.

Interest rates on the Commonwealth's debt outstanding at the end of FY11 ranged from 0.5% to 6.6%.

Changes in long-term debt outstanding (excluding discount and premium) and bonds authorized - unissued for the year ended June 30, 2011 are as follows (amounts in thousands):

	Governmental Funds		Governmental		Authorized Unissued *	
	Debt - Primary		Funds			
	Government	MSBA	Bonded Debt			
Balance July 1, 2010.....	\$ 19,726,507	\$ 4,488,535	\$ 24,215,042	\$ 18,516,310		
Plus: Increases in bonds authorized	-	-	-	75,000		
Less: Authorizations deauthorized	-	-	-	(41,800)		
General and special obligation bonds:						
Proceeds, as defined as principal, premium less						
discount and issuance costs	3,250,858		-	3,250,858	(2,679,078)	
Less: Net premium	(129,690)		-	(129,690)	-	
Less: Principal on refunded bonds.....	(997,850)		-	(997,850)	-	
Less: Bonds retired.....	(974,770)	(93,145)	(1,067,915)		-	
Outstanding debt June 30, 2011**.....	\$ 20,875,055	\$ 4,395,390	\$ 25,270,445	\$ 15,870,432		

* Includes Beginning Balance Adjustment for Authorized/Unissued of \$351.3 Million

** Includes unallocated proceeds of approximately \$229 million.

Business - Type Activities – Colleges and University Debt

Building authorities related to the University of Massachusetts and the state universities have issued bonds for construction of higher education facilities and equipment. Such bonds are guaranteed by the Commonwealth in an aggregate amount not to exceed \$200,000,000. The bond agreements generally provide that revenues from student fees are pledged as collateral on the bonds and establish bond reserve funds, bond funds, and maintenance reserve funds. The University of Massachusetts and state universities have also entered into various loan agreements as participants in the Massachusetts Health and Educational

Facilities Authority's (MHEFA) ongoing capital asset program to finance construction projects and equipment.

At June 30, 2011, debt service requirements to maturity for principal and interest are as follows (amounts in thousands):

<u>Fiscal Year Ended June 30</u>	<u>Governmental Activities</u>				<u>Business - Type Activities</u>		
	<u>Excluding MSBA Debt</u>		<u>MSBA Debt</u>		<u>Revenue Obligation</u>		
	<u>Principal</u>	<u>Interest *</u>	<u>Principal</u>	<u>Interest</u>	<u>Principal</u>	<u>Interest</u>	
2012.....	\$ 1,372,784	\$ 911,694	\$ 94,505	\$ 217,486	\$ 118,189	\$ 143,114

Long - term debt	\$ 19,502,271	\$ 8,489,004	\$ 4,300,885	\$ 3,320,340	\$ 3,159,224	\$ 2,108,222	

*for all variable rate interest not hedged by swap agreements the assumed interest rate is 5%

G. Prior Defeasance

In prior years, the Commonwealth defeased certain general and special obligation bonds by purchasing securities (from the proceeds of refunding bonds or from surplus operating funds) and placing them in irrevocable trusts to provide for all future debt service payments on the defeased bonds. With the exception of the crossover refunding activity discussed previously, the trust account assets and the liabilities for the defeased bonds are not included in the financial statements. At June 30, 2011, approximately \$9,159,369,000 of bonds outstanding from activities in prior fiscal years is considered defeased.

H. Statutory Debt Limit

The Massachusetts General Laws establish limits on the amount of direct debt outstanding. By statutorily limiting the Commonwealth's ability to issue direct debt, this limit provides a control on annual capital spending. The direct debt limit for FY11 was approximately \$18,042,424,000. Outstanding debt subject to the limit at June 30, 2011 was approximately \$16,291,254,000. The limit increases 5% per year.

For purposes of determining compliance with the limit, outstanding direct debt is defined by statute to include general obligation bonds at the amount of their original net proceeds. It excludes BANs, discount and issuance costs, if any, special obligation bonds, GANs, refunded bonds, certain refunding bonds, debt issued by counties, debt issued in conjunction with the MBTA Forward Funding, certain Central Artery / Tunnel debt and debt issued for the SMART program. The amounts excluded from the debt limit are as follows (amounts in thousands):

	<u>Debt Outstanding</u>
Statutory debt June 30, 2011.....	\$ 21,210,134
Less amounts excluded:	
Premium and issuance cost.....	(335,078)
Special obligation principal.....	(1,015,380)
Accelerated Bridge Program.....	(676,125)
GANs principal.....	(666,790)
County debt assumed.....	(150)
MBTA forward funding.....	(44,472)
SMART bonds.....	(824,279)
Central Artery / Tunnel.....	<u>(1,356,606)</u>
Outstanding direct debt.....	<u>\$ 16,291,254</u>

I. Administration Debt Limit

During fiscal year 2009, the administration announced a policy that sets the annual borrowing limit at a level designed to keep debt service at a maximum of 8% of budgeted revenues. For this purpose, debt service includes principal and interest payments on all general obligation debt, special obligation gas tax debt, interest on federal grant anticipation notes, general obligation contract assistance payment obligations and budgetary contract assistance payment obligations on certain capital lease financings. Debt of the Massachusetts School Building Authority and of the Massachusetts Bay Transportation Authority that is supported by the portion of the sales tax legally dedicated to such entities is not included for purposes of this analysis, as the Commonwealth is not liable for such debt; similarly, the sales tax revenues legally dedicated to such entities are not included in the budgeted revenue projections.

In addition to keeping debt service at a maximum of 8% of budgeted revenues, the debt management policy limits future annual growth in the bond cap to not more than \$125 million through fiscal 2012. This additional constraint is designed to ensure that projected growth in the bond cap will be held to stable and sustainable levels.

The Administration will treat all debt and debt-like obligations of the Commonwealth as subject to the bond cap for purposes of developing the annual capital budget, except in limited circumstances when there is a sound policy justification for not including a particular debt issue. Debt may be excluded from the bond cap, for example, where there is a new, dedicated source of project-related revenues supporting the payment of debt service on such debt; in such cases, the dedicated revenue would also be excluded from projected budgeted revenues for purposes of determining the bond cap as described above.

The following table shows the annual bond cap, the resulting total annual debt service payment obligations and the debt service as a percentage of budgeted revenues.

Bond Cap (in millions except for percentages)

	Fiscal 2011
Bond Cap as approved by the Governor.....	\$ 1,765
Total Annual Debt Service Obligations.....	1,820
Budgeted Revenue.....	36,536
Debt Service as % of Budgeted Revenues.....	4.98%

J. Changes in Long-Term Liabilities

The following table summarizes changes in long-term liabilities for both governmental activities and business-type activities (amounts in thousands):

<i>Changes in Long Term Liabilities - Governmental Activities:</i>		Beginning <u>Balance</u>	Additions	Deletions	Ending <u>Balance</u>	Due Within One Year
Description		\$	\$	\$	\$	\$
Tax refunds and abatements payable.....	\$ 813,199	\$ 809,958	\$ 813,199	\$ 809,958	\$ 809,958	\$ 809,958

Further information on debt is found in the notes to the basic financial statements for the various component units.

8. INDIVIDUAL FUND DEFICITS

Certain funds within the Governmental Fund Type had fund deficits at June 30, 2011. None of these funds were in deficit due to finance-related contractual provisions and were allowed to be in deficit by General Law. The amounts are as follows (amounts in thousands):

<u>Other Governmental Funds</u>	<u>Amount</u>
Medical Security Trust Fund.....	\$ (50,466)
Government Land Bank Fund.....	(35,033)
Highway Capital Projects Fund.....	(326,306)
Capital Improvement and Investment Trust Fund.....	(121)
Federal Highway Construction Program Capital Projects Fund.....	(118,805)
Government Land Bank Capital Projects Fund.....	(855)

Some of the funds above are consolidated within supplementary information. The Commonwealth may fund these deficits with appropriations, or in the case of capital funds, proceeds from bond issuances or payments from third parties.

9. RETIREMENT AND OTHER POST EMPLOYMENT BENEFITS

A. Plan Descriptions

Primary Government

The Commonwealth is statutorily responsible for the pension benefits for Commonwealth employees (members of the State Employees' Retirement System) and for teachers of the cities, towns, regional school districts throughout the Commonwealth and Quincy College (members of the Teachers' Retirement System). The members of the retirement systems do not participate in the Social Security System.

The Massachusetts *State Employees' Retirement System* (SERS) is a single employer defined benefit public employee retirement system (PERS), covering substantially all employees of the Commonwealth and certain employees of the independent authorities and agencies, including the state police officers at the Massachusetts Port Authority. The former MTA employees and retirees became members of SERS upon the creation of MassDOT. Other employees who transferred to MassDOT had been, and remain, members of SERS. The assets and liabilities of the former MTA have been transferred to the SERS. The SERS is administered by the Massachusetts State Retirement Board and is part of the reporting entity and does not issue a stand-alone audited financial report.

The Massachusetts *Teachers' Retirement System* (MTRS) is a defined benefit PERS managed by the Commonwealth on behalf of municipal teachers and municipal teacher retirees. The Commonwealth is a non-employer contributor and is responsible for all contributions and future benefit requirements of the MTRS. The MTRS covers certified teachers in cities towns, regional school districts and Quincy College. Consequently, the Commonwealth reports the MTRS as a single employer PERS with special funding responsibilities. The MTRS is administered by the Commonwealth and is part of the reporting entity and does not issue a stand-alone audited financial report.

Certain Commonwealth employees and current retirees employed prior to the establishment of the State Employees' Retirement System are covered on a "pay-as-you-go" basis. Benefits are recorded when due and payable.

Membership – Membership in SERS and MTRS as of January 1, 2011, the date of the most recent valuation, is as follows:

	<u>SERS</u>	<u>MTRS</u>
Retirees and beneficiaries		
currently receiving benefits.....	53,627	55,690
Terminated employees entitled to		
benefits but not yet receiving them.....	3,973	N/A
Subtotal.....	<u>57,600</u>	<u>55,690</u>
Current members.....	<u>86,586</u>	<u>87,136</u>
Total.....	<u>144,186</u>	<u>142,826</u>

Legally Required Reserves Accounts - The balances of legally required reserves at December 31, 2010 (most recent available information) were as follows (amounts in thousands):

	<u>SERS</u>	<u>MTRS</u>	Purpose
Annuity Savings Fund.....	\$ 4,944,928	\$ 5,163,834	Active members' contribution balance
Annuity Reserve Fund.....	1,349,031	2,543,502	Retired members' contribution account
Special Military Service Fund.....	50	337	Members' contribution account while on military leave
Pension Reserve Fund.....	<u>12,799,486</u>	<u>13,442,065</u>	Amounts appropriated to fund future retirement benefits
Total	<u>\$ 19,093,495</u>	<u>\$ 21,149,738</u>	

Boston teachers are members of the State Boston Retirement System (SBRS) and are not included in this membership data.

B. Benefit Provisions

Massachusetts General Laws establish uniform benefit and contribution requirements for all contributory PERS. These requirements provide for superannuation retirement allowance benefits up to a maximum of 80% of a member's highest three-year average annual rate of regular compensation. Benefit payments are based upon a member's age, length of creditable service, and group creditable service, and group classification. The authority for amending these provisions rests with the Legislature.

C. Funding and Contributions Policy

Members become vested after ten years of creditable service. A superannuation retirement allowance may be received upon the completion of twenty years of service or upon reaching the age of 55 with ten years of service. Normal retirement for most employees occurs at age 65; for certain hazardous duty and public safety positions, normal retirement is at age 55.

D. Other Financing Situations

Chapter 112 of the Acts of 2010, signed on May 22, 2010, changed the methodology for the Commonwealth funding of Boston teachers in the SBRS. The cost of pension benefits of the other participants of the SBRS is the responsibility of the City of Boston. Chapter 112 clarified that the Commonwealth is responsible for all contributions and future benefit requirements for Boston Teachers that are members of the SBRS. For the fiscal year ending June 30, 2011, the Commonwealth contributed \$121.3 million in satisfaction of its actuarially required contribution to the SBRS. The SBRS is a cost sharing multiple employer pension system that is not administered by the Commonwealth and is not part of the reporting entity of the Commonwealth. For a complete copy of SBRS's separately issued financial statements, please contact the City of Boston Retirement Board at 617-635-4305. In June 2010, the Commonwealth made its final arrears payment to the City of Boston (\$132 million) as well as the actuarially required contribution (\$126.8 million) to SBRS.

The retirement systems' funding policies have been established by Chapter 32 of the Massachusetts General Laws. The Legislature has the authority to amend these policies. The annuity portion of the SERS and TRS retirement allowance is funded by employees, who contribute a percentage of their regular compensation. Costs of administering the plan are funded out of plan assets.

The Commonwealth is financially responsible for the cost of living adjustment (COLA) granted to participants in various retirement systems of cities, towns and counties in fiscal year 1981 to 1997. Chapter 17 of the Acts of 1997 effective for fiscal year 1998 transferred the responsibility for funding COLAs for separate (non-teacher) retirement systems of cities and towns to their respective systems. Any future COLA granted by the Legislature to employees of these plans will be the responsibility of the individual system, assuming approval by the local board. The individual employer governments are also responsible for the basic pension benefits.

The actuarial accrued liability for COLAs as of January 1, 2011 was \$281.7 million.

.

The policy for post-retirement benefit increases for all retirees of the SERS, MTRS, for those participants who serve in the City of Boston's School Department in a teaching capacity and COLAs of local governments is subject to legislative approval.

The total contributions required for SERS and TRS are based on the entry age normal cost method using the same actuarial assumptions used to compute the net pension obligation.

A table of Pension Funding Progress and the Commonwealth's annual pension contributions for the past six fiscal years is presented as supplemental information of this report.

Member contributions vary depending on the most recent date of membership:

<u>Hire Date</u>	<u>% of Compensation</u>
Prior to 1975.....	5% of regular compensation
1975 - 1983.....	7% of regular compensation
1984 to 6/30/1996.....	8% of regular compensation
7/1/1996 to present.....	9% of regular compensation except for State Police which is 12% of regular compensation
7/1/2001 to present.....	11% of regular compensation (for teachers hired after 7/1/01 and those accepting provisions of Chapter 114 of the Acts of 2000)
1979 to present.....	An additional 2% of regular compensation in excess of \$30,000

Schedule of Annual Required Contributions and Calculation Methodology

Chapter 32 of the General Laws directs the Secretary of Administration and Finance to prepare a funding schedule to meet actuarially determined requirements, and to update this funding schedule every three years on the basis of new actuarial valuation reports prepared under the Secretary's direction. Any such schedule is subject to legislative approval. If a schedule is not so approved, payments are to be made in accordance with the most recently approved schedule. Under the current schedule adopted in 2011, the amortization payments are designed to eliminate the unfunded liability by fiscal year 2040 on the basis of 4.50% annual growth. The funding schedule as published follows an acceptable actuarial funding methodology to compute normal cost and the unfunded accrued actuarial liability.

Contributions by the Commonwealth of \$1.442 billion were made during the fiscal year ended June 30, 2011. Of this amount \$34.3 million represents budgeted payments for COLAs granted to participants in retirement systems of cities, towns and counties and approximately \$121.3 million represents payments for Boston Teachers.

GAAP requires that pension expenditures (costs) be based on the actuarially required contribution determined using an acceptable actuarial cost method and that they are not less than:

- Normal cost plus amortization of net pension obligation cost
- Interest and amortization on any unfunded prior service costs

The Commonwealth contributed approximately 104% of its annual required contributions in FY11.

The following table shows the detail of annual required contributions (ARC) and Commonwealth contribution, as well as pension cost contributions exclusive of cost of living adjustments (amounts in thousands):

	<u>SERS</u>	<u>MTRS</u>	<u>Total</u>
<u>2011</u>

F. Additional Actuarial Information

The schedules of funding progress, presented as required supplementary information (RSI) following the notes to the basic financial statements, present multiyear trend information about whether the actuarial values of plan assets are increasing or decreasing over time relative to the actuarial accrued liability (AALs) for benefits.

Additional information as of the latest actuarial valuation is as follows:

1. The annual required contribution for 2011 was determined as part of the January 1, 2011 actuarial valuation using the entry age normal cost method.
2. The actuarial assumptions included (a) 8.25% investment rate of return, (b) a 3.25% interest rate credited to the annuity savings fund and (c) a 3% cost of living increase per year.
3. Salary increases are based on analyses of past experience but range from 4.5% to 10.0% depending on group and length of service.
4. The assumptions do not include post-retirement benefit increases, which are taken into account when granted under amendments to General Laws.

The actuarial value of assets was determined using various techniques that smooth the effects of short-term volatility in the market value of investments, with a phased-in approach. Under this approach, 20% of the gains or losses occurring in the prior year are recognized, 40% of those occurring two years prior, etc, so that 100% of gains and losses occurring five years prior are recognized. The actuarial value of assets is adjusted if necessary in order to remain between 90% and 110% of market value.

5. The remaining amortization period for the unfunded pension liability at January 1, 2011 was 30 years to FY40.

In July 2011, as part of its FY12 budget the Commonwealth enacted legislation including an extension of the Commonwealth's pension funding schedule from 2025 to 2040.

G. Commonwealth Post Employment Obligations Other than Pensions (OPEB)

In addition to providing pension benefits, under Chapter 32A of the Massachusetts General Laws the Commonwealth is required to provide certain health care and life insurance benefits for retired employees of the Commonwealth, housing authorities, redevelopment authorities and certain other governmental agencies. Substantially all of the Commonwealth's employees may become eligible for these benefits if they reach retirement age while working for the Commonwealth. Eligible retirees are required to contribute a specified percentage of the health care/benefit costs which are comparable to contributions required from employees. The Commonwealth is reimbursed for the cost of benefits to retirees of the eligible authorities and non-state agencies.

The Group Insurance Commission (GIC) of the Commonwealth manages the Commonwealth's defined benefit OPEB plan as an agent multiple employer program including the Commonwealth and 370 municipalities and other non-

Commonwealth governmental entities. These entities that participate in the GIC are responsible for paying premiums at the same rate to the GIC and therefore benefit from the Commonwealth's premium rates. The GIC has representation on the Board of Trustees of the State Retiree Benefits Trust Fund (SRBTF).

At the inception of MassDOT, the employees of the former MTA became eligible to participate in the Commonwealth's OPEB plan. All other employees of MassDOT were members of the plan prior to the creation of MassDOT and remain so. The liability for MDOT (including former MTA employees) is included in the Commonwealth's liability. The former MTA had established an irrevocable trust to fund OPEB liabilities. That trust had a balance of \$60.8 million as of June 30, 2011. The trustees have yet to make a decision on the disposition of that Trust. No adjustment has been made in the Commonwealth OPEB valuation for these assets.

The SRBTF is set up solely to pay for OPEB benefits and the cost to administer those benefits. It can only be revoked when all such health care and other non-pension benefits, current and future have been paid or defeated. GIC administers benefit payments, while the Trustees are responsible for investment decisions. The FY11 General Appropriation Act transferred approximately \$397 million to the Trust for the purpose of benefits payments.

Funding Policy

Employer and employee contribution rates are set in General Law. The Commonwealth recognizes its share of the costs on an actuarial basis. As of June 30, 2011 and as of the valuation date (January 1, 2011), Commonwealth participants contribute 0% to 20% of premium costs, depending on the date of hire and whether the participant is active, retiree or survivor status. As part of the FY11 General Appropriation Act, all active employees pay an additional 5% of premium costs. Normal costs paid for OPEB to retirees during FY11 totaled approximately \$557 million. There are approximately 145,971 participants eligible to receive benefits at June 30, 2011.

Annual OPEB Cost and Net OPEB Obligation, Funded Status and Funding Progress

The Commonwealth and the MSBA are not required to contribute the actuarially determined annual required contribution (ARC) under the provisions of Statement No. 45 and under Commonwealth general laws. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. For fiscal year 2011, the Commonwealth's annual OPEB contribution of approximately \$557 million for retiree benefits was less than the ARC. The Commonwealth's annual OPEB cost, the percentage of annual OPEB cost contributed to the SRBTF and the net OPEB obligation for the Commonwealth for fiscal year 2011 are as follows from the valuation calculated as of January 1, 2011 (amounts in millions except percentages):

<u>2011</u>	<u>SRBTM</u>
Annual required contribution (ARC).....	\$ 1,276
Interest on net OPEB obligation.....	87
Adjustment to annual required contribution.....	<u>(68)</u>
Annual OPEB cost (AOC).....	1,295
Less: Contributions made.....	<u>(557)</u>
Increase in net OPEB obligation.....	738
Net OPEB obligation as reported at beginning of year.....	<u>1,953</u>
Net OPEB obligation - end of year.....	<u>\$ 2,691</u>
<u>2010</u>	
Annual OPEB cost.....	\$ 1,176
Percentage of annual OPEB cost contributed.....	32%
Net OPEB obligation - end of year.....	<u>\$ 1,953</u>
<u>2009</u>	
Annual OPEB cost.....	\$ 1,345
Percentage of annual OPEB cost contributed.....	26%
Net OPEB obligation - end of year.....	<u>\$ 1,149</u>

The funded status of the Commonwealth's OPEB obligation is as follows:
(amounts in thousands except for percentages)

	Actuarial Value of Plan Assets	Actuarial Accrued Liability	Unfunded Actuarial Liability (UAAL)	Funded Ratio	Annual Covered Payroll	UAAL as a % of Covered Payroll
Actuarial Valuation as of January 1, 2011....	\$ 350,500	\$ 16,568,600	\$ 16,218,100	2.1%	\$ 4,808,250	337.3%

The MSBA's ARC for FY11 was approximately \$3.4 million. Including the adjustment to the annual required contribution, the net annual OPEB cost for the MSBA was approximately \$478,000. The MSBA's net OPEB obligation at June 30, 2011 was \$3.4 million. MSBA made no contributions during FY11. Based on an actuarial valuation as of January 1, 2009, the MSBA had an unfunded actuarial accrued liability of approximately \$2.5 million and had no plan assets. This amount is included as part of other governmental activities liabilities in the Statement of Net Assets. Therefore the entire amount is unfunded. Covered payroll of active plan members was approximately \$3.0 million, yielding an unfunded actuarial accrued liability as a percentage of covered payroll of 82.7%.

During FY10, the MSBA Board voted to establish an irrevocable trust to fund the MSBA's outstanding OPEB liability and to transfer to such trust an amount not to exceed \$1,422,000 to fully fund the Authority's outstanding OPEB liability. As of September 30, 2011, the MSBA had not yet established the irrevocable trust, but had set aside \$1,422,000 in a separate account to contribute to the trust. The MSBA is currently working with the Commonwealth to develop a process whereby the MSBA could invest these funds in the State Retirement Benefits Trust Fund.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the SRBTM and the annual required contributions of the Commonwealth are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information

following the notes to the financial statements, presents multiyear trend information that shows whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the Commonwealth and those non-Commonwealth governments that participate in GIC) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs on a premium basis between the Commonwealth and those non-Commonwealth governments that participate in GIC to that point. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The actuarial assumptions included a 4.5% investment rate of return (net of administrative expenses) and an annual healthcare cost trend rate of 8.5% initially, reduced by decrements to an ultimate rate of 5% after seven years.

Administrative expenses are expected to rise 5% per annum. The Commonwealth's unfunded actuarial accrued liability is being amortized as a level percentage of projected payroll on a closed basis for a period of thirty years, increasing at a rate of 4.5% per year, the same rate as the projected salary increases.

A schedule of funding progress for OPEB is presented as Required Supplementary Information (RSI).

The most recent OPEB actuarial valuation for the Commonwealth is available on the Comptroller's web site at <http://www.mass.gov/osc/publications-and-reports/financial-reports/opeb.html>. There is currently no separate, audited GAAP-basis postemployment benefit plan report available for the Commonwealth.

10. LEASES

Primary Government

In order to finance the acquisition of equipment, the Commonwealth has entered into various lease/purchase agreements, including tax-exempt lease purchase (TELP) agreements, which are accounted for as capital leases. Included in the capital assets of the Commonwealth are additions financed by capital leases. For FY11, these additions are approximately \$17.2 million. Lease agreements are for various terms and contain clauses indicating that their continuation is subject to appropriation by the Legislature.

The Commonwealth has numerous operating lease agreements for real property and equipment with varying terms. These agreements contain provisions indicating that continuation is subject to appropriation by the Legislature.

The Colleges and the University lease real property and equipment under numerous operating lease agreements for varying terms. The following schedule summarizes future minimum payments under non-cancelable leases for governmental activities and for the Colleges and University – reported as a business-type activity, for the fiscal year ended June 30, 2011 (amounts in thousands):

Fiscal Year Ended June 30	Governmental Activities				MSBA Operating Leases	Governmental Activities Total	Business - Type Activities				Business - Type Activities Total
	Capital Leases		Operating Leases				Capital Leases		Operating Leases		
	Principal	Interest				Principal	Interest				
2012.....	\$ 11,368	\$ 4,781	\$ 164,758	\$ 726,921	\$ 907,828	\$ 8,012	\$ 1,261	\$ 23,850	\$ 33,123		
2013.....	8,478	3,563	111,365	744,578	867,984	7,192	965	25,945	34,102		
2014.....	6,406	2,694	91,345	762,235	862,680	5,673	726	24,912	31,311

Long - term lease obligations	\$ 49,607	\$ 20,854	\$ 638,984	\$ 1,958,201	\$ 2,667,646	\$ 23,093	\$ 4,217	\$ 143,014	\$ 170,324		

11. COMMITMENTS

A. Primary Government

The Commonwealth continues to guarantee certain Massachusetts Bay Transportation Authority (MBTA) debt outstanding at June 30, 2011, totaling approximately \$578.6 million.

The MBTA's Forward Funding legislation of 1999 provides for the MBTA to issue general obligation, revenue or other debt secured by a pledge or conveyance of all or a portion of revenues, receipts or other assets or funds of the MBTA. Accordingly, all MBTA debt issued after this legislation is not backed by the full faith and credit of the Commonwealth.

Additional commitments of the Commonwealth remain for the University of Massachusetts Building Authority and the Massachusetts State College Building Authority. As of June 30, 2011, the University of Massachusetts Building Authority has committed debt of approximately \$1.95 billion, of which approximately \$136.9 million is guaranteed by the Commonwealth. The Massachusetts State College Building Authority has approximately \$871.2 million of outstanding debt, of which approximately \$29.8 million is guaranteed by the Commonwealth.

B. Saltonstall Building

The Massachusetts Development Finance Agency (MDFA) was authorized in legislation to undertake redevelopment of the Saltonstall State Office Building (Building) and its surrounding area. Under the provisions of MDFA's bond authorization, the Building is to be leased by the MDFA for a lease term of up to 50 years with extension terms permitted for an aggregate 30 more years. The MDFA renovated the Building and leased half of it back to the Commonwealth for office space and related parking for a comparable lease term. The remainder of the Building and surrounding area has been redeveloped as private office space, housing and retail establishments. The Commonwealth is obligated for future lease payments for space it rents.

However, this obligation is not a general obligation or a pledge of credit of the Commonwealth. Though MDFA's bonds are revenue obligations, with pledges of the public and private lease payments, the Commonwealth's lease payments are due upon occupancy and are subject to annual appropriation.

C. Other Construction Commitments

At June 30, 2011, the Commonwealth had commitments of approximately \$665 million related to ongoing construction projects.

D. Contractual Assistance to Authorities

The Commonwealth is also authorized to pledge its credit in aid of and provide contractual support for certain independent authorities and political subdivisions within the Commonwealth. These Commonwealth liabilities are classified as: (a) general obligation contract assistance; (b) budgetary contractual assistance liabilities; or (c) contingent liabilities. In addition, the Commonwealth is authorized to pledge its credit in support of scheduled, periodic payments to be made by the Commonwealth under interest rate swaps and other hedging agreements related to bonds or notes of the Commonwealth.

General obligation contract assistance arise from statutory requirements for payments by the Commonwealth to the Massachusetts Water Pollution Abatement Trust, the Massachusetts Department of Transportation and the Massachusetts Development Finance Agency that are used by such entities to pay a portion of the debt service on certain of their outstanding bonds. Such assistance constitutes a pledge of the Commonwealth's credit for which a two-thirds vote of the Legislature is required.

Budgetary contract assistance liabilities do not constitute a pledge of the Commonwealth's credit. Contingent liabilities relate to debt obligations of independent authorities and agencies of the Commonwealth, or payment obligations of such entities on hedging transactions related to such debt, that are expected to be paid without Commonwealth assistance, but for which the Commonwealth has some kind of liability if expected payment sources do not materialize. These contingent liabilities consist of guarantees and similar obligations with respect to which the Commonwealth's credit has been or may be pledged. Under legislation approved by the Governor during FY09, the Commonwealth may pledge its credit to guarantee payment obligations of the Massachusetts Turnpike Authority (succeeded by MassDOT in FY10) with respect to certain hedging transactions or provide financial support subject to annual appropriation and without a pledge of the Commonwealth's credit. The same legislation authorizes the Commonwealth to provide credit support to the Turnpike Authority (succeeded by MDOT) in connection with the issuance of certain refunding bonds, subject to annual appropriation and without a pledge of the Commonwealth's credit. In addition, the Commonwealth has certain statutorily contemplated payment obligations with respect to which the Commonwealth's credit has not been pledged, as in the case of the Commonwealth's obligation to replenish the capital reserve funds securing certain debt obligations of the Massachusetts Housing Finance Agency and the Commonwealth's obligation to fund debt service, solely from monies otherwise appropriated for the affected institution, owed by certain community colleges and state universities on bonds issued by the Massachusetts Health and Educational Facilities Authority and the Massachusetts State College Building Authority.

E. MSBA

The MSBA has estimated the amount of outstanding Waiting List and other program commitments at June 30 to be approximately \$305 million.

12. CONTINGENCIES

A number of lawsuits are pending or threatened against the Commonwealth, which arise from the ordinary course of operations. These include claims for property damage and personal injury, breaches of contract, condemnation proceedings and other alleged violations of law. For those cases in which it is probable that a loss will be incurred and the amount of the potential judgment can be reasonably estimated or a settlement or judgment has been reached but not paid, the Attorney General estimates the liability due within a year to be approximately \$20,000,000 as of June 30, 2011.

Workers' compensation costs are recognized when claims are presented and paid. The Commonwealth's outstanding liability for such claims at June 30, 2011 is estimated to be \$285,400,000 of which approximately \$35,960,000 is expected to be paid during FY11.

The Commonwealth receives significant financial assistance from the federal government. Entitlement to these resources is generally contingent upon compliance with terms and conditions of the grant or reimbursement agreements and with applicable federal regulations, including the expenditure of the resources for eligible purposes. Substantially all federal financial assistance is subject to financial and compliance audits.

Chapter 200A of the Massachusetts General Laws, the Commonwealth's Abandoned Property Law, requires deposit of certain unclaimed assets into a managed Fiduciary Fund. These unclaimed assets are to be remitted to the General Fund each June 30, where it is included as miscellaneous revenue. Amounts remitted during FY11 totaled approximately \$152,163,000. A portion of accumulated claims since the law's enactment represent a contingency, because claims for refunds can be made by the owners of the property.

A. *Tobacco Settlement*

A Master Settlement Agreement (MSA) was executed in November of 1998 between five tobacco companies and 46 states, including the Commonwealth.

The MSA called for, among other things, annual payments to the states in perpetuity. These payments have been estimated to total more than \$200 billion over the first 25 years, subject to various offsets, reductions and adjustments. In FY11, the Commonwealth received approximately \$248.7 million or 67.2% of the estimated amounts shown in the MSA. All received amounts were transferred to the General Fund. Amounts received in FY10 continued to be less than had previously been projected as payments under the MSA. The Commonwealth's allocable share of the total base amounts payable under the MSA is approximately 4.05%. The Commonwealth's allocable share of the base amounts under the agreement through 2025 is nearly \$8.96 billion, subject to adjustments, reductions and offsets. However, in pending litigation, tobacco manufacturers are claiming that because of certain developments, they are entitled to reduce future payments under the MSA, and certain manufacturers withheld payments to the states due in FY06 and FY07. The Commonwealth continues to pursue legal action to compel the payment of these additional funds and to obtain a legal determination that the Commonwealth is immune from the claimed downward adjustment to its settlement payments.

In FY04, a Suffolk Superior Court jury rejected the claims of the Commonwealth's private tobacco attorneys that they should be paid a fee

amounting to 25% of the Commonwealth's tobacco settlement money. The jury awarded the plaintiffs 10.5% of the amount the Commonwealth receives under the MSA through 2025. To date, however, the attorneys have received more than 10.5% of what the Commonwealth has received under the MSA. As of June 30, 2009, the Commonwealth owes nothing under the jury award. Whether the Commonwealth will in the future be required to pay any sum on private counsel's claim will depend on the actual payments received by the Commonwealth under the MSA through 2025, as well as on the amounts the attorneys receive through arbitration payments.

B. *Workers' Compensation and Group Insurance Liabilities*

Workers' Compensation is managed as part of the course of the Commonwealth's general operations. No separate fund for workers' compensation is provided for in Massachusetts General Laws. Claims for compensation are not separately insured and are funded by the Commonwealth only when incurred. Such losses, including estimates of amounts incurred, but not reported, are included as accrued liabilities in the accompanying financial statements when the loss is incurred. The Commonwealth assumes the full risk of claims filed under a program managed by the Human Resources Division. For personal injury, Massachusetts General Laws limit the risk assumed by the Commonwealth to \$100,000 per occurrence, in most circumstances.

Based on actuarial calculations as of June 30 2011, discounted, the Commonwealth is liable for unfunded claims and incurred but not reported claims totaling approximately \$285 million, which is reported in accrued liabilities in the Governmental Activities.

Changes in the Commonwealth's liability relating to workers' compensation claims in FY11 and FY10 were (amounts in millions):

	<u>FY11</u>	<u>FY10</u>
Claim liability, beginnng of year.....	\$ 293.4	\$ 307.1
Increase in liability estimate.....	45.7	35.2
Payments and decreases in liability estimate.....	(53.7)	(35.7)
MassDOT transfer.....	-	(13.2)
Claims liability, end of year.....	<u>\$ 285.4</u>	<u>\$ 293.4</u>

The Group Insurance Commission (GIC), a department of the Commonwealth, manages health insurance claims of the Commonwealth's active and retired employees. The Commonwealth is self-insured and various health insurance providers provide health care services to the employees. The accrued liability is estimated based on data provided to the GIC by the insurance companies who participate in the self-insured plans.

Based on GIC estimates, the Commonwealth is liable for an amount of \$129.9 million, net of the employees' reserve of \$20.4 million. Changes in the Commonwealth's liability relating to Group Insurance claims in FY11 and FY10 were (amounts in millions):

	<u>FY11</u>	<u>FY10</u>
Claim liability, beginnng of year.....	\$ 97.1	\$ 113.7
Increase in liability estimate.....	1,113.5	1,044.6
Payments and decreases in liability estimate.....	(1,130.3)	(1,061.2)
Claims liability, end of year.....	<u>\$ 80.3</u>	<u>\$ 97.1</u>

C. Other Claims & Judgments

The following amounts were recognized for claims and judgments as of June 30, 2011 (amounts in millions):

	Year ended June 30	
	2011	2010
Unpaid claims, beginning of year.....	\$ 60.0	\$ 91.6
Incurred claims.....	11.1	13.5
Claim payments and reductions.....	(31.1)	(23.5)
MassDOT transfer-OCIP	-	(21.6)
Unpaid claims end of year.....	<u>\$ 40.0</u>	<u>\$ 60.0</u>

D. Environmental Remediation

Governmental Accounting Standards Board Statement No 49, *Accounting and Financial Reporting for Pollution Remediation Obligations* (GASB 49) became effective in FY09. GASB 49 provides guidance in estimating and reporting the potential costs of pollution remediation. While GASB 49 does not require the Commonwealth to search for pollution, it does require the Commonwealth to reasonably estimate and report a remediation liability when any of the following obligating events has occurred:

- Pollution poses an imminent danger to the public and the Commonwealth is compelled to take action;
- The Commonwealth is found in violation of a pollution-related permit or license;
- The Commonwealth is named, or has evidence that it will be named, as a responsible party by a regulator;
- The Commonwealth is named, or has evidence that it will be named in a lawsuit to enforce a cleanup;
- The Commonwealth commences or legally obligates itself to conduct remediation activities.

Site investigation, planning and design, cleanup and site monitoring are typical remediation activities underway across the Commonwealth. Several Commonwealth agencies have dedicated programs, rules and regulations that routinely deal with remediation related issues; others become aware of pollution conditions in the fulfillment of their missions. The Commonwealth has the knowledge and expertise to estimate the remediation obligations presented herein based upon prior experience in identifying and funding similar remediation activities.

The standard requires the Commonwealth to calculate pollution remediation liabilities using the expected cash flow technique, which measures the liability as the sum of probability-weighted amounts in a range of possible estimated amounts. Where the Commonwealth cannot reasonably estimate a pollution remediation obligation it does not report a liability. Several state departments perform continuous monitoring of polluted sites. Since the monitoring for such sites is perpetual, undiscounted multi-year costs for such sites have not been estimated. Because of a lack of information about the type and extent of the remediation effort that could be required, no range of outlays for the overall remediation effort for such sites could be developed at this time.

The remediation obligation estimates that appear in this report are subject to change over time. Cost may vary due to price fluctuations, changes in technology, changes in potential responsible parties, results of environmental

studies, changes to statutes or regulations and other factors that could result in revisions to these estimates. Prospective recoveries from responsible parties may reduce the Commonwealth's obligation. Capital assets may be created when pollution remediation outlays are made under specific circumstances.

During the fiscal year, the Commonwealth had the following activity related to GASB 49 (amounts in millions):

	Governmental Activities	Business-Type Activities	Government-Wide Total
Environmental remediation liability, beginning of year.....	\$ 168.2	\$ 3.4	\$ 171.6
Expected additional future outlays, increasing liability estimates.....	15.9	(1.8)	14.1
FY11 outlays for environmental remediation	(8.5)	-	(8.5)
Estimated recoveries from third parties.....	<u>(1.4)</u>	<u>-</u>	<u>(1.4)</u>
Environmental remediation liability, end of year.....	<u>\$ 174.2</u>	<u>\$ 1.6</u>	<u>\$ 175.8</u>

The Boston Harbor Clean-Up. The Commonwealth is engaged in various lawsuits in the United States District Court concerning environmental and related laws, including action brought by the federal Environmental Protection Agency alleging violations of the Clean Water Act and seeking to reduce the pollution in Boston Harbor. The Massachusetts Water Resources Authority (MWRA) which is not a component unit and not a related organization of the Commonwealth, has primary responsibility for developing and implementing a court-approved plan for the construction of treatment facilities necessary to achieve compliance with the federal requirements. The cost of initial construction of water treatment facilities required under the federal district court's order amounts to approximately \$4.5 billion so far. Going forward, MWRA anticipates spending an additional \$188.5 million on initial construction and for remaining work on Combined Sewer Overflow projects. This figure does not include routine ongoing costs, such as maintenance expenses and capital spending for plant and system upgrades, retrofits, and replacements.

Massachusetts Military Reservation. The Commonwealth through various departments has been engaged with various sectors of the federal government including the federal Department of Defense regarding natural resource damages at the Massachusetts Military Reservation on Cape Cod. Federal trustees and others claim that the Commonwealth and others may be liable for natural resource damages due to widespread contamination primarily from past military activities at the Reservation and are responsible for response actions and related clean-up activities. The assessment process for natural resource damages is set out in federal regulations and has not been completed. While no recent comprehensive estimate of natural resource damages and response actions is available, it is expected that the damages and response actions may cost at least tens of millions of dollars.

Closed State Facilities. The Commonwealth has 17 facilities which contain a total of 235 buildings, mainly in closed state hospitals that may have varying degrees of asbestos, polychlorinated biphenyl (PCB's) and other compounds that are currently in a dormant state. The Commonwealth typically sells these facilities at minimal cost to private developers who assume full responsibility for any sort of cleanup activity. Cost estimates are only performed during the sale process. At this time, the Commonwealth has no estimate of any potential asset that would be developed from these activities that would ready these sites for sale.

13. COMPONENT UNITS AND DETAILS OF DEPARTMENTS AND ENTITIES THAT ARE SEPARATELY AUDITED***Component Units and Details of Departments and Entities that are separately audited***

The Commonwealth has also considered all potential component units for which it is financially accountable as well as other organizations for which the nature and significance of their relationship with the Commonwealth is such that exclusion would cause the Commonwealth's financial statements to be misleading or incomplete. As required by GAAP, these financial statements present the Commonwealth of Massachusetts (the primary government) and its component units. The Commonwealth has included 16 entities as component units in the reporting entity because of the significance of their operational and/or financial relationships with the Commonwealth. Details of those entities' operations can be found in those entities' basic financial statements and notes to those entities' basic financial statements.

The following entities are presented in the basic financial statements (all having a June 30, 2011 fiscal year end) (entities marked with an * are not legally separate from the Commonwealth but have separately audited financial statements). Entities that are marked with a § also were not audited in accordance with *Governmental Auditing Standards* as promulgated by the Comptroller General of the United States.

Entities Audited by KPMG LLP:

The Massachusetts School Building Authority (MSBA)
The Pension Reserves Investment Trust Fund (PRIT)

Descriptions of Major and Blended Component Units and Entities that are Legally Separate from the Commonwealth:

Blended Component Units – Blended component units are entities that are legally separate from the Commonwealth but are so related to the Commonwealth, that they are, in substance, the same as the Commonwealth or entities providing services entirely or almost entirely to the Commonwealth. The net assets and results of operations of the following legally separate entities are presented as part of the Commonwealth's operations:

The Massachusetts School Building Authority (MSBA) is charged with administering the Commonwealth's school construction and renovation program. The MSBA's sole revenues are from dedicated sales taxes from the Commonwealth. The MSBA's bonded debt is secured by these sales tax revenues. Any deficiency in the sales tax revenue was born by the Commonwealth up to a minimum floor that was adjusted annually by Commonwealth statute through FY09. Expenditures by the MSBA are made on behalf of the Commonwealth as a successor to a long-standing Commonwealth program of school construction. The MSBA's operations and results thereon are blended with the Commonwealth and as such are reported as a major governmental fund.

The Pension Reserves Investment Trust Fund (PRIT) is the investment portfolio for the pension assets of the Commonwealth and as such, is presented as a blended component unit. PRIT is managed by the Pension Reserves Investment Management (PRIM) Board. Certain portions of PRIT's net assets totaling approximately \$8.3 billion relate to holdings on behalf of cities and towns that participate in the Pool and are reported as an external investment trust within the fiduciary fund type.

The Massachusetts Municipal Depository Trust (MMDT) is an investment pool of the Commonwealth and its political subdivisions. The various local governments and other political subdivisions share of net assets is approximately \$2.9 billion at June 30, 2011, and is reported as an external investment trust within the fiduciary fund type.

The following entities are audited separately from the Commonwealth but are not legally separate from the Commonwealth:

The Massachusetts State Lottery Commission, a division of the Office of the State Treasurer and Receiver-General, operates the Commonwealth's lottery. The net assets of the Commission and results thereon are presented as a major governmental fund.

The Accounts Managed by the Health Care Security Trust Board (HST) are the long-term investment account of the Health Care Security Trust, a nonmajor governmental fund and the State Retiree Benefits Trust Fund, a fiduciary fund. The HST is the recipient of tobacco settlement remittances to the Commonwealth. The HST is managed by a board of trustees, which supervises the investment and reinvestment of monies received into the HST. The HST utilizes certain resources and staff of PRIM.

The institutions of higher education of the Commonwealth are also not legally separate from the Commonwealth and have operations and net assets that are presented as part of the Commonwealth's business-type activities. These systems include:

The University of Massachusetts System including the University of Massachusetts Building Authority, and the Worcester City Campus Corporation. The Worcester City Campus Corporation includes a not-for-profit subsidiary, the Worcester Foundation for Biomedical Research, Inc. The University System also includes discretely presented component units, the University of Massachusetts Dartmouth Foundation, Inc. and the University of Massachusetts Foundation, Inc.

The State University and Community College Systems including the 9 state universities and 15 community colleges located throughout the Commonwealth and the Massachusetts State College Building Authority (a blended component unit of the state university system).

Other Discretely Presented Component Units that are Separately Audited – Discrete component units are entities which are legally separate (often called Authorities) but financially accountable to the Commonwealth, or whose relationships with the Commonwealth are such that exclusion would cause the Commonwealth's financial statements to be misleading or incomplete. The component units column of the basic financial statements includes the financial data of the following entities:

Major component units:

The Massachusetts Department of Transportation (MassDOT) incorporates the MTA and has jurisdiction over the MBTA and the RTAs. The Massachusetts Port Authority will become a related organization to MassDOT.

The Massachusetts Water Pollution Abatement Trust (MWPAT) provides a combination of federal and Commonwealth funds for water and sewer projects around the Commonwealth as operator of the Commonwealth's State Revolving Fund.

Commonwealth Insurance Connector Authority administers the Commonwealth health insurance programs to facilitate subsidized health insurance for individuals without access to employer-sponsored health insurance as well as offer an affordable commercial health insurance product named Commonwealth Care to small businesses that are eligible for the program.

14. SUBSEQUENT EVENTS***A. Subsequent Bond Issuances***

Subsequent to the close of the fiscal year, the Commonwealth sold \$500.525 million in bonds in September 2011 (\$500,525,000 General Obligation Bonds, Consolidated Loan of 2011, Series D), \$1.2 billion in notes in November 2011 (\$600,000,000 2011 Series A General Obligation Revenue Anticipation Notes and \$600,000,000 2011 Series B Revenue Anticipation Notes), and \$400 million in bonds in December 2011 (\$400,000,000 General Obligation Bonds, Consolidated Loan of 2011, Series E). All issues were sold as tax exempt.

On October 12, 2011, the Commonwealth allowed Morgan Stanley Derivative Products Inc. (“MSDP”) to novate or transfer the existing interest rate swap agreement between the Commonwealth and MSDP to Morgan Stanley Capital Services LLC. The novation was driven by the recent downgrade of MSDP bond ratings. The novation was done at no cost to the Commonwealth.

B. Subsequent Pension Legislation

On November 16, 2011, the Governor approved legislation containing pension reforms, including increasing retirement ages, eliminating early retirement subsidies and increasing the period for calculating average earnings from the highest three years to the highest five years for all new state employees who join a retirement system on or after April 2, 2012. The Executive Office for Administration and Finance estimates that the legislation will generate savings over the next 30 years of more than \$3 billion for the Commonwealth and nearly \$2 billion for municipalities. These savings projections are not assumed in the current pension funding schedule.

Boston Fish Pier

The Boston Fish Pier, which opened in 1914, is the oldest continuously working fish pier in the United States. The historic Boston Fish Pier is really three buildings: the East and West Buildings which are connected by huge archways; and the Exchange Building. Massport assumed ownership of Fish Pier in 1972 and has invested over \$30 million to modernize the pier. The Boston Fish Pier still provides berthing space for the region's fishermen and houses the fish auction. Although alternative uses have been introduced to the Pier, fishing and fish processing remain its primary function.

The accompanying notes are an integral part of the required supplementary information

Note to Required Supplementary Information – Budgetary Reporting

The Commonwealth passes a combined budget for all budgeted operations. State finance law requires that a balanced budget be approved by the Governor and the Legislature. The Governor presents an annual budget to the Legislature, which includes estimates of revenues and other financing sources and recommended expenditures and other financing uses. The Legislature, which has full authority to amend the budget, adopts an expenditure budget by appropriating monies at the individual appropriation account level in an annual appropriations act.

Before signing the appropriations act, the Governor may veto or reduce any specific item, subject to legislative override. Further changes to the budget established in the annual appropriations act may be made via supplemental appropriation acts or other legislative acts. These must also be signed by the Governor and are subject to the line item veto.

In addition, Massachusetts General Laws authorize the Secretary of Administration and Finance, with the approval of the Governor, upon determination that available revenues will be insufficient to meet authorized expenditures, to withhold allotments of appropriated funds which effectively reduce the account's expenditure budget.

The majority of the Commonwealth's appropriations are non-continuing accounts which lapse at the end of each fiscal year. Others are continuing accounts for which the Legislature has authorized that an unspent balance from the prior year be carried forward and made available for spending in the current fiscal year. In addition, the Legislature may direct that certain revenues be retained and made available for spending within an appropriation. Fringe benefits, pension costs, and certain other costs which are mandated by state finance law are not itemized in the appropriation process and are not separately budgeted.

Because revenue budgets are not updated subsequent to the original appropriation act, the comparison of the initial revenue budget to the subsequent, and often modified, expenditure budget can be misleading. Also, these financial statements portray fund accounting with gross inflows and outflows, thus creating a difference to separately published budget documents, which eliminate some interfund activity. In conducting the budget process, the Commonwealth excludes those interfund transactions that by their nature have no impact on the combined fund balance of the budgeted funds. An example of this is the lack of a budget for pension costs.

Generally, expenditures may not exceed the level of spending authorized for an appropriation account. However, the Commonwealth is statutorily required to pay debt service, regardless of whether such amounts are appropriated.

The FY04 General Appropriation Act (Chapter 26, Section 167 of the Acts of 2003), amended section 9C, directing the Governor to notify the Legislature in writing as to the reasons for and the effect of any reductions in spending. Alternatively, the Governor may propose specific additional revenues to fund the deficiency. The Governor may also propose to transfer funds from the Stabilization Fund to cure the deficiency. This proposal must be delivered to the Legislature 15 days before any reductions take effect.

The table on the following page summarizes budgetary activity for FY11 (amounts in thousands):

	<u>Revenues</u>	<u>Expenditures</u>
General Appropriation Act, Chapter 131 of the Acts of 2010:		
Direct appropriations.....	\$ 30,041,700	\$ 28,992,717
Estimated revenues, transfers, direct appropriations, retained revenue appropriations, interagency chargebacks and appropriations carried forward from FY2010	-	<u>1,106,655</u>
Total original budget.....	30,041,700	30,099,371
Supplemental Acts of 2010:		
Chapter 359.....	-	713,554
Chapter 409.....	-	333,181
Supplemental Acts of 2011:		
Chapter 9.....	-	325,222
Chapter 27.....	-	85,460
Chapter 52.....	-	54,032
Total as of June 30, 2011	30,041,700	31,610,820
Supplemental Acts of 2011, passed after June 30:		
Chapter 142.....	-	<u>132,115</u>
Total budgeted revenues and expenditures per Legislative action.....	30,041,700	31,742,935
Plus: Pension contributions and revenue authorized outside of General Appropriations Act, and other transfers of revenue and spending.....	1,450,010	1,450,010
Budgeted revenues and expenditures as reported.....	<u>\$ 31,491,710</u>	<u>\$ 33,192,945</u>

As the budget is not passed taking into account the structure of funds, but of appropriations, reports contained within the Commonwealth's MMARS accounting system demonstrate budgetary compliance by appropriation. Those reports are available upon request at the Office of the State Comptroller, Financial Reporting and Analysis Bureau, at (617) 973-2660.

2006	445,527	96%	779,158	93%	1,224,685	94%

The following table shows the Commonwealth's annual required contribution (ARC) and percent of the ARC funded for the State Retiree Benefits Trust Fund (SRBTF) for each of the past three fiscal years.

<u>Fiscal Year Ended 6/30</u>	<u>Annual Required Contribution</u>	<u>Percentage Contributed</u>
2011	1,276	44%
2010	1,163	32%
2009	1,222	29%

Commonwealth Pier / World Trade Center

This section of the HarborWalk offers diverse perspectives for the visitor, from waterfront commerce to public art. Commonwealth Pier, once used by large ships, is now a conference, exhibition, and office complex. The World Trade Center project accomplished the renovation and conversion of the 70-year-old former Commonwealth Pier landmark structure into an 800,000-square-foot facility for exhibition space and offices for high-tech and international trade companies. The HarborWalk loops around the Pier, offering good views of Fish Pier, Liberty Wharf, the Harbor, and the Boston skyline. Ferries and harbor-cruise boats dock on the west side of Commonwealth Pier. The historic tugboat Luna, the first diesel-electric vessel in the world built for a commercial tugboat company, is moored on the east side of Commonwealth Pier.

An interior waiting room and public restrooms are available to the public inside the waterfront retail area of Commonwealth Pier along Seaport Boulevard.

Fan Pier

From the HarborWalk on the Fan Pier, visitors can enjoy one of the best panoramas of the city, with unobstructed views of downtown to East Boston and the Harbor Islands. This HarborWalk segment has interpretive elements which describe the history of the Fan Pier, as well as benches, plantings, and trash barrels. Round tables and chairs along the HarborWalk are a favorite at lunch time for office workers and visitors.

Carson Beach

L and M Street Beaches are adjacent to each other along Day Boulevard in South Boston and link the beach at Pleasure Bay with Carson Beach, providing one of the longest stretches of uninterrupted beach in the Boston area. These popular local beaches provide some of the best family-friendly amenities on the waterfront, including opportunity for sand-castle building, picknicking, and swimming. The HarborWalk is also a great destination for jogging, walking, roller-blading, and biking. The L and M Street Beaches are located near the L Street Bathhouse where the annual L Street Brownies host its New Year's Day polar bear plunge.

Castle Island

Castle Island is one of the most popular destinations for Boston residents and visitors alike. It features opportunities for both recreation and historical learning. The island (which is connected to the mainland) is home to Fort Independence, a National Historic Landmark, and Pleasure Bay features a sandy beach and swimming in a calm, enclosed lagoon.

Castle Island has been connected to the mainland since the 1930s, when streetcars brought bathers to Pleasure Bay. Fort Independence is the eighth fort to occupy this site and contains over 172,687 linear feet of hammered stone. It was constructed under the direction of Colonel Sylvanus Thayer between 1834 and 1851. The fort and the island are on the State and National Registers of Historic Places, and Fort Independence is a National Historic Landmark.

The HarborWalk extends along Pleasure Bay, with a detour to Castle Island. The causeway located behind the beach provides a great walk way for strolling around or viewing Pleasure Bay from shade shelters. There are views to Logan Airport and the Harbor Islands, and visitors can observe boating activity in the Harbor.

Statistical Section

Schedule of Net Assets by Component – Last Ten Fiscal Years

Changes in Net Assets – Last Ten Fiscal Years

Fund Balances, Governmental Funds – Last Ten Fiscal Years

Ten-Year Schedule of Revenues and Other Financing Sources – All Governmental Fund Types

Ten-Year Schedule of Expenditures and Other Financing Uses by Secretariat – All Governmental Fund Types

Nonagricultural Employment By Sector and Industry in Massachusetts and the United States for 2011

Ten-Year Schedule of Annual Average Civilian Labor Force, Unemployment and Unemployment Rates

Largest Private Sector Massachusetts Employers

Standard and Poors 500 Companies Headquartered in Massachusetts

Full Time Equivalent Employees by Function / Program – Last Ten Years

Massachusetts Road Inventory – Calendar Year End, Lane Miles by Type – Last Ten Calendar Years

Average Annual Medicaid Caseload and Medicaid Expenditure – Last Ten Fiscal Years

Massachusetts Real Property Owned and Leased Annual Inventory, Acreage, Improvements and Square Footage

Massachusetts Public Higher Education Enrollment and Degrees Conferred – Last Nine Academic Years

(Enrollment), Last Ten Years (Degrees)

Calculation of Transfers - Stabilization Fund

Calculation of Transfer – Tax Reduction Fund

Massachusetts General Information

HarborWalk at the ICA

The first art museum to be built in Boston in nearly 100 years, the Institute of Contemporary Art (ICA) opened its new waterfront home on Fan Pier in December, 2006. Its South Boston location draws thousands of visitors to the HarborWalk year-round, thanks to their extensive free outdoor programs for the public in the summer.

Statistical Section Narrative and Table of Contents

This part of the Commonwealth of Massachusetts' comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the Commonwealth's overall financial health.

Contents

Financial Trends

These schedules contain trend information to help the reader understand how the Commonwealth's financial performance and fiscal health has changed over time. The schedules presented from an entity wide perspective are only included from FY02 and forward, coinciding with the implementation of GASB 34. Fund perspective statements are presented for the last ten fiscal years, except where noted. Schedules included are:

Entity Wide Perspective:

Schedule of Net Assets by Component, last ten fiscal years	156
Changes in Net Assets, last ten fiscal years.....	158

Fund Perspective:

Fund Balances (deficits), Governmental Funds, last ten fiscal years	160
Ten-Year Schedule of Revenues and Other Financing Sources, All Governmental Fund Types – Fund Perspective.....	162
Ten-Year Schedule of Expenditures And Other Financing Uses By Secretariat, All Governmental Fund Types – Fund Perspective.....	164

Revenue Capacity

These schedules contain information to help the reader assess the Commonwealth's most significant revenue source, income taxation. Schedules included are:

Personal Income by Industry, Last Ten Calendar Years - (inclusive of the Commonwealth's highest income tax rate)	166
Personal Income Tax Filers and Liability by Income Level, Tax Years 2009 and 2000 ¹	168

Debt Capacity

These schedules present information to help the reader assess the affordability of the Commonwealth's current levels of outstanding debt and the Commonwealth's ability to issue additional debt in the future. Schedules included are:

Nine Year Schedule of Per Capita General Long-Term Bonded Debt and Capital Leases.....	169
Ten Year Schedule of Outstanding Direct Debt and Statutory Debt Limit.....	170
Ten Year Schedule of Pledged Revenue Coverage	172
Ten Year Schedule of Percentage of Annual Debt Service Expenditures for General Bonded Debt to Total Non - Capital Expenditures – Fund Perspective, All Governmental Fund Types.....	174

¹ Tax Year 2009 is the last "closed" tax year

Component Unit Revenue Bond Coverage for the Last Ten Fiscal Years	175
--	-----

Demographic Information

These schedules offer demographic and economic indicators to help the reader understand the environment within the Commonwealth's financial activities take place. Schedules included are:

Ten Year Schedule of Massachusetts and United States Resident Population.....	176
Ten Year Schedule of Massachusetts and United States Resident	
Per Capita Net Income	177
Nonagricultural Employment By Sector and Industry in Massachusetts and	
The United States for 2011.....	178
Ten Year Schedule of Annual Average Civilian Labor Force,	
Unemployment and Unemployment Rates For Massachusetts and The United States.....	179
Largest Private Sector Employers	180
Standard and Poors 500 Companies Headquartered in Massachusetts	181

Operating Information

These schedules offer operating data to help the reader understand how the information in the Commonwealth's financial report relates to the services it provides and the activities it performs. Schedules included are:

Full Time Equivalent Commonwealth Employees by Function / Program,	
Last Ten Years.....	182
Massachusetts Road Inventory, Calendar Year End, Lane Miles by Type,	
Last Ten Calendar Years	184
Average annual Medicaid Caseload and Expenditures – Fund Perspective, Last Ten Fiscal Years	185
Commonwealth Owned Real Property by Executive Office, Last Ten Years.....	186
Massachusetts Public Higher Education, Enrollment and Degrees Conferred,	
Last Ten Academic Years	188

Other Information

Calculation of Transfers: Stabilization Fund.....	190
Calculation of Transfers: Tax Reduction Fund	191
Massachusetts General Information	192

Ten Year Schedule of Pledged Revenue Coverage

Special Obligation Highway Bonds (Motor Fuels Taxation and Motor Vehicle Fees), Convention Center Bonds (Tax Incremental Financing) and Grant Anticipation Notes (Federal Highway Grants)

(Statutory Basis, Amounts in Thousands, Except for Federal Highway Appropriations which are in Billions and on a federal fiscal year and Except for Ratios)

	2011	2010	2009	2008	
<u>Highway Bonds</u>					
For issues prior to December 2010, the bonds are secured by a pledge of 6.86¢ of the 21¢ per gallon state gasoline excise tax for FY2008 and before. For FY2009 and beyond, the pledge is up to 10¢ of the tax. Bonds issued in December 2010 are secured by a senior lien on 14.085 cents of the total 21 cent per gallon gasoline tax, the full 21 cents per gallon of special fuels taxes (comprised primarily of taxes on diesel fuel), the full 19.1% of the average price per gallon tax on liquefied natural gas, and all Registry of Motor vehicle fees deposited in the Commonwealth Transportation Fund. The bonds also have a subordinate lien on 6.86¢ of the 21¢ per gallon gasoline tax not included in the senior lien. Revenues pledged to the bonds are available prior to use for any other purposes. Thus, operating expenses paid from the these revenue sources are not applicable for the purpose of calculating debt service coverage ratios and are not shown in this table. The 2010 bonds were issued as federally taxable Build America Bonds/Recovery Zone Economic Development Bonds; the programs provide an interest subsidy of 35-45% directly to the Commonwealth. The interest subsidy is shown as pledged funds and debt service is gross of the subsidy.

<u>Grant Anticipation Notes (GANS)</u>					
Notes issued prior to December 2010 ("Senior Federal Highway Highway Notes") are secured by all federal highway reimbursements into the Grant Anticipation Note Trust fund, released by the Commonwealth once all debt service and reserve funding obligations of the notes have been met. If the United States Congress reduces the aggregate amount appropriated nationwide for federal highway spending to less than \$17.1 billion and debt service coverage with respect to the notes falls below 120%, then the legislation further pledges that 10¢ per gallon of existing motor fuel tax collections will be deposited into the trust fund to be used for debt service, subject to appropriation. Notes issued in December 2010 ("Federal Highway Grant Anticipation Notes") are secured by all federal highway reimbursements after payment of debt service on the Senior Federal Highway Notes and also by any revenues pledged to the payment of pre-2010 and December 2010 Highway Bonds (as described above) in excess of debt service paid on those bonds. Revenues pledged to the notes are available prior to use for any other purposes. Thus, operating expenses paid from the these revenue sources are not applicable for the purpose of calculating debt service coverage ratios and are not shown in this table. The 2010 bonds were issued as federally taxable Build America Bonds; the program provides an interest subsidy of 35% directly to the Commonwealth. The interest subsidy is shown as pledged funds and debt service is gross of the subsidy.

2006	2,028	31,831	6.4
2005	1,719	31,700	5.4
2004	1,605	28,888	5.6
2003	1,467	27,858	5.3
2002	1,382	26,998	5.1
2001	1,408	25,295	5.6

Amounts are shown net of Massachusetts School Building Authority expenditures and debt service. Business type activities debts are secured solely by leases between the Institutions of Higher Education and two blended building authorities.

Debt Service to Non-Capital Expenditures Ratio 2002- 2011

**Component Units Revenue Bond Coverage
For The Last Ten Fiscal Years**

(Amounts in thousands)

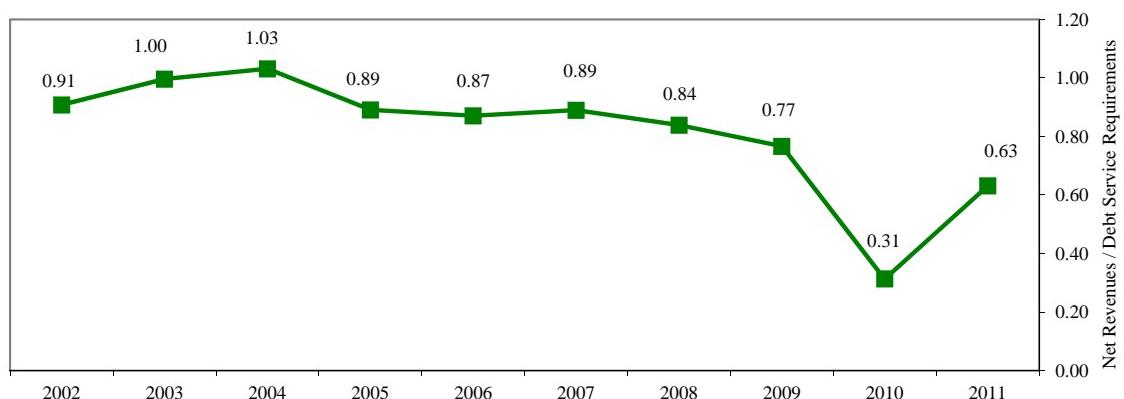

Fiscal year ended June 30	Net revenues ⁽¹⁾	Debt service requirements ⁽²⁾	Coverage Ratio
2011	\$ 738,470	\$ 1,170,149	0.63
2010	433,617	1,383,231	0.31
2009	805,316	1,050,655	0.77
2008	728,445	868,331	0.84
2007	870,919	978,819	0.89
2006	717,190	823,406	0.87
2005	648,282	727,316	0.89
2004	700,677	679,457	1.03
2003	663,234	665,538	1.00
2002	716,951	789,318	0.91

(1) Net revenues represent the regular recurring operating income (loss) plus operating grants, transfers and depreciation of only those Authorities with revenue bonds outstanding. Beginning FY2010, interest expenses were included in the net revenue calculation.

(2) Debt service requirements represent total debt service payments made less debt service paid on short-term borrowings of only those Authorities with revenue bonds outstanding.

Calculation Of Transfers: Tax Reduction Fund

June 30, 2011
(Amounts in thousands)

This statement is prepared pursuant to Chapters 29 Sections 2H and 2I of the Massachusetts General Laws, as amended. It is prepared on the statutory basis of accounting and presents information contained in the official books and accounting records of the Commonwealth. Supporting information is presented in individual schedules, as indicated, and in the Financial Section of this report.

The computation is as follows:

Part 1: Comparison of Stabilization Fund, after current fiscal year transfers,
to 15% of budgeted revenues and other financial resources:

Undesignated fund balance in the Stabilization Fund.....	\$ 1,379,071
Allowable Stabilization Fund balance (per Schedule B).....	<u>4,961,300</u>
Stabilization Fund excess, if any, transferable to Tax Reduction Fund.....	<u>\$ -</u>

Part 2: Status of Stabilization Fund after transfers:

Stabilization Fund balance.....	\$ 1,379,071
Transfer to Tax Reduction Fund.....	<u>-</u>
Stabilization Fund balance after transfer to Tax Reduction Fund.....	<u>\$ 1,379,071</u>

Part 3: Status of Tax Reduction Fund after transfers:

Tax Reduction Fund balance.....	\$ -
Transfers from Stabilization Fund.....	<u>-</u>
Tax Reduction Fund balance after transfers.....	<u>\$ -</u>

MASSACHUSETTS GENERAL INFORMATION

Admitted to Union (6th State): 1788

Population: 6,557,254

Capital: Boston

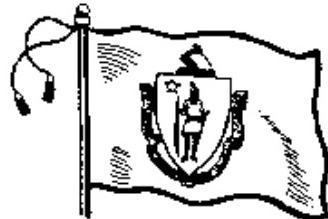

Nickname: Bay State

The State Seal

The State Seal, adopted by Governor John Hancock and the Council on December 13, 1780 and made official by the General Court on June 4, 1885, is circular and bears a representation of the arms of the Commonwealth encircled with the words "Sigillum Reipublicae Massachusettensis" (Seal of the Republic of Massachusetts). The arms, according to legislative enactment, consists of "a shield having a blue field or surface with an Indian thereon, dressed in a shirt and moccasins, holding in his right hand a bow, and in his left hand an arrow, point downward, all of gold; and in the upper corner of the field, above his right arm, bent at the elbow, clothed and ruffled, with the hand grasping a broadsword."

The State Flag

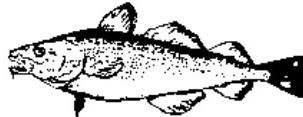

The State Flag is white, bearing on both sides a representation of the coat of arms. It was adopted in its final form in 1971; before that, the obverse side depicted a pine tree.

The State Flower

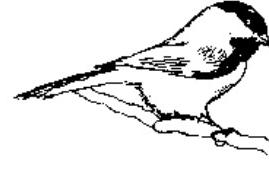

The Mayflower

The State Fish

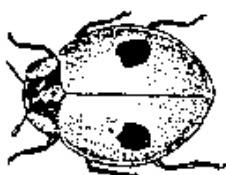

The Cod, a soft-finned fish, usually 10-20bs. A sculpture of a cod hangs in the House of Representatives as a tribute to this useful aquatic creature.

The State Bird

The Black Capped Chickadee

The State Insect

The Lady Bug

The State Tree

The American Elm was adopted as the official tree March 21, 1941 to commemorate the fact that General George Washington took command of the Continental Army beneath one on Cambridge Common in 1775.

The State Dog

The Boston Terrier, the first purebred dog developed in America (1869), is a cross between an English bulldog and an English terrier.

Beverage: Cranberry Juice

Dessert: Boston Cream Pie

Muffin: The Corn Muffin

Cookie: Chocolate Chip

Horse: The Morgan Horse

Bean: Navy Bean
